alabama am financial aid number: *Union Renegades* Dana M. Caldemeyer, 2021-01-11 In the late nineteenth century, Midwestern miners often had to decide if joining a union was in their interest. Arguing that these workers were neither pro-union nor anti-union, Dana M. Caldemeyer shows that they acted according to what they believed would benefit them and their families. As corporations moved to control coal markets and unions sought to centralize their organizations to check corporate control, workers were often caught between these institutions and sided with whichever one offered the best advantage in the moment. Workers chased profits while paying union dues, rejected national unions while forming local orders, and broke strikes while claiming to be union members. This pragmatic form of unionism differed from what union leaders expected of rank-and-file members, but for many workers the choice to follow or reject union orders was a path to better pay, stability, and independence in an otherwise unstable age. Nuanced and eye-opening, *Union Renegades* challenges popular notions of workers attitudes during the Gilded Age.

alabama am financial aid number: *The State Must Provide* Adam Harris, 2021-08-10 "A book that both taught me so much and also kept me on the edge of my seat. It is an invaluable text from a supremely talented writer." —Clint Smith, author of *How the Word is Passed* The definitive history of the pervasiveness of racial inequality in American higher education America's colleges and

universities have a shameful secret: they have never given Black people a fair chance to succeed. From its inception, our higher education system was not built on equality or accessibility, but on educating—and prioritizing—white students. Black students have always been an afterthought. While governments and private donors funnel money into majority white schools, historically Black colleges and universities (HBCUs), and other institutions that have high enrollments of Black students, are struggling to survive, with state legislatures siphoning away federal funds that are legally owed to these schools. In *The State Must Provide*, Adam Harris reckons with the history of a higher education system that has systematically excluded Black people from its benefits. Harris weaves through the legal, social, and political obstacles erected to block equitable education in the United States, studying the Black Americans who fought their way to an education, pivotal Supreme Court cases like *Plessy v. Ferguson* and *Brown v. Board of Education*, and the government's role in creating and upholding a segregated education system. He explores the role that Civil War-era legislation intended to bring agricultural education to the masses had in creating the HBCUs that have played such a major part in educating Black students when other state and private institutions refused to accept them. *The State Must Provide* is the definitive chronicle of higher education's failed attempts at equality and the long road still in front of us to remedy centuries of racial discrimination—and poses a daring solution to help solve the underfunding of HBCUs. Told through a vivid cast of characters, *The State Must Provide* examines what happened before and after schools were supposedly integrated in the twentieth century, and why higher education remains broken to this day.

alabama am financial aid number: The Founding of Alabama Frances Cabaniss Roberts, 2020-01-07 The most thorough history of Alabama's Madison County region, widely available for the first time The 1956 dissertation by Frances Cabaniss Roberts is a classic text on Alabama history that continues to be cited by southern historians. Roberts was the first woman to earn a PhD from the University of Alabama's history department. In the 1950s, she was the only full-time faculty member at what is now the University of Alabama in Huntsville, where she was appointed chair of the history department in 1966. Roberts's dissertation, "Background and Formative Period in the Great Bend and Madison County," remains the most thorough history of the region yet produced. While certainly a product of its era, Roberts work is visionary in its own way and offers a useful look at Alabama's rise to statehood. Thomas Reidy, editor of this edition, has kept Roberts's words intact except for correction of minor typographical errors and helpful additions to the notes and citations. His introduction describes both the value of Roberts's decades of service to UAH and the importance of her dissertation over time. While highlighting the great intrinsic value of Roberts's research and writing, Reidy also notes its significance in demonstrating how the practice of history—its methods, priorities, and values—has evolved over the intervening decades. In her examination of Madison County, Roberts spotlights exemplars of civic performance and good community behavior, giving readers one of the earliest accountings of the antebellum southern middle class. Unlike many historians of her time, Roberts displays an interest in both the "common folks" and leaders who built the region—rural and urban—and created the institutions that shaped Madison County. She examines the contributions of merchants, shopkeepers, lawyers, doctors, architects, craftsmen, planters, farmers, elected and appointed officials, board members, and entrepreneurs.
