alchemy guide wotlk 1 450: Digital Culture, Play, and Identity Hilde Corneliussen, Jill Walker Rettberg, 2008 This book examines the complexity of World of Warcraft from a variety of perspectives, exploring the cultural and social implications of the proliferation of ever more complex digital gameworlds. The contributors have immersed themselves in the World of Warcraft universe, spending hundreds of hours as players (leading guilds and raids, exploring moneymaking possibilities in the in-game auction house, playing different factions, races, and classes), conducting interviews, and studying the game design - as created by Blizzard Entertainment, the game's developer, and as modified by player-created user interfaces. The analyses they offer are based on both the firsthand experience of being a resident of Azeroth and the data they have gathered and interpreted. The contributors examine the ways that gameworlds reflect the real world - exploring such topics as World of Warcraft as a capitalist fairytale and the game's construction of gender; the cohesiveness of the gameworld in terms of geography, mythology, narrative, and the treatment of death as a temporary state; aspects of play, including deviant strategies perhaps not in line with the intentions of the designers; and character - both players' identification with their characters and the game's culture of naming characters. -- BOOK JACKET.

alchemy guide wotlk 1 450: *Material Virtualities* Jenny Sundén, 2003 What does it mean to be embodied online? What are the conditions of cybersubjectivity? In *Material Virtualities*, Jenny Sundén explores the rarely acknowledged borderland between typists and textual bodies, speaking and writing, and physicality and imagination in online encounters. Through careful ethnographic investigations of a text-based virtual world called WaterMOO, Sundén shows how texts, bodies, and machines are linked together in ways that demand a new understanding of the writing subject. Drawing on contemporary feminist and queer theory, she questions the opposition between disembodied, high-tech masculinity and embodied, earth-bound femininity, insisting on the need for a radical materialization of cybercultural studies that discloses the «virtual» as itself embodied.

alchemy guide wotlk 1 450: *Coming of Age in Second Life* Tom Boellstorff, 2015-08-25 Millions of people around the world today spend portions of their lives in online virtual worlds. Second Life is one of the largest of these virtual worlds. The residents of Second Life create communities, buy property and build homes, go to concerts, meet in bars, attend weddings and religious services, buy and sell virtual goods and services, find friendship, fall in love--the possibilities are endless, and all encountered through a computer screen. At the time of its initial publication in 2008, *Coming of Age in Second Life* was the first book of anthropology to examine this thriving alternate universe. Tom Boellstorff conducted more than two years of fieldwork in Second Life, living among and observing its residents in exactly the same way anthropologists traditionally have done to learn about cultures and social groups in the so-called real world. He conducted his research as the avatar Tom Bukowski, and applied the rigorous methods of anthropology to study many facets of this new frontier of human life, including issues of gender, race, sex, money, conflict and antisocial behavior, the construction of place and time, and the interplay of self and group. *Coming of Age in Second Life* shows how virtual worlds can change ideas about identity and society. Bringing anthropology into territory never before studied, this book demonstrates that in some ways humans have always been virtual, and that virtual worlds in all their rich complexity build upon a human capacity for culture that is as old as humanity itself. Now with a new preface in which the author places his book in light of the most recent transformations in online culture, *Coming of Age in Second Life* remains the classic ethnography of virtual worlds.
