air force rotc interview questions: Commanding an Air Force Squadron Col Usaf

Timmons, Timothy, Timothy T. Timmons, 2012-08-07 The privilege of commanding an Air Force squadron, despite its heavy responsibilities and unrelenting challenges, represents for many Air Force officers the high point of their careers. It is service as a squadron commander that accords true command authority for the first time. The authority, used consistently and wisely, provides a foundation for command. As with the officer's commission itself, command authority is granted to those who have earned it, both by performance and a revealed capacity for the demands of total responsibility. But once granted, it much be revalidated every day. So as one assumes squadron command, bringing years of experience and proven record to join with this new authority, one might still need a little practical help to success with the tasks of command. This book offers such help. "Commanding an Air Force Squadron" brings unique and welcome material to a subject other books have addressed. It is rich in practical, useful, down-to-earth advice from officers who have recently experienced squadron command. The author does not quote regulations, parrot doctrine, or paraphrase the abstractions that lace the pages of so many books about leadership. Nor does he puff throughout the manuscript about how he did it. Rather, he presents a digest of practical wisdom based on real-world experience drawn from the reflection of many former commanders from any different types of units. He addresses all Air Force squadron commanders, rated and nonrated, in all sorts of missions worldwide. Please also see a follow up to this book entitled "Commanding an Air Force Squadron in the Twenty-First Century (2003)" by Jeffrey F. Smith, Lieutenant Colonel, USAF.

air force rotc interview questions: Beyond the Call Eileen Rivers, 2018-11-06

A riveting account of three women who fought shoulder-to-shoulder with men and worked with local women to restore their lives and push back the Taliban They marched under the heat with 40-pound rucksacks on their backs. They fired weapons out of the windows of military vehicles, defending their units in deadly battles. And they did things that their male counterparts could never do--gather intelligence on the Taliban from the women of Afghanistan. As females they could circumvent Muslim traditions and cultivate relationships with Afghan women who were bound by tradition not to speak with

American military men. And their work in local villages helped empower Afghan women, providing them with the education and financial tools necessary to rebuild their nation--and the courage to push back against the insurgency that wanted to destroy it. For the women warriors of the military's Female Engagement Teams (FET) it was dangerous, courageous, and sometimes heartbreaking work. Beyond the Call follows the groundbreaking journeys of three women as they first fight military brass and culture and then enemy fire and tradition. And like the men with whom they served, their battles were not over when they returned home.

air force rotc interview questions: Sierra Hotel : flying Air Force fighters in the decade after Vietnam , 2001 In February 1999, only a few weeks before the U.S. Air Force spearheaded NATO's Allied Force air campaign against Serbia, Col. C.R. Anderegg, USAF (Ret.), visited the commander of the U.S. Air Forces in Europe. Colonel Anderegg had known Gen. John Jumper since they had served together as jet forward air controllers in Southeast Asia nearly thirty years earlier. From the vantage point of 1999, they looked back to the day in February 1970, when they first controlled a laser-guided bomb strike. In this book Anderegg takes us from glimmers of hope like that one through other major improvements in the Air Force that came between the Vietnam War and the Gulf War. Always central in Anderegg's account of those changes are the people who made them. This is a very personal book by an officer who participated in the transformation he describes so vividly. Much of his story revolves around the Fighter Weapons School at Nellis Air Force Base (AFB), Nevada, where he served two tours as an instructor pilot specializing in guided munitions.

Eileen Collins was an aviation pioneer her entire career, from her crowning achievements as the first woman to command an American space mission as well as the first to pilot the space shuttle to her early years as one of the Air Force's first female pilots. She was in the first class of women to earn pilot's wings at Vance Air Force Base and was their first female instructor pilot. She was only the second woman pilot admitted to the Air Force's elite Test Pilot Program at Edwards Air Force Base. NASA had such confidence in her skills as a leader and pilot that she was entrusted to command the first shuttle mission after the Columbia disaster, returning the US to spaceflight after a two-year hiatus. Since retiring from the Air Force and NASA,

she has served on numerous corporate boards and is an inspirational speaker about space exploration and leadership. Eileen Collins is among the most recognized and admired women in the world, yet this is the first time she has told her story in a book. It is a story not only of achievement and overcoming obstacles but of profound personal transformation. The shy, quiet child of an alcoholic father and struggling single mother, who grew up in modest circumstances and was an unremarkable student, she had few prospects when she graduated from high school, but she changed her life to pursue her secret dream of becoming an astronaut. She shares her leadership and life lessons throughout the book with the aim of inspiring and passing on her legacy to a new generation.

air force rotc interview questions: Our Time Josh Seefried, 2012-08-28 Our Time marks the end of more than a decade of silence, giving voice to the LGBT men and women who served under "Don't Ask, Don't Tell." These individuals enlisted knowing that the military would ask them to bury an integral part of themselves and yet joined because of their deep belief that the values of the military were worth the tremendous sacrifice. Our Time shares their stories for the first time, revealing an intimate portrait of military life. Edited by air force officer Josh Seefried, a cofounder of the LGBT active duty military association OutServe, Our Time is a collection of remarkable depth and diversity. We witness the abuse—physical and mental—endured at the hands of fellow soldiers and superiors. We see the hardships faced by their families and partners and feel the pain of the choice between military and self. There are also examples of humanity at its very best: leaders with the courage to support their comrades in the face of tremendous pressure, friendships forged and minds opened, and love that endures the very toughest of odds. Throughout we are reminded of the bravery and selflessness of the men and women who chose to serve our country and defend our liberties while their own freedom was withheld. At once a testament to the wrongs of the policy and a celebration of the good that endured in spite of it, Our Time marks the start of a new era in our national history

air force rotc interview questions: Bring Out the Dog Will Mackin, 2020-01-07 "A near-miraculous, brilliant debut."—George Saunders, Man Booker Prize-winning author of *Lincoln in the Bardo* "In one exquisitely crafted story after the next, Will Mackin maps the surreal psychological terrain of soldiers in a perpetual war."—Phil Klay, National Book Award-winning author of *Redeployment* WINNER OF THE PEN/ROBERT W. BINGHAM PRIZE FOR DEBUT SHORT STORY COLLECTION The eleven stories in Will Mackin's mesmerizing debut collection draw from his many deployments with a special operations task force in Iraq and Afghanistan. They began as notes he jotted on the inside of his forearm in grease pencil and, later, as bullet points on the torn-off flap of an MRE kit. Whenever possible he incorporated those notes into his journals. Years later, he used those journals to write this book. Together, the stories in *Bring Out the Dog* offer a remarkable portrait of the absurdity and poetry that define life in the most elite, clandestine circles of modern warfare. It is a world of intense bonds, ancient credos, and surprising compassion—of success, failure, and their elusive definitions. Moving between settings at home and abroad, in vivid language that reflects the wonder and discontent of war, Mackin draws the reader into a series of surreal, unsettling, and deeply human episodes: In "Crossing the River No Name," a close call suggests that miracles do exist, even if they are in brutally short supply; in "Great Circle Route Westward Through Perpetual Night," the death of the team's beloved dog plunges them into a different kind of grief; in "Kattekoppen," a man struggles to reconcile his commitments as a father and his commitments as a soldier; and in "Baker's Strong Point," a man whose job it is to pull things together struggles with a loss of control. Told without a trace of false bravado and with a keen,

Barry Hannah-like sense of the absurd, *Bring Out the Dog* manages to capture the tragedy and heroism, the degradation and exultation, in the smallest details of war. Praise for *Bring Out the Dog* "Cuts through all the shiny and hyped-up rhetoric of wartime, and aggressively and masterfully draws a picture of the brutal, frightening, and even boring moments of deployment. . . . The Things They Carried, Redeployment, and now *Bring Out the Dog*: war stories for your bookshelf that will last a very long time, and serve as reminders of what America was, is, and can still become."—Chicago Review of Books

air force rotc interview questions: Viper Pilot (Enhanced Edition) Dan Hampton, 2012-10-02 Get inside the cockpit with Dan Hampton, the military's most decorated F-16 pilot, in this enhanced e-book edition of *Viper Pilot*. Exclusive to this edition are 11 video interviews, where Hampton talks candidly about his time as a Wild Weasel and about the fighter jet that kept him alive through so many dangerous skirmishes. In addition, an interactive "first-person" cockpit diagram lets you get deeper into the action, providing a visual companion to the book that leaves you feeling like you're sitting in the iconic F-16 itself. 151 combat missions 21 hard kills on surface-to-air-missile sites 4 Distinguished Flying Crosses with Valor 1 Purple Heart Sure to rank as one of the greatest aviation memoirs ever written, *Viper Pilot* is an Air Force legend's thrilling eyewitness account of modern air warfare. From 1986 to 2006, Lt. Col. Dan Hampton was a leading member of the Wild Weasels, the elite Air Force fighter squadrons whose mission is recognized as the most dangerous job in modern air combat. Weasels are the first planes sent into a war zone, flying deep behind enemy lines purposely seeking to draw fire from surface-to-air missiles and artillery. They must skillfully evade being shot down—and then return to destroy the threats, thereby making the skies safe for everyone else to follow. Today these vital missions are more hazardous than direct air-to-air engagement with enemy aircraft. Hampton's record number of strikes on high-value targets make him the most lethal F-16 Wild Weasel pilot in American history. This is his remarkable story. Taught to fly at an early age by his father, Hampton logged twenty years and 608 combat hours in the world's most iconic fighter jet: the F-16 Fighting Falcon, or *Viper* as its pilots call it. Hampton spearheaded the 2003 invasion of Iraq, leading the first flight of fighters over the border en route to strike Baghdad. In the war that followed, he engaged in a series of brilliantly executed missions that earned him three Distinguished Flying Crosses with Valor; he notably saved a U.S. Marine unit from certain death by taking out the surrounding enemy forces near Nasiriyah. Two years earlier, on 9/11, Hampton's father was inside the Pentagon when it was attacked; with his dad's fate unknown, Hampton was scrambled into American skies and given the unprecedented orders to shoot down any unidentified aircraft. Hampton also flew critical missions in the first Gulf War, served on the Air Combat Command staff during the Kosovo War, and was injured in the 1996 Khobar Towers terrorist attack. With manned missions rapidly giving way to remote-controlled UAV drones, *Viper Pilot* may be the last memoir by a true hero of the skies. Gripping and irreverently humorous, it is an unforgettable look into the closed world of fighter pilots and modern air combat. Please note that due to the large file size of these special features this enhanced e-book may take longer to download than a standard e-book.

air force rotc interview questions: Regrets, None Dolly Thakore, 2021-09-05 Written with wit, humour and candour, *Regrets, None* is a rare memoir that is unafraid to bare it all. It follows veteran theatre personality Dolly Thakore's life and career -- growing up in Delhi and an assortment of Air Force stations, getting her start in theatre in college, her time in London, involvement with social issues, casting for Gandhi and filming it across India, working in radio, television and advertising while returning always to her first love, theatre. Dolly Thakore brings alive another era -- the glitz, the glamour, the struggles. She speaks candidly about love, sex, infidelity, motherhood, commitment, the ecstasy and the heartbreaks. She emerges as a true-blooded embodiment of what it means to be a strong, empowered, vulnerable, courageous (and sometimes outrageous) woman.

air force rotc interview questions: Risk General Stanley McChrystal, Anna Butrico, 2021-10-05 From the bestselling author of *Team of Teams* and *My Share of the Task*, an entirely new

way to understand risk and master the unknown. Retired four-star general Stan McChrystal has lived a life associated with the deadly risks of combat. From his first day at West Point, to his years in Afghanistan, to his efforts helping business leaders navigate a global pandemic, McChrystal has seen how individuals and organizations fail to mitigate risk. Why? Because they focus on the probability of something happening instead of the interface by which it can be managed. In this new book, General McChrystal offers a battle-tested system for detecting and responding to risk. Instead of defining risk as a force to predict, McChrystal and coauthor Anna Butrico show that there are in fact ten dimensions of control we can adjust at any given time. By closely monitoring these controls, we can maintain a healthy Risk Immune System that allows us to effectively anticipate, identify, analyze, and act upon the ever-present possibility that things will not go as planned. Drawing on examples ranging from military history to the business world, and offering practical exercises to improve preparedness, McChrystal illustrates how these ten factors are always in effect, and how by considering them, individuals and organizations can exert mastery over every conceivable sort of risk that they might face. We may not be able to see the future, but with McChrystal's hard-won guidance, we can improve our resistance and build a strong defense against what we know—and what we don't.
