albany state university financial aid: Unreconciled Arthur N. Dunning, 2021-06 How do well-meaning people help a community move beyond its past when confronted by those who hold ingrained stereotypes, profit from maintaining the status quo, or are filled with antipathy toward others? This book tells the story of how a Black university president tried to do just that when he led the first non-court ordered merger of an historically Black university with an historically white two-year college in Albany, Georgia. Arthur "Art" N. Dunning came of age in the Black Belt of Alabama during the Jim Crow era. Among many pivotal experiences, he was part of a group of student athletes who helped to integrate Bear Bryant's University of Alabama football team in 1967. The values instilled in him by his family and those in his close-knit community, together with life experiences through education and from living, working, and traveling abroad over more than forty years as an educator, shaped his approach to leading Albany State University, an HBCU, through its 2016 merger with all-white Darton State College. The community's reaction to the merger proved to be an extreme example of what our nation is experiencing today. The perceived threat of embracing change while racially integrating two institutions brought out painful stereotypes, racial orthodoxy, tribalism, suspicion, and conspiracy theories. It peeled away a veneer of racial harmony and exposed

unhealthy patterns of behavior and entrenched beliefs held by community members of both races. Dunning shares here the hard but valuable leadership lessons learned when his race and his personal southern history intersected with a university and city that were abruptly forced to acknowledge their own history—and were challenged to envision a different future.

albany state university financial aid: The State of College Access and Completion Laura W. Perna, Anthony Jones, 2013-07-18 Despite decades of substantial investments by the federal government, state governments, colleges and universities, and private foundations, students from low-income families as well as racial and ethnic minority groups continue to have substantially lower levels of postsecondary educational attainment than individuals from other groups. The State of College Access and Completion draws together leading researchers nationwide to summarize the state of college access and success and to provide recommendations for how institutional leaders and policymakers can effectively improve the entire spectrum of college access and completion. albany state university financial aid: Economic Challenges in Higher Education Charles T. Clotfelter, Ronald G. Ehrenberg, Malcolm Getz, John J. Siegfried, 2008-04-15 The last two decades have been a turbulent period for American higher education, with profound demographic shifts, gyrating salaries, and marked changes in the economy. While enrollments rose about 50% in that

period, sharp increases in tuition and fees at colleges and universities provoke accusations of inefficiency, even outright institutional greed and irresponsibility. As the 1990s progress, surpluses in the academic labor supply may give way to shortages in many fields, but will there be enough new Ph.D.'s to go around? Drawing on the authors' experience as economists and educators, this book offers an accessible analysis of three crucial economic issues: the growth and composition of undergraduate enrollments, the supply of faculty in the academic labor market, and the cost of operating colleges and universities. The study provides valuable insights for administrators and scholars of education.

albany state university financial aid: Higher Education in the United States [2 volumes]

James J. F. Forest, Kevin Kinser, 2002-06-21 Surveys the changing landscape of American higher education, from academic freedom to virtual universities, from campus crime to Pell Grants, from the Student Privacy Act to student diversity. In the years following World War II, college and university enrollment doubled, students revolted, faculty unionized, and community colleges evolved. Tuition and technology soared, as did the number of first-generation, minority, and women students. These changes radically transformed the American system of postsecondary education. Today, that system is in trouble. Its aging professoriate prepares for retirement, but low academic salaries can no longer attract the best minds to replace them. A flood of corporate dollars funds commercial research, but money for basic research—the seedbed of American scientific preeminence—has dried up. Colleges and universities also face heated competition with for-profit education providers for students, faculty, and external financial support, along with the costs of providing remedial education to growing numbers of students who are unprepared for postsecondary education. Higher Education in the United States provides a comprehensive analysis of these issues and others that scholars and practitioners of higher education study, discuss, and grapple with on a daily basis.

albany state university financial aid: Latinos in Higher Education: Creating Conditions for Student Success Anne-Marie Nuñez, Richard E Hoover, Kellie Pickett, A. Christine Stuart-Carruthers, Maria Vazquez, 2013-04-23 Latinos' postsecondary educational attainment has not kept pace with their growing representation in the U.S. population. How can Latino educational attainment be advanced? This monograph presents relevant contemporary research, focusing on the role of institutional contexts. Drawing particularly on research grounded in Latino students' perspectives, it identifies key challenges Latino students face and discuss various approaches to address these challenges. Because so many Latino students are enrolled in federally designated Hispanic-Serving Institutions (HSIs), it also specifically explores HSIs' role in promoting Latinos' higher education access and equity. As a conclusion, it offers recommendations for institutional, state, and federal policies that can foster supportive contexts. This is Volume 39 Issue 1 of the Jossey-Bass publication ASHE Higher Education Report. Each monograph in the series is the definitive analysis of a tough higher education problem, based on thorough research of pertinent literature and institutional experiences. Topics are identified by a national survey. Noted practitioners and scholars are then commissioned to write the reports, with experts providing critical reviews of each manuscript before publication.
