Air Force Bullet Writing: The Art of Concise and Impactful Communication

Author: Master Sergeant (Ret.) John "Jack" Riley, USAF. Thirty years of service including experience as a Personnel Specialist and Military Training Instructor. Certified Professional Resume Writer (CPRW).

Publisher: Military Career Strategies, a leading publisher of military-focused career guides and professional development resources, known for its accuracy and practical advice for transitioning service members.

Editor: Dr. Emily Carter, PhD in Organizational Communication, with extensive experience in military writing and curriculum development.

Keywords: Air Force bullet writing, military bullet writing, accomplishment statements, performance reports, Air Force EPR, Air Force OPR, resume writing for military, military resume, impactful writing, concise writing, STAR method, storytelling, military to civilian transition

Introduction: Mastering the Art of Air Force Bullet Writing

Air Force bullet writing is more than just a stylistic choice; it's a crucial skill that directly impacts career progression, promotion opportunities, and overall success within the Air Force. It's the foundation of effective communication in performance reports (OPRs), enlisted performance reports (EPRs), award nominations, and even resumes for transitioning service members. This comprehensive guide delves into the intricacies of air force bullet writing, exploring its significance, techniques, and best practices. Mastering air force bullet writing is about crafting concise, impactful statements that accurately reflect accomplishments and contributions.

The Significance of Air Force Bullet Writing

The importance of air force bullet writing cannot be overstated. In a highly competitive environment, your ability to articulate your achievements clearly and persuasively is paramount. Poorly written bullets can overshadow even the most significant contributions. Conversely, well-crafted bullets can make a substantial difference in promotion boards, award selections, and even civilian job applications. These bullets aren't just descriptions; they are evidence of your competence, leadership, and impact on the Air Force mission.

Your performance is judged based on the information presented, and that information is largely conveyed through air force bullet writing. Whether it's highlighting your proficiency in a specific technical skill, showcasing your leadership capabilities, or demonstrating your problem-solving prowess, your bullet points are your advocates. They paint a picture of your contributions, often the

only picture the reviewer has.

The skill extends beyond the military. The concise and results-oriented nature of air force bullet writing translates seamlessly to civilian resume writing and other professional contexts. This transferable skill makes it an invaluable asset throughout your career, regardless of your chosen path after your service.

Key Principles of Effective Air Force Bullet Writing

Effective air force bullet writing relies on several core principles:

Conciseness: Avoid unnecessary words or phrases. Get straight to the point. Every word should contribute to the overall impact of the bullet.

Action Verbs: Start each bullet with a strong action verb that accurately reflects your contribution (e.g., managed, developed, implemented, led, improved).

Quantifiable Results: Whenever possible, quantify your accomplishments using numbers, percentages, or specific metrics (e.g., "Reduced operational costs by 15%," "Trained 20 personnel," "Improved efficiency by 20%").

The STAR Method: Employ the STAR method (Situation, Task, Action, Result) to provide context, demonstrate your actions, and highlight the positive outcomes of your efforts. This structured approach ensures clarity and impact.

Accuracy and Honesty: Always ensure your bullets are accurate and truthful. Exaggeration or fabrication can have serious consequences.

Consistency: Maintain a consistent tone and style throughout your bullets. Use parallel structure for clarity and readability.

Crafting Powerful Air Force Bullets: Practical Examples

Let's illustrate the principles above with some practical examples. Consider these two bullets:

Weak Bullet: "Worked on the project."

Strong Bullet: "Led a team of five to develop a new software application, resulting in a 20% increase in efficiency and a 10% reduction in processing time."

Notice how the strong bullet uses a strong action verb ("led"), quantifies the results (20% increase, 10% reduction), and provides context (a team of five, new software application). It paints a much clearer and more compelling picture of the contributor's impact.

Another example:

Weak Bullet: "Helped with the training."

Strong Bullet: "Developed and delivered a three-day training program for 30 personnel, resulting in a 15% improvement in task completion rates and a 10% reduction in error rates."

Applying Air Force Bullet Writing to Different Contexts

The principles of air force bullet writing are applicable across various contexts:

Performance Reports (OPRs & EPRs): These are crucial for career progression. Strong bullets demonstrate your accomplishments and justify promotion recommendations.

Award Nominations: Highlight your significant contributions to merit awards and decorations. Compelling bullets strengthen your nomination.

Resume Writing (Military to Civilian Transition): Translate your military experience into compelling civilian-friendly language using the principles of concise, results-oriented bullet points. This is essential for showcasing your skills and qualifications to potential employers.

Overcoming Common Challenges in Air Force Bullet Writing

Many individuals struggle with air force bullet writing, often due to:

Lack of Clarity: Vague or unclear language can obscure your accomplishments.

Excessive Detail: Too much information can make your bullets cumbersome and ineffective.

Lack of Quantifiable Results: Without specific metrics, your contributions may appear less significant.

Passive Voice: Use active voice to make your bullets more dynamic and impactful.

Conclusion

Mastering air force bullet writing is a critical skill for anyone serving in the Air Force, significantly impacting career advancement and success. By understanding the key principles, employing effective strategies, and practicing consistently, you can craft impactful bullets that accurately reflect your contributions and help you achieve your career goals. The ability to concisely and powerfully communicate your accomplishments is a highly valued asset, both within the military and in the civilian world.

FAQs

1. What is the difference between Air Force bullet writing and civilian resume writing? While both require concise language and quantifiable results, Air Force bullet writing often emphasizes the impact on the mission, while civilian resumes may focus more on specific job duties and skills.
1. How long should an Air Force bullet point be? Aim for brevity; ideally, a single, well-crafted sentence. Avoid exceeding two sentences.
1. Can I use jargon in my Air Force bullet writing? Use jargon sparingly, as it may not be understood by everyone reviewing your work.

1. What if I don't have quantifiable results for all my accomplishments? Focus on the impact of your actions, even if you can't provide precise numbers.
1. How can I improve my Air Force bullet writing skills? Practice regularly, review examples of effective bullets, and seek feedback from peers or supervisors.
1. Are there any specific templates for Air Force bullet writing? While there are no official templates, the STAR method provides a structured approach.
1. What are the consequences of poorly written Air Force bullets? Poorly written bullets can hinder career progression, reduce the chances of receiving awards, and negatively impact overall performance evaluations.
1. Where can I find more resources on Air Force bullet writing? Numerous online resources, military writing guides, and professional development courses offer further guidance.
1. Is there a difference in bullet writing for officers and enlisted personnel? While the principles remain consistent, officers' bullets might focus more on leadership and strategic initiatives, while enlisted bullets might emphasize technical skills and operational execution.

air force bullet writing: Stripes Hamp Lee III, 2017-04

air force bullet writing: Brown Bag Lessons Don Alexander, Eric R Jaren, 2012 Brown Bag Lessons, The Magic of Bullet Writing centers on effective bullet writing and guarantees immediate improvement. Skillful writing doesn't have to be difficult. No other book approaches writing the way this book does, and no other book teaches these techniques. After reading this book, you will fully understand how to write strong bullets and why every word matters. In 2003 the author created a seminar to teach a fair and consistent process to evaluate recognition packages. This seminar transformed an entire organization within six months. Since then, the techniques have decisively transformed the writing, recognition, and promotions of every organization applying them. The practices in this book continue to positively impact the Air Force and sister services through professional military education. In addition, the concepts have helped transitioning service members

and college students better communicate acquired capabilities and competencies on their résumés. Read on to discover the magic and open your eyes to a brand new way to look at writing. The US Air Force promotion system emphasizes the importance of documenting your very best accomplishments. Under this system, promotion comes from the most recent performance reports, so Airmen must communicate the best accomplishments and not just words that fill the white space. This Magic of Bullet Writing will ensure you know how to articulate not just what you are doing but also convey your strongest competencies and capabilities so the promotion board can fully assess your readiness for promotion. Training materials that correspond to the lessons in this book are available for free download at <http://www.brownbaglessons.com>. Are you ready for the magic?

air force bullet writing: *Chasing the Silver Bullet* Kenneth P. Werrell, 2014-07-01 Airpower is credited with success in Afghanistan, Desert Storm, and Serbia, but in Vietnam all of America's aerial might could not defeat a vastly outnumbered Third World force on bicycles. With a panoramic sweep and shocking frankness unrivaled in the current literature, Ken Werrell, one of today's most experienced airpower historians, reveals the true extent of the technological evolution that fueled this transformation. *Chasing the Silver Bullet* traces in unprecedented detail the evolution of the Air Force's entire inventory since the Korean War, from the ill-fated F-105 fighter-bomber to the F-117 stealth fighter, but one of its chief contributions is its analysis of the strategies and doctrine that fashioned the hardware. Werrell's exhaustive research and sage analysis challenge the Air Force's mantra that precision-guided munitions delivered from long-range, stealthy aircraft are America's true war heroes. Desert Storm gave us the wrong impression about airpower technology and Werrell corrects that mistake with this landmark study, rendering superficial all other books about Desert Storm and current capabilities. Objective, even-handed, and unimpressed with the bells and whistles of new technology, Werrell understands how airpower works.

air force bullet writing: *Command Of The Air* General Giulio Douhet, 2014-08-15 In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest. In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh "Boom" Trenchard of Great Britain and William "Billy" Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet's central vision-that command of the air is all important in modern warfare-has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

air force bullet writing: *The Tongue and Quill* Air Force, 2019-10-11 The Tongue and Quill has been a valued Air Force resource for decades and many Airmen from our Total Force of uniformed and civilian members have contributed their talents to various editions over the years. This revision is built upon the foundation of governing directives and user's inputs from the unit level all the way up to Headquarters Air Force. A small team of Total Force Airmen from the Air University, the United States Air Force Academy, Headquarters Air Education and Training Command (AETC), the Air Force Reserve Command (AFRC), Air National Guard (ANG), and Headquarters Air Force compiled inputs from the field and rebuilt The Tongue and Quill to meet the needs of today's Airmen. The team put many hours into this effort over a span of almost two years to improve the content, relevance, and organization of material throughout this handbook. As the final files go to press it is the desire of The Tongue and Quill team to say thank you to every Airman who assisted in making this edition better; you have our sincere appreciation!

air force bullet writing: The Emerging Shield Kenneth Schaffel, 1991

air force bullet writing: **Beans, Bullets, and Black Oil** Worrall Reed Carter, 1953

air force bullet writing: One Bullet Away Nathaniel Fick, 2006 An ex-Marine captain shares his story of fighting in a recon battalion in both Afghanistan and Iraq, beginning with his brutal training on Quantico Island and following his progress through various training sessions and, ultimately, conflict in the deadliest conflicts since the Vietnam War.

air force bullet writing: *Sierra Hotel : flying Air Force fighters in the decade after Vietnam* , 2001 In February 1999, only a few weeks before the U.S. Air Force spearheaded NATO's Allied Force air campaign against Serbia, Col. C.R. Anderegg, USAF (Ret.), visited the commander of the U.S. Air Forces in Europe. Colonel Anderegg had known Gen. John Jumper since they had served together as jet forward air controllers in Southeast Asia nearly thirty years earlier. From the vantage point of 1999, they looked back to the day in February 1970, when they first controlled a laser-guided bomb strike. In this book Anderegg takes us from glimmers of hope like that one through other major improvements in the Air Force that came between the Vietnam War and the Gulf War. Always central in Anderegg's account of those changes are the people who made them. This is a very personal book by an officer who participated in the transformation he describes so vividly. Much of his story revolves around the Fighter Weapons School at Nellis Air Force Base (AFB), Nevada, where he served two tours as an instructor pilot specializing in guided munitions.

air force bullet writing: The Praetorian STARShip : the untold story of the Combat Talon , 2001 Jerry Thigpen's study on the history of the Combat Talon is the first effort to tell the story of this wonderfully capable machine. This weapons system has performed virtually every imaginable tactical event in the spectrum of conflict and by any measure is the most versatile C-130 derivative ever produced. First modified and sent to Southeast Asia (SEA) in 1966 to replace theater unconventional warfare (UW) assets that were limited in both lift capability and speed the Talon I quickly adapted to theater UW tasking including infiltration and resupply and psychological warfare operations into North Vietnam. After spending four years in SEA and maturing into a highly respected UW weapons system the Joint Chief of Staff (JCS) chose the Combat Talon to lead the night low-level raid on the North Vietnamese prison camp at Son Tay. Despite the outcome of the operation the Talon I cemented its reputation as the weapons system of choice for long-range clandestine operations. In the period following the Vietnam War United States Air Force (USAF) special operations gradually lost its political and financial support which was graphically demonstrated in the failed Desert One mission into Iran. Thanks to congressional supporters like Earl Hutto of Florida and Dan Daniel of Virginia funds for aircraft upgrades and military construction projects materialized to meet the ever-increasing threat to our nation. Under the leadership of such committed hard-driven officers as Brenci Uttaro Ferkes Meller and Thigpen the crew force became the most disciplined in our Air Force. It was capable of penetrating hostile airspace at night in a low-level mountainous environment covertly to execute any number of unconventional warfare missions.

air force bullet writing: *Air University Au-1 Style and Author Guide* Air University Staff, 2005-04 The Style Guide, part one of this publication, provides guidance to Air University's community of writers. It offers a coherent, consistent stylistic base for writing and editing. The Author Guide part two of this publication, offers simple, concise instructions to writers who wish to submit a manuscript to AUPress for consideration.

air force bullet writing: Air Force Handbook 1 U. S. Air Force, 2018-07-17 This handbook implements AFD 36-22, Air Force Military Training. Information in this handbook is primarily from Air Force publications and contains a compilation of policies, procedures, and standards that guide Airmen's actions within the Profession of Arms. This handbook applies to the Regular Air Force, Air Force Reserve and Air National Guard. This handbook contains the basic information Airmen need to understand the professionalism required within the Profession of Arms. Attachment 1 contains references and supporting information used in this publication. This handbook is the sole source reference for the development of study guides to support the enlisted promotion system. Enlisted

Airmen will use these study guide to prepare for their Promotion Fitness Examination (PFE) or United States Air Force Supervisory Examination (USAFSE).

air force bullet writing: The Tongue and Quill: Air Force Afh 33-337 Air Force Handbook Certified Current 27 July 2016 Usaf, 2018-10-08 The Tongue and Quill - AFH 33-337 is one of the most used and Air Force Handbooks to date. This is the most up to date edition. (Certified current as of July 27, 2016.) Direct from the ePub repository. The men and women of the United States Air Force must communicate clearly and effectively to carry out our missions. Although we live in an era of rapid personal and mass communication that was barely imagined just a few years ago, our Air Force still requires face-to-face briefings, background papers, and staff packages to keep the mission moving forward. This handbook provides the information to ensure clear communications--written or spoken. The Tongue and Quill has been a valued Air Force resource for decades and many Airmen from our Total Force of uniformed and civilian members have contributed their talents to various editions over the years. This revision is built upon the foundation of governing directives user's inputs from the unit level all the way up to Headquarters Air Force. A small team of Total Force Airmen from the Air University, the United States Air Force Academy, Headquarters Air Education and Training Command (AETC), the Air Force Reserve Command (AFRC), Air National Guard (ANG), and Headquarters Air Force compiled inputs from the field and rebuilt Tongue and Quill to meet the needs of today's Airmen. The team put many hours into this effort over a span of almost two years to improve the content, relevance, and organization of material throughout this handbook. As the final files go to press it is the desire of The Tongue and Quill team to say thank you to every Airman who assisted in making this edition better; you have our sincere appreciation! The Air Force Handbook (AFH) 33-337 is a guideline for speakers, writers, and presenters. The Tongue and Quill, as it's known, is widely used by Air Force military and civilian members, professional military school educators and students, and civilian corporations around the U.S.

air force bullet writing: *Here, Bullet* Brian Turner, 2014-09-01 A first-person account of the Iraq War by a soldier-poet, winner of the 2005 Beatrice Hawley Award. Adding his voice to the current debate about the US occupation of Iraq, in poems written in the tradition of such poets as Wilfred Owen, Yusef Komunyakaa (Dien Cai Dau), Bruce Weigl (Song of Napalm) and Alice James' own Doug Anderson (The Moon Reflected Fire), Iraqi war veteran Brian Turner writes power-fully affecting poetry of witness, exceptional for its beauty, honesty, and skill. Based on Turner's yearlong tour in Iraq as an infantry team leader, the poems offer gracefully rendered, unflinching description but, remarkably, leave the reader to draw conclusions or moral lessons. Here, *Bullet* is a must-read for anyone who cares about the war, regardless of political affiliation.

air force bullet writing: Warnings Unheeded Andy Brown, 2016-11-02 On 20 June 1994, a gunman opened fire inside the busy hospital of Fairchild Air Force Base. Four days later, the crash of a B-52 bomber killed some of Fairchild's most veteran aviators. The twin tragedies struck suddenly - but not without warning. This nonfiction narrative is a page turner... you will not put it down. —CMSgt William Kelly, USAF, Office of Special Investigations *Warnings Unheeded* is the work of criminal investigator Andy Brown. As a young military policeman, Brown saved countless lives when he raced to the hospital and ended the gunman's shooting spree. His devotion to duty prepared him for the deadly gunfight, but he wasn't prepared for the traumatic effect of learning that twenty-six people had been gunned down prior to his arrival, or for the loss of four aviators later that week. On a quest for answers, Brown spent two decades investigating the events that led to the mass murder and the plane crash. His relentless research uncovered numerous people who had warned of the impending violence and disaster. With heavy use of firsthand accounts, *Warnings Unheeded* lets us experience the unfolding tragedies through the eyes of the men and women who struggled to prevent them. From the people who tried to help a troubled airman even as he plotted to kill them. From the aviators who were forced to fly with a seemingly-suicidal pilot. And from a military policeman who offers a candid insight into the hidden cost of becoming a "hero." *Warnings Unheeded* is a story of heroes and humanity - of violence and mental illness - and if we are willing to

listen, a timeless warning from the ghosts of our past. Best book I've read in some time. Without lurid details or overwrought prose ... [Brown] illustrates the events leading up to the twin tragedies with a thoroughness and professionalism I suspect he brings to every task he takes on. But this is no dry recounting of facts, and Brown's compassion for the victims is as clear as his prose ... I highly recommend this book. —R. Jenson, Gray Dog Press In vivid and thoroughly researched detail, Andy Brown masterfully weaves two tragic stories ... this is an important and well-written read. —Gregory K. Moffatt, Ph.D., Author of *Blind-Sided: Homicide Where it is Least Expected* A highly readable book ... from a unique source. Recommended for a wide audience. —Best-selling true-crime author, Ron Franscell *** Contains more than 70 images and photographs ***

air force bullet writing: Linebacker II James R. McCarthy, George B. Allison, 1979

air force bullet writing: *Generation Kill* Evan Wright, 2005-02-01 Based on Evan Wright's National Magazine Award-winning story in Rolling Stone, this is the raw, firsthand account of the 2003 Iraq invasion that inspired the HBO® original mini-series. Within hours of 9/11, America's war on terrorism fell to those like the twenty-three Marines of the First Recon Battalion, the first generation dispatched into open-ended combat since Vietnam. They were a new pop-culture breed of American warrior unrecognizable to their forebears—soldiers raised on hip hop, video games and The Real World. Cocky, brave, headstrong, wary and mostly unprepared for the physical, emotional and moral horrors ahead, the "First Suicide Battalion" would spearhead the blitzkrieg on Iraq, and fight against the hardest resistance Saddam had to offer. Hailed as "one of the best books to come out of the Iraq war" (Financial Times), *Generation Kill* is the funny, frightening, and profane firsthand account of these remarkable men, of the personal toll of victory, and of the randomness, brutality and camaraderie of a new American War.

air force bullet writing: *Technology and the Air Force* Jacob Neufeld, 2009-06 Proceedings of a symposium co-sponsored by the Air Force Historical Foundation and the Air Force History and Museums Program. The symposium covered relevant Air Force technologies ranging from the turbo-jet revolution of the 1930s to the stealth revolution of the 1990s. Illustrations.

air force bullet writing: Defending Air Bases in an Age of Insurgency Shannon Caudill, Air University Press, 2014-08 This anthology discusses the converging operational issues of air base defense and counterinsurgency. It explores the diverse challenges associated with defending air assets and joint personnel in a counterinsurgency environment. The authors are primarily Air Force officers from security forces, intelligence, and the office of special investigations, but works are included from a US Air Force pilot and a Canadian air force officer. The authors examine lessons from Vietnam, Iraq, Afghanistan, and other conflicts as they relate to securing air bases and sustaining air operations in a high-threat counterinsurgency environment. The essays review the capabilities, doctrine, tactics, and training needed in base defense operations and recommend ways in which to build a strong, synchronized ground defense partnership with joint and combined forces. The authors offer recommendations on the development of combat leaders with the depth of knowledge, tactical and operational skill sets, and counterinsurgency mind set necessary to be effective in the modern asymmetric battlefield.

air force bullet writing: How Not to Be Wrong Jordan Ellenberg, 2014-05-29 A brilliant tour of mathematical thought and a guide to becoming a better thinker, *How Not to Be Wrong* shows that math is not just a long list of rules to be learned and carried out by rote. Math touches everything we do; It's what makes the world make sense. Using the mathematician's methods and hard-won insights-minus the jargon-professor and popular columnist Jordan Ellenberg guides general readers through his ideas with rigor and lively irreverence, infusing everything from election results to baseball to the existence of God and the psychology of slime molds with a heightened sense of clarity and wonder. Armed with the tools of mathematics, we can see the hidden structures beneath the messy and chaotic surface of our daily lives. *How Not to Be Wrong* shows us how--Publisher's description.

air force bullet writing: *Twenty Essentials for the Air Force First Sergeant* Hamp Lee III, 2014-05-10 The role of the Air Force first sergeant is one of the most important positions in a

military unit. As a focal point of enlisted readiness, morale, health, welfare, and discipline, the first sergeant is a principal advisor to the commander in preparing a mission-ready force. First sergeants are on call 24/7 and face multiple unit issues such as military or dependent deaths, financial issues, sexual assault, illegal drug use, adultery, suicides, and other miscellaneous infractions. The first sergeant special duty is extremely demanding and requires the best each first sergeant has to offer every day as leaders to the enlisted corps. From the perspective of one first sergeant to another, Hamp Lee III shares *Twenty Essentials for the Air Force First Sergeant*. In this book, he provides helpful information and tools to navigate first sergeants through their years of serving American Airmen. From topics such as time management, personal integrity, and even bad days to issue discipline, *Twenty Essentials for the Air Force First Sergeant* will ensure a first sergeant's mission of making Airmen their business will be a successful one.

air force bullet writing: *Brothers in Berets* Forrest L. Marion, 2018 The Air Force Special Operations Command (AFSOC) special tactics community is a small, tight-knit brotherhood of proficient and committed warriors, consisting of special tactics officers and combat controllers, combat rescue officers and pararescuemen, and officer and enlisted special operations weathermen. These warriors have consistently proven themselves to be an invaluable force multiplier throughout history in conflicts around the world. This is their story.--Provided by publisher.

air force bullet writing: *The Battle for Rome* Robert Katz, 2003 This landmark work draws on newly released documents and firsthand accounts to tell the dramatic story of Rome's dark days during the German occupation. 8-pages of photos. 2 maps.

air force bullet writing: *Commanding an Air Force Squadron* Col Usaf Timmons, Timothy, Timothy T. Timmons, 2012-08-07 The privilege of commanding an Air Force squadron, despite its heavy responsibilities and unrelenting challenges, represents for many Air Force officers the high point of their careers. It is service as a squadron commander that accords true command authority for the first time. The authority, used consistently and wisely, provides a foundation for command. As with the officer's commission itself, command authority is granted to those who have earned it, both by performance and a revealed capacity for the demands of total responsibility. But once granted, it much be revalidated every day. So as one assumes squadron command, bringing years of experience and proven record to join with this new authority, one might still need a little practical help to success with the tasks of command. This book offers such help. "*Commanding an Air Force Squadron*" brings unique and welcome material to a subject other books have addressed. It is rich in practical, useful, down-to-earth advice from officers who have recently experienced squadron command. The author does not quote regulations, parrot doctrine, or paraphrase the abstractions that lace the pages of so many books about leadership. Nor does he puff throughout the manuscript

about how he did it. Rather, he presents a digest of practical wisdom based on real-world experience drawn from the reflection of many former commanders from any different types of units. He addresses all Air Force squadron commanders, rated and nonrated, in all sorts of missions worldwide. Please also see a follow up to this book entitled "Commanding an Air Force Squadron in the Twenty-First Century (2003)" by Jeffrey F. Smith, Lieutenant Colonel, USAF.

air force bullet writing: Unbroken Laura Hillenbrand, 2014-07-29 #1 NEW YORK TIMES BESTSELLER • NOW A MAJOR MOTION PICTURE • Look for special features inside. Join the Random House Reader's Circle for author chats and more. In boyhood, Louis Zamperini was an incorrigible delinquent. As a teenager, he channeled his defiance into running, discovering a prodigious talent that had carried him to the Berlin Olympics. But when World War II began, the athlete became an airman, embarking on a journey that led to a doomed flight on a May afternoon in 1943. When his Army Air Forces bomber crashed into the Pacific Ocean, against all odds, Zamperini survived, adrift on a foundering life raft. Ahead of Zamperini lay thousands of miles of open ocean, leaping sharks, thirst and starvation, enemy aircraft, and, beyond, a trial even greater. Driven to the limits of endurance, Zamperini would answer desperation with ingenuity; suffering with hope, resolve, and humor; brutality with rebellion. His fate, whether triumph or tragedy, would be suspended on the fraying wire of his will. Appearing in paperback for the first time—with twenty arresting new photos and an extensive Q&A with the author—Unbroken is an unforgettable testament to the resilience of the human mind, body, and spirit, brought vividly to life by Seabiscuit author Laura Hillenbrand. Hailed as the top nonfiction book of the year by Time magazine • Winner of the Los Angeles Times Book Prize for biography and the Indies Choice Adult Nonfiction Book of the Year award "Extraordinarily moving . . . a powerfully drawn survival epic."—The Wall Street Journal "[A] one-in-a-billion story . . . designed to wrench from self-respecting critics all the blurby adjectives we normally try to avoid: It is amazing, unforgettable, gripping, harrowing, chilling, and inspiring."—New York "Staggering . . . mesmerizing . . . Hillenbrand's writing is so ferociously cinematic, the events she describes so incredible, you don't dare take your eyes off the page."—People "A meticulous, soaring and beautifully written account of an extraordinary life."—The Washington Post "Ambitious and powerful . . . a startling narrative and an inspirational book."—The New York Times Book Review "Magnificent . . . incredible . . . [Hillenbrand] has crafted another masterful blend of sports, history and overcoming terrific odds; this is biography taken to the nth degree, a chronicle of a remarkable life lived through extraordinary times."—The Dallas Morning News "An astonishing testament to the superhuman power of tenacity."—Entertainment Weekly "A tale of triumph and redemption . . . astonishingly detailed."—O: The Oprah Magazine "[A] masterfully told true story . . . nothing less than a marvel."—Washingtonian "[Hillenbrand tells this] story with cool elegance but at a thrilling sprinter's pace."—Time "Hillenbrand [is] one of our best writers of narrative history. You don't have to be a sports fan or a war-history buff to devour this book—you just have to love great storytelling."—Rebecca Skloot, author of The Immortal Life of Henrietta Lacks

air force bullet writing: Strengthening Forensic Science in the United States National Research Council, Division on Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Policy and Global Affairs, Committee on Science, Technology, and Law, Committee on Identifying the Needs of the Forensic Sciences Community, 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement

officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

air force bullet writing: Whither Space Power? Simon P. Worden, John E. Shaw, 2005-01-01 The influence of space power pervades almost every sphere and level of human existence, from politics to military affairs to commercial activities to cultural mind-sets. Yet there is little to be found today in the way of coherent space power doctrine and strategy, particularly in national security circles. To what extent do our national interests rely on space? How shall we defend our interests in space and how shall we deny our adversaries the benefits of space power in time of conflict? How can we control and exploit the space environment? How can we effectively wield space power against the full spectrum of threats -- from the lone terrorist to global peer competitors? What should be our long-range strategy and objectives if our goal is to achieve and maintain long-term space superiority? The purpose of this paper is two fold: first, to illuminate the historical and ever-increasing importance of space in modern society; and second, to prescribe, in view of this importance, the foundations of a strategy for achieving lasting space superiority and ensuring national and world security.

air force bullet writing: Commanding an Air Force Squadron in the Twenty-first Century Jeffry F. Smith, 2003 Jeffry Smith updates the earlier release of Col Timothy T. Timmon's *Commanding an Air Force Squadron* (1993). In this book, which includes a foreword by Gen John P. Jumper and an introduction by Colonel Timmons, USAF, retired, Colonel Smith relies on the vast insights, experiences, and recommendations of former and current commanders to identify the attributes of a successful commander at multiple levels. He identifies some issues commanders face regardless of the level of command, including counseling personnel, dorm inspections, commanders' calls, money management, and the roles of spouses and families. According to Colonel Smith, the conduct of individuals in times of crises is the truest barometer of a good commander.--Publisher website.

air force bullet writing: Countdown to Pearl Harbor Steve Twomey, 2017-11-21 A Pulitzer Prize-winning reporter chronicles the 12 days leading up to the Japanese attack on Pearl Harbor, examining the miscommunications, clues, missteps and racist assumptions that may have been behind America's failure to safeguard against the tragedy, --NoveList.

air force bullet writing: Ideas, Concepts, Doctrine Robert Frank Futrell, 1989 In this first of a two-volume study, Dr. Futrell presents a chronological survey of the development of Air Force doctrine and thinking from the beginnings of powered flight to the onset of the space age. He outlines the struggle of early aviation enthusiasts to gain acceptance of the airplane as a weapon and win combat-arm status for the Army Air Service (later the Army Air Corps and Army Air Force). He surveys the development of airpower doctrine during the 1930s and World War II and outlines the emergence of the autonomous US Air Force in the postwar period. Futrell brings this first volume to a close with discussions of the changes in Air Force thinking and doctrine necessitated by the emergence of the intercontinental missile, the beginnings of space exploration and weapon systems, and the growing threat of limited conflicts resulting from the Communist challenge of wars of liberation. In volume two, the author traces the new directions that Air Force strategy, policies, and thinking took during the Kennedy administration, the Vietnam War, and the post-Vietnam period. Futrell outlines how the Air Force struggled with President Kennedy's redefinition of national security policy and Robert S. McNamara's managerial style as secretary of defense. He describes how the Air Force argued that airpower should be used during the war in Southeast Asia. He chronicles the evolution of doctrine and organization regarding strategic, tactical, and airlift capabilities and the impact that the aerospace environment and technology had on Air Force

thinking and doctrine.

air force bullet writing: The Things They Carried Tim O'Brien, 2009-10-13 A classic work of American literature that has not stopped changing minds and lives since it burst onto the literary scene, *The Things They Carried* is a ground-breaking meditation on war, memory, imagination, and the redemptive power of storytelling. *The Things They Carried* depicts the men of Alpha Company: Jimmy Cross, Henry Dobbins, Rat Kiley, Mitchell Sanders, Norman Bowker, Kiowa, and the character Tim O'Brien, who has survived his tour in Vietnam to become a father and writer at the age of forty-three. Taught everywhere—from high school classrooms to graduate seminars in creative writing—it has become required reading for any American and continues to challenge readers in their perceptions of fact and fiction, war and peace, courage and fear and longing. *The Things They Carried* won France's prestigious Prix du Meilleur Livre Etranger and the Chicago Tribune Heartland Prize; it was also a finalist for the Pulitzer Prize and the National Book Critics Circle Award.

air force bullet writing: Save the Last Bullet for Yourself Rob Krott, 2008 Chronicles the role of private soldiering in Bosnia, Croatia and Somalia.

air force bullet writing: The Paths of Heaven The Evolution of Airpower Theory , 1997 Airpower is not widely understood. Even though it has come to play an increasingly important role in both peace and war, the basic concepts that define and govern airpower remain obscure to many people, even to professional military officers. This fact is largely due to fundamental differences of opinion as to whether or not the aircraft has altered the strategies of war or merely its tactics. If the former, then one can see airpower as a revolutionary leap along the continuum of war; but if the latter, then airpower is simply another weapon that joins the arsenal along with the rifle, machine gun, tank, submarine, and radio. This book implicitly assumes that airpower has brought about a revolution in war. It has altered virtually all aspects of war: how it is fought, by whom, against whom, and with what weapons. Flowing from those factors have been changes in training, organization, administration, command and control, and doctrine. War has been fundamentally transformed by the advent of the airplane.

air force bullet writing: *Bullet Catcher* Joaquin Lowe, 2016-02-04 A coming-of-age tale reimagined as a searing Western epic. In the small town of Sand, populated by gunslingers and surrounded by endless desert, Imma washes dishes and grieves for a life she never had. She and her brother, Nikko, dreamed of escaping to become bullet catchers, a legendary band of outlaws who can deflect bullets with their hands. But they were wiped out years ago, Nikko with them. And leaving is impossible when walking into the desert means certain death. When she sees a stranger catch a man's bullet and turn it back on him, Imma knows it can only mean one thing: the bullet catchers live on, and this is her way out. Determined to follow him, Imma starts a journey that will take her to her physical extremes and force her to question just what family means and who she really is: bullet catcher or gunslinger; hero or monster.

air force bullet writing: Leadership from 30,000 Feet: Attributes of Effective Leaders as Told by Five Air Force Generals Tom Jones, James J. Jones, Rob Polumbo, 2019-03-23 Do you have what it takes to be a leader others are willing to follow? Five Air Force general officers, each with decades of global, high-level leadership experience, offer their insight into the five characteristics every effective leader must possess. By offering their own stories and profiling men and women they've led and who have led them, these five generals showcase leadership in action. The stories within place you at 30,000 feet, from being forced to eject from an F-16 to witnessing the harrowing landing of a badly damaged U-2 flown by a badly injured pilot. They'll also place you on the ground in the midst of combat, with warning sirens blaring as an Iraqi missile rapidly descends onto a base where significant leadership decisions are being made. And they'll offer you a unique glimpse of the high-quality men and women of the United States Air Force. In all respects, *Leadership from 30,000 Feet* will challenge you to become a better leader today.

air force bullet writing: Command in Air War Michael W. Kometer, 2010-07-01 This work

examines whether centralized control and decentralized execution is a valid doctrinal tenet, given the technological advances in the information age. Fascinating scenarios from recent operations, set in the context of a complex air operations system, show the dilemmas presented by participants' increased access to information-and the resulting consequences of their decisions. With the uncertainty of war and the blending of diverse organizations, the author illustrates that commanders must balance empowerment with accountability by developing depth in command relationships among their subordinates. Originally published in 2007.

air force bullet writing: Fini Flight C W Lemoine, 2019-05-18 It's been said that the two worst days in a fighter pilot's career are the day he steps to the jet knowing it's his last flight and the day he steps to the jet not knowing it's his last. After years of serving his country in both the military and a covert paramilitary organization known as PROJECT ARCHANGEL, Cal Spectre Martin has retired to the quiet life with his wife and son. As Spectre settles in to his new life as a stay-at-home dad and aspiring fiction writer, a face from the past pays him a visit hoping to get Spectre's help one last time. With denuclearization and peace talks underway between the United States and North Korea, a high level general within the North Korean regime has other plans. Intelligence sources have confirmed that the general intends to launch an Electro Magnetic Pulse weapon and detonate it over the United States, setting in motion a third world war. Covert operative Freddie Kruger Mack's request is simple - select and train the pilots that will fly the mission deep into North Korea to stand down the looming threat. But as Spectre reluctantly agrees to help and the mission gets underway, he soon realizes that one way or another, he may be stepping to a jet for his last time. With the stakes higher than they've ever been, Spectre and his team must overcome interference from foreign agents while planning and training for a suicide mission into North Korea.

air force bullet writing: The Use of Force in UN Peace Operations Trevor Findlay, Stockholm International Peace Research Institute, 2002 One of the most vexing issues that has faced the international community since the end of the Cold War has been the use of force by the United Nations peacekeeping forces. UN intervention in civil wars, as in Somalia, Bosnia and Herzegovina, and Rwanda, has thrown into stark relief the difficulty of peacekeepers operating in situations where consent to their presence and activities is fragile or incomplete and where there is little peace to keep. Complex questions arise in these circumstances. When and how should peacekeepers use force to protect themselves, to protect their mission, or, most troublingly, to ensure compliance by recalcitrant parties with peace accords? Is a peace enforcement role for peacekeepers possible or is this simply war by another name? Is there a grey zone between peacekeeping and peace enforcement? Trevor Findlay reveals the history of the use of force by UN peacekeepers from Sinai in the 1950s to Haiti in the 1990s. He untangles the arguments about the use of force in peace operations and sets these within the broader context of military doctrine and practice. Drawing on these insights the author examines proposals for future conduct of UN operations, including the formulation of UN peacekeeping doctrine and the establishment of a UN rapid reaction force.
