The history of Albany State University is intrinsically linked to the struggle for educational access for African Americans in the segregated South. Founded in 1903 as the Albany Normal and Industrial School for Colored Persons, Albany State University history began humbly. Its establishment represented a monumental effort by the local Black community and visionary leaders to provide educational opportunities denied by systemic racism. The early years were characterized by limited resources, inadequate facilities, and the constant battle against discriminatory practices prevalent in Georgia. This period in

Albany State University history underscores the resilience and determination that defined the institution's early development. albany state university history: Albany State University Titus Brown, 2003-07-01 Albany State University, located in southwest Georgia on the banks of the Flint River, is a four-year unit of the University System of Georgia with five academic schools and degree programs in more than 40 areas of study. Founded in 1903 as the Albany Bible and Manual Training Institute by Joseph Winthrop Holley, the institution-patterned after Booker T. Washington's Tuskegee Institute-provided industrial, normal, and religious education for African Americans. In 1917, it became a state-supported, two-year college (Georgia Normal and Agricultural College), and in 1932 entered the University System of Georgia. In 1943 it became a four-year institution (Albany State College) and experienced tremendous growth from 1943 to 1996, when the name was changed to Albany State University. Within these pages are some 200 photographs depicting the growth initiated by Dr. Joseph Winthrop Holley and continued through the leadership of five dynamic presidents: Dr. Aaron Brown (1943-1954); Dr. William H. Dennis (1954-1965); Dr. Thomas M. Jenkins (1965-1969); Dr. Charles L. Hayes (1969-1980); and Dr. Billy C. Black (1980-1996). Current president Dr. Portia Holmes Shields began a major renovation program for ASU-complete with new buildings and state-of-the art technology-after the devastating floods of 1994 and 1998. Poised for continued growth in the 21st century, the historic institution and its rich history are celebrated in this engaging volume of images.

albany state university history: Social Studies in Schools David Warren Saxe, 1991-12-27 This supplemental text is an historical account of the beginning years of the social studies. Using the 1916 Social Studies report as a base, the book outlines the issues, contexts, and individuals that were influential in the genesis of the seminal social studies prototype program. The author explains that many of our present interests such as critical thinking, decision making, inquiry, reflective thinking, foundational studies, and cultural literacy can be found within the texts of the 1916 social studies program. Saxe also shows that the roots of the social studies program are found in the social sciences and not the traditional history curriculum. Included are chronological time lines that serve to illustrate the growth of the social studies, as well as an extensive bibliography of the primary foundational works of the social studies, including the 1916 report. These materials greatly enhance the value of Saxe's work for social studies educators and students.

albany state university history: Interactions with a Violent Past Sina Emde, Markus Schlecker, Elaine Russell, Christina Schwenkel, Susan Hammond, Krisna Uk, Ian G. Baird, 2013-07-01 The Second and Third Indochina Wars are the subject of important ongoing scholarship, but there has been little research on the lasting impact of wartime violence on local societies and populations, in Vietnam as well as in Laos and Cambodia. Today's Lao, Vietnamese and Cambodian landscapes bear the imprint of competing violent ideologies and their perilous material manifestations. From battlefields and massively bombed terrain to reeducation camps and resettled villages, the past lingers on in the physical environment. The nine essays in this volume discuss post-conflict landscapes as contested spaces imbued with memory-work conveying differing interpretations of the recent past, expressed through material (even, monumental) objects, ritual performances, and oral narratives (or silences). While Cambodian, Lao and Vietnamese landscapes are filled with tenacious traces of a violent past, creating an unsolicited and malevolent sense of place among their inhabitants, they can in turn be transformed by actions of resilient and resourceful local communities.

albany state university history: Between History and Philosophy Paul van Els, Sarah A. Queen, 2017-08-21 Between History and Philosophy is the first book-length study in English to focus on the rhetorical functions and forms of anecdotal narratives in early China. Edited by Paul van Els and Sarah A. Queen, this volume advances the thesis that anecdotes—brief, freestanding accounts of single events involving historical figures, and occasionally also unnamed persons, animals, objects, or abstractions—served as an essential tool of persuasion and meaning-making within larger texts. Contributors to the volume analyze the use of anecdotes from the Warring States Period to the Han Dynasty, including their relations to other types of narrative, their circulation and reception, and their central position as a mode of argumentation in a variety of historical and philosophical literary genres.

albany state university history: The History of Here Akum Norder, 2017-12-04 When you buy an old house, you get much more than a house. In all its quirks, its alterations, in fragments of memory and traces left behind, you get a bundle of small mysteries. Who used to live here? Why did they come here, and where did they go? Whose name is that written on the attic wall? When did that odd little bathroom get shoehorned in there, and what did the room look like before? If you're lucky, one or two of your house's mysteries might unfold into stories. Akum Norder was very lucky. The History of Here follows Albany, New York's, Pine Hills neighborhood through more than one hundred years of change. At its heart is the story of Norder's 1912 house and the people who built and lived in it. As Norder traced their histories, she came to see the development of her house, her street, and her neighborhood as a piece of Albany's story. In the lives of its residents, their struggles and triumphs, she saw a reflection of twentieth-century America. Drawing on interviews, city records, newspapers, out-of-print books, and other sources, Norder's narrative makes a case for city neighborhoods: their value, their preservation, and the grassroots involvement that turns a jumble of houses into a community. Funny and thought-provoking, readable and relevant, The History of Here celebrates the sense of place that fuels the new urbanism.

thought and practice during the period of the French women's movement or Mouvement de Libération des Femmes (1970-81). It considers women's art in relation to some of the most exciting thinkers to have emerged from the French literature and philosophy of the 1970s - Hélène Cixous, Luce Irigaray and Julia Kristeva - forcing a timely reconsideration of the full spectrum of revolutionary practices by women in the years following the events of May '68. Lavishly illustrated with over 200 images, the book also features an illuminating foreword by art historian Griselda Pollock.

albany state university history: June Bug's Grocery and the Cornfield Jook Mary Sterner Lawson, 2003 The vibrant South Georgia scene was pure Americana-a picturesque, old-fashioned grocery store next to a thriving jook joint in the heart of a South Albany African-American community. Originally more secluded, this nucleus of the neighborhood became a familiar sight to all Albany residents with the opening in the 1980s of a roadway that passed by the scene and across a new bridge over the nearby Flint River. The waters of the Flint proved to be much too near in 1994, when a catastrophic flood damaged beyond repair the grocery, jook, and hundreds of homes along the river. Deeply touched by that enormous community loss, Mary Sterner Lawson used her own 1987 photographs to paint a watercolor of the once-flourishing South Albany scene. She never imagined how overwhelming the public response would be when the painting was exhibited in the main lobby of a busy local hospital in 1996. A veritable flood of reminiscences came her way-tales of childhood memories, community gatherings, friendships, brotherhood, families, prostitution, moonshine, and murder. Inspired by the community members who encouraged and aided her efforts, Lawson began recording the rich recollections. June Bug's Grocery and the Cornfield Jook registers these voices of the community, the voices behind the painting.

albany state university history: *The Political Discourse of Anarchy* Brian C. Schmidt, 2016-02-24 CHOICE 1998 Outstanding Academic Books This detailed disciplinary history of the field of international relations examines its early emergence in the mid-nineteenth century to the period beginning with the outbreak of World War II. It demonstrates that many of the commonly held assumptions about the field's early history are incorrect, such as the presumed dichotomy between idealist and realist periods. By showing how the concepts of sovereignty and anarchy have served as the core constituent principles throughout the history of the discipline, and how earlier discourse is relevant to the contemporary study of war and peace, international security, international organization, international governance, and international law, the book contributes significantly to current debates about the identity of the international relations field and political science more generally.

albany state university history: *Gordian Knot* Ryan M. Irwin, 2012-09-07 Writing more than one hundred years ago, African American scholar W.E.B. Du Bois speculated that the great dilemma of the twentieth century would be the problem of the color line. Nowhere was the dilemma of racial discrimination more entrenched-and more complex-than South Africa. Gordian Knot examines South Africa's freedom struggle in the years surrounding African decolonization, using the global apartheid debate to explore the way new nation-states changed the international community during the

mid-twentieth century. At the highpoint of decolonization, South Africa's problems shaped a transnational conversation about nationhood. Arguments about racial justice, which crested as Europe relinquished imperial control of Africa and the Caribbean, elided a deeper contest over the meaning of sovereignty, territoriality, and development. Based on research in African, American, and European archives, *Gordian Knot* advances a bold new interpretation about African decolonization's relationship to American power. In so doing, it promises to shed light on U.S. foreign relations with the Third World and recast understandings of the fate of liberal internationalism after World War II.

albany state university history: Environmental History of the Hudson River Robert E. Henshaw, 2011-09-01 Winner of the 2012 Award for Excellence presented by the Greater Hudson Heritage Network The diverse contributions to Environmental History of the Hudson River examine how the natural and physical attributes of the river have influenced human settlement and uses, and how human occupation has, in turn, affected the ecology and environmental health of the river. The Hudson River Valley may be America's premier river environmental laboratory, and by bringing historians and social scientists together with biologists and other physical scientists, this book hopes to foster new ways of looking at and talking about this historically, commercially, and aesthetically important ecosystem. Native people's influences on the ecological integrity of aquatic and shoreline communities were generally local and minor, and for the first 12,000 years or so of human use, the Hudson River was valued mainly as a source of water, food, and transportation. Since the arrival of European colonists, however, commerce has been the engine that has driven development and use of the river, from the harvesting of beaver pelts and timber to the siting of manufacturing industries and power plants, and all of these uses have had pervasive effects on the river's aquatic and terrestrial ecosystems. In the meantime, aesthetic movements such as the Hudson River School of painting have sought to recover and preserve the earlier pastoral landscape, anticipating the more recent efforts by environmentalists that have led to dramatic improvements in water quality, shoreline habitats, and fish populations. Despite the pervasive forces of commerce, the Hudson River has retained its world-class scenic qualities. The Upper Hudson remains today a free-flowing, tumbling mountain stream, and the Lower Hudson a fjord penetrated and dominated by the Hudson Highlands. The Hudson's unique history continues to affect current uses and will surely influence the future in remarkable ways.

albany state university history: A History of Social Justice and Political Power in the Middle East Linda T. Darling, 2013-05-02 From ancient Mesopotamia into the 20th century, the Circle of Justice as a concept has pervaded Middle Eastern political thought and underpinned the exercise of power in the Middle East. The Circle of Justice depicts graphically how a government's justice toward the population generates political power, military strength, prosperity, and good administration. This book traces this set of relationships from its earliest appearance in the political writings of the Sumerians through four millennia of Middle Eastern culture. It explores how people conceptualized and acted upon this powerful insight, how they portrayed it in symbol, painting, and story, and how they transmitted it from one regime to the next. Moving towards the modern day, the author shows how, although the Circle of Justice was largely dropped from political discourse, it did not disappear from people's political culture and expectations of government. The book demonstrates the Circle's relevance to the Iranian Revolution and the rise of Islamist movements all over the Middle East, and suggests how the concept remains relevant in an age of capitalism. A must read for students, policymakers, and ordinary citizens, this book will be an important contribution to the areas of political history, political theory, Middle East studies and Orientalism.

albany state university history: *The Oxford Companion to the Supreme Court of the United States* Kermit L. Hall, 2005-05-19 The Supreme Court has continued to write constitutional history over the thirteen years since publication of the highly acclaimed first edition of *The Oxford Companion to the Supreme Court*. Two new justices have joined the high court, more than 800 cases have been decided, and a good deal of new scholarship has appeared on many of the topics treated in the Companion. Chief Justice William H. Rehnquist presided over the impeachment trial of President Bill Clinton, and the Court as a whole played a decisive and controversial role in the outcome of the 2000 presidential election. Under Rehnquist's leadership, a bare majority of the justices have rewritten significant areas of the law dealing with federalism, sovereign immunity, and the commerce power. This new edition includes new entries on key cases and fully updated treatment of crucial areas of constitutional law, such as abortion, freedom of religion, school desegregation, freedom of speech, voting rights, military tribunals, and the rights of the accused. These developments make the second edition of this accessible and authoritative guide essential for judges, lawyers, academics, journalists, and anyone interested in the impact of the Court's decisions on American society.

Wanger's compelling arguments against capital punishment is a large reason it is there. The forty pieces in this volume are writings created or used by the author, who penned the prohibition clause, during his fifty years as a death penalty abolitionist. His extraordinary background in forensics, law, and political activity as constitutional convention delegate and co-chairman of the Michigan Committee Against Capital Punishment has produced a remarkable collection. It is not only a fifty-year history of the anti-death penalty argument in America, it also is a detailed and challenging example of how the argument against capital punishment may be successfully made.

albany state university history: *You Can't Build a Chimney from the Top* Joseph Winthrop Holley, 1992 When this memoir first appeared in 1948, its author, Dr. Joseph Holley, was often cited for inappropriate accommodation to white supremacy policies. In actuality, as the editors point out in their new edition with a new introduction and foreword, this book is a minor classic serving as a record of the black conservative mind at that time. Dr. Holley's association and acquaintance with Frederick Douglass, W.E.B. DuBois and Booker T. Washington inspired and propelled him toward the foundation of an African-American college now called Albany State College in Georgia. This book synthesizes the philosophical and historical debate surrounding Washington's accommodationist argument versus DuBois' confrontational view, reaching conclusions of critical importance today to black/white relationships. First published in 1948 by the William Federal Press.

A list of the fifty most artistically successful campuses in the country concludes this highly readable and yet academically valid work exploring a discrete artistic discipline.

albany state university history: SOS - Calling All Black People John H. Bracey, Sonia Sanchez, James Edward Smethurst, 2014 This volume brings together a broad range of key writings from the Black Arts Movement of the 1960s and 1970s, among the most significant cultural movements in American history. The aesthetic counterpart of the Black Power movement, it burst onto the scene in the form of artists' circles, writers' workshops, drama groups, dance troupes, new publishing ventures, bookstores, and cultural centers and had a presence in practically every community and college campus with an appreciable African American population. Black Arts activists extended its reach even further through magazines such as Ebony and Jet, on television shows such as Soul! and Like It Is, and on radio programs. Many of the movement's leading artists, including Ed Bullins, Nikki Giovanni, Woodie King, Haki Madhubuti, Sonia Sanchez, Askia Touré, and Val Gray Ward remain artistically productive today. Its influence can also be seen in the work of later artists, from the writers Toni Morrison, John Edgar Wideman, and August Wilson to actors Avery Brooks, Danny Glover, and Samuel L. Jackson, to hip hop artists Mos Def, Talib Kweli, and Chuck D. SOS -- Calling All Black People includes works of fiction, poetry, and drama in addition to critical writings on issues of politics, aesthetics, and gender. As such, it incorporates community colleges, colleges of technology, university colleges, research universities, medical schools, health science centers, and includes specialized campuses in fields as diverse as optometry, ceramics, horticulture, fashion, forestry, and maritime training. Originating in a conference held in spring 2009 to mark SUNY's 60th anniversary, the book covers the system's origins, political landscape, varied missions, the different types of institutions, international partnerships, leadership, future directions, and more. Other state systems have been studied more closely and in depth (California, Michigan, Texas), and this book is a long overdue effort to bring New York into that conversation. Edited by a past interim chancellor of the system, and two SUNY history professors, and with a foreword by current chancellor Nancy L. Zimpher, this book is essential for anyone who has a stake in public higher education in New York state, or indeed, public higher education anywhere.

albany state university history: Bessarion Scholasticus John Monfasani, 2011 Bessarion (d. 18 November 1472) first made a name for himself as one of the Greek spokesmen at the Council of Ferrara-Florence in 1438-39. After becoming a cardinal, he several times entered conclaves as a serious candidate for the papacy. The library he bequeathed to the Republic of Venice, destined to become the historic core of the modern Biblioteca Marciana, is justly famous for its extraordinary collection of Greek manuscripts. Celebrated in his own time for his patronage of humanists, he was also Italy's leading Platonist before the emergence of Marsilio Ficino. He always held in reverence his teacher in Greece, the Neoplatonist philosopher George Gemistus Pletho, and his *In Calumniatorem Platonis*, printed in Rome in 1469, was a pivotal text in the Plato-Aristotle controversy of the Renaissance. Nonetheless, Bessarion was a great admirer of medieval scholasticism and especially of Thomas Aquinas. 'Bessarion Scholasticus' examines Bessarion's relationship with Latin culture as evidenced by his library, personal relations, and writings. It examines his humanist collection, his scholastic collection, his Thomism, and the circle of scholars associated with his household, called Bessarionea Academia by contemporaries. Half of 'Bessarion Scholasticus' is a catalogue *raisonné* of scholastic texts and manuscripts in Bessarion's library. The volume offers the first edition of Bessarion's autograph listing of the differences between Scotists and Thomists as well as first editions of prefaces by various authors addressed to Bessarion. In addition, the appendices include statistical tables of Bessarion's holdings of Latin classical authors and of texts in civil and canonical law and a register of the members of his cardinalial family before he became cardinal legate in Bologna in 1450.

albany state university history: The Works of Ibn Wāḍiḥ al-Yaʿqūbī (Volume 1) Matthew S. Gordon, Chase F. Robinson, Everett K. Rowson, Michael Fishbein, 2018-01-09 The Works of Ibn Wāḍiḥ al-Yaʿqūbī, a three volume set, contains a fully annotated translation of the extant writings of Abū al-ʿAbbās al-Yaʿqūbī, a Muslim imperial official and polymath of the third/ninth century, along with an introduction to these works and a biographical sketch of their author. The most important of the works are the History (Taʾrikh) and his Geography (Kitab al-buldan). It also contains a new translation of al-Yaʿqūbī's political essay (Mushakalat al-nas) and a set of fragmentary texts drawn from other Arabic medieval works. Al-Yaʿqūbī's writings are among the earliest surviving Arabic-language works of the Islamic period, and thus offer an invaluable body of evidence on patterns of early Islamic history, social and economic organization, and cultural production. Contributors: Laila Asser, Paul Cobb, Lawrence I. Conrad, Elton Daniel, Fred Donner, Michael Fishbein, Matthew S. Gordon, Sidney H. Griffith, Wadad Kadi (al-Qāḍī), Lutz Richter-Bernberg, Chase F. albany state university history: The Emperor and the Elephant Sam Ottewill-Soulsby, 2023-07-11 A new history of Christian-Muslim relations in the Carolingian period that provides a fresh account of events by drawing on Arabic as well as western sources In the year 802, an elephant arrived at the court of the Emperor Charlemagne in Aachen, sent as a gift by the 'Abbasid Caliph, Harun al-Rashid. This extraordinary moment was part of a much wider set of diplomatic

relations between the Carolingian dynasty and the Islamic world, including not only the Caliphate in the east but also Umayyad al-Andalus, North Africa, the Muslim lords of Italy and a varied cast of warlords, pirates and renegades. The Emperor and the Elephant offers a new account of these relations. By drawing on Arabic sources that help explain how and why Muslim rulers engaged with Charlemagne and his family, Sam Ottewill-Soulsby provides a fresh perspective on a subject that has until now been dominated by and seen through western sources. The Emperor and the Elephant demonstrates the fundamental importance of these diplomatic relations to everyone involved. Charlemagne and Harun al-Rashid's imperial ambitions at home were shaped by their dealings abroad. Populated by canny border lords who lived in multiple worlds, the long and shifting frontier between al-Andalus and the Franks presented both powers with opportunities and dangers, which their diplomats sought to manage. Tracking the movement of envoys and messengers across the Pyrenees, the Mediterranean and beyond, and the complex ideas that lay behind them, this book examines the ways in which Christians and Muslims could make common cause in an age of faith.
