Brush, 2006-01-01 The female entrepreneurship researchers community has to thank these women for their brilliant work in reviewing, revising and selecting the best papers from the second Diana International Conference that were finally edited for this volume. . . the book is a good compendium of female entrepreneurship circumstances in different countries that focuses specifically on the explanation as to why gender plays a role in the number of ventures started by women and why they are in general smaller and less growth-oriented. Manuela Pardo-del-Val, International Entrepreneurship and Management Journal . . . this edited text draws upon a range of international contributors to present a comparative overview of challenges facing female entrepreneurs seeking to grow their firms. . . this is an interesting book that makes a welcome contribution to contemporary debate. Susan Marlow, International Small Business Journal The data and information presented in this work will be of particular interest to students and scholars of entrepreneurship or labor and women s studies. Recommended. General readers; upper-division undergraduate through professional collections. E.P. Hoffman, Choice Enterprising new firms drive economic growth, and women around the world are important contributors to that growth. As entrepreneurs, they seize opportunities, develop and deliver new goods and services and, in the process, create wealth for themselves, their families, communities, and countries. This volume explores the role women entrepreneurs play in this economic progress, highlighting the challenges they encounter in launching and growing their businesses, and providing detailed studies of how their experiences vary from country to country. Statistics show that businesses owned by women tend to remain smaller than those owned by men, whether measured by the number of employees or by the size of revenues. Because women-led firms fail to grow as robustly, the opportunities to innovate and expand are limited, as are the rewards. Based on recent studies that examine the links between entrepreneurial supply and demand issues, this volume provides insights into how women around the world are addressing the challenges of entrepreneurial growth. The first set of chapters consists of country overviews and provides discussions of the state of women growing businesses. The second set of chapters describes research projects under way in different countries and explores more focused topics under the umbrella of women business owners and business growth. The volume concludes with an agenda and projects for future research. Academics and policymakers will gain a greater understanding of women s entrepreneurial behaviors and outcomes through this path-breaking volume. Those who support women through education and training, policymaking, or providing entrepreneurial resources will also find the volume of great practical interest.

**aldrich business services pvt ltd: The State, Development and Identity in Multi-Ethnic Societies** Nicholas Tarling, Edmund Terence Gomez, 2008-03-03 The controversial work of Amy Chua argues that, as rapid modernization, industrialization, technological change and globalization bring about fundamental changes in national, ethnic and class identities, especially in developing countries, there is a danger that the laissez-faire capitalist system will cause serious racial conflagration, especially in societies where there is ethnic minority market dominance, combined with ethno-nationalist-type politicians who mobilize support from ethnic majority communities by drawing attention to inequalities in wealth distribution. This controversial work goes on to argue for an authoritarian political system, with curbs against the corporate expansion of enterprises owned by ethnic minorities, until parity in equity ownership among all communities is achieved. This book tests the assumptions behind these arguments, discussing ethnic communities, identity, economy, society and state, and the links between them, in a range of countries in East Asia, Southeast Asia, and the Pacific, and diaspora communities of Asian peoples in the West. It demonstrates that identity transformation occurs as generations of minority communities succeed each other, that old discourses of fixed origins which are assumed to bind ethnic communities into cohesive wholes do not apply, that there are very extensive inter-linkages in the daily activities of people of different ethnic and religious backgrounds, that affirmative action-type policies along racial lines can undermine overall societal cohesion, and that there is no case for limiting democracy until economic equity is achieved. This is a rich, important book, with huge implications for economic development and for states throughout the world as multi-ethnic societies world-wide become more extensive and more complicated.
