aiper smart pool cleaner manual: Shot at Dawn Julian Putkowski, Julian Sykes, 1989 I Could not look on Death, which being known, Men led me to him, blindfold and Alone. (Epitaphs of the war: The Coward) Thus, in two short, bitter lines, Rudyard Kipling summed up a series of events that are among the most shameful and inglorious in all British history: The executions by firing squad of some 350 members of the British and Empire forces during the First World War. Based on years of painstaking research, this is the first book to give complete details of all these executions, including names of victims; their crimes; the circumstances, dates and places of execution, and of burial (where known); names of regiments and other units; and victims personal histories and private circumstances (where known). The authors demonstrate the ineptness, ignorance and unfairness of the British court martial system at the time, and how frequently condemned men (from almost every regiment and corps in the army) were proved to have been formerly brave soldiers who had simply cracked under the pressure of trench warfare. These men were judicially killed as a lesson to other soldiers who, it was thought, might themselves crack. In the event, many of the victims went to their deaths with unbelievable courage and dignity, as eye-witness accounts in this book show. Here, too, are details of how next-of-kin of executed men were hoodwinked into believing that their men had died in action, a system of cover-up which persists to this day.

When Shelley was at Oxford in 1811, there were times when he would read nothing but Gebir. His friend Hogg says that when he went to Shelley's rooms one morning to tell him something of importance, he could not draw his attention away from Gebir. Hogg impatiently threw the book out of window. It was brought back by a servant, and Shelley immediately fastened upon it again. At the close of 1805 Landor's father died, and the young poet became a man of property. In 1808 Southey and Landor first met. Their friendship remained unbroken. When Spain rose to throw off the yoke of Napoleon, Landor's enthusiasm carried him to Corunna, where he paid for the equipment of a thousand volunteers, and joined the Spanish army of the North. After the Convention of Cintra he returned to England. Then he bought a large Welsh estate-Llanthony Priory-paid for it by selling other property, and began costly improvements. But he lived chiefly at Bath, where he married, in 1811, when his age was thirty-six, a girl of twenty. It was then that he began his tragedy of Count Julian. The patriotic struggle in Spain commended at the same time to Scott, Southey, and Landor the story of Roderick, the last of the Gothic kings, against whom, to avenge wrong done to his daughter, Count Julian called the[...].
