alek thomas spring training: Future Value Eric Longenhagen, Kiley McDaniel, Keith Law, 2020-04-14 An unprecedented look inside the world of baseball scouting and evaluation from two of the industry's top prospect analysts For the modern Major League team, player evaluation is a complex, multi-pronged, high-tech pursuit. But far from becoming obsolete in this environment—as Michael Lewis' *Moneyball* once forecast—the role of the scout in today's game has evolved and even expanded. Rather than being the antithesis of a data-driven approach, scouting now represents an essential analytical component in a team's arsenal. *Future Value* is a thorough dive into baseball's changing world of talent acquisition and development, a world with its own language, methods, metrics, and madness. From rural high schools to elite amateur showcases, from the back fields of spring training to major league draft rooms, Eric Longenhagen and Kiley McDaniel break down the key systems and techniques used to assess talent. It's a process that has moved beyond the quintessential stopwatches and radar guns to include statistical models, countless measurable indicators, and a broader international reach. Practical and probing, discussing wide-ranging topics from tool grades to front office politics, this is an illuminating exploration of how to watch baseball and see the future.

alek thomas spring training: *Seasons in Hell* Mike Shropshire, 2014-03-25 “A funny, revealing, Ball Four-like romp through mid-seventies baseball” from the longtime sports columnist and author of *The Last Real Season* (Booklist). You think your team is bad? In this “disastrously hilarious” work on one of the most tortured franchises in baseball, one reporter discovers that nine innings can feel like an eternity (USA Today). In early 1973, gonzo sportswriter Mike Shropshire agreed to cover the Texas Rangers for the Fort Worth Star-Telegram, not realizing that the Rangers were arguably the worst team in baseball history. *Seasons in Hell* is a riotous, candid, irreverent behind-the-scenes account in the tradition of *The Bronx Zoo* and *Ball Four*, following the Texas Rangers from Whitey Herzog's reign in 1973 through Billy Martin's tumultuous tenure. Offering wonderful perspectives on dozens of unique (and likely never-to-be-seen-again) baseball personalities, *Seasons in Hell* recounts some of the most extreme characters ever to play the game and brings to life the no-holds-barred culture of major league baseball in the mid-seventies. “The single funniest sports book I have ever read.”—Don Imus “The locker-room shenanigans of a lousy team of the 1970s.”—Publishers Weekly

alek thomas spring training: *Composing for the Cinema* Ennio Morricone, Sergio Miceli, 2013-10-10 With nearly 400 scores to his credit, Ennio Morricone is one of the most prolific and influential film composers working today. He has collaborated with many significant directors, and his scores for such films as *The Good, the Bad, and the Ugly*; *Once Upon a Time in America*; *Days of Heaven*; *The Mission*; *The Untouchables*; *Malèna*; and *Cinema Paradiso* leave moviegoers with the conviction that something special was achieved—a conviction shared by composers, scholars, and fans alike. In *Composing for the Cinema: The Theory and Praxis of Music in Film*, Morricone and musicologist Sergio Miceli present a series of lectures on the composition and analysis of film music. Adapted from several lectures and seminars, these lessons show how sound design can be analyzed and offer a variety of musical solutions to many different kinds of film. Though aimed at composers, Morricone's expositions are easy to understand and fascinating even to those without any musical training. Drawing upon scores by himself and others, the composer also provides insight into his relationships with many of the directors with whom he has collaborated, including Sergio Leone, Giuseppe Tornatore, Franco Zeffirelli, Warren Beatty, Ridley Scott, Roland Joffé, the Taviani Brothers, and others. Translated and edited by Gillian B. Anderson, an orchestral conductor and musicologist, these lessons reveal Morricone's passion about musical expression. Delivered in a conversational mode that is both comprehensible and interesting, this groundbreaking work intertwines analysis with practical details of film music composition. Aimed at a wide audience of composers, musicians, film historians, and fans, *Composing for the Cinema* contains a treasure trove of practical information and observations from a distinguished musicologist and one of the most

accomplished composers on the international film scene.

alek thomas spring training: Beyond Vision Pavel Florensky, 2006-08-15 Beyond Vision is the first English-language collection of essays on art by Pavel Florensky (1882-1937), Russian philosopher, priest, linguist, scientist, mathematician – and art historian. In addition to seven essays by Florensky, the book includes a biographical introduction and an examination of Florensky's contribution as an art historian by Nicoletta Misler. Beyond Vision reveals Florensky's fundamental attitudes to the vital questions of construction, composition, chronology, function and destination in the fields of painting, sculpture and design. His reputation as a theologian and philosopher is already established in the English-speaking world, but this first collection in English of his art essays (translated by Wendy Salmond) will be a revelation to those in the field. Pavel Florensky was a true polymath: trained in mathematics and philosophy at Moscow University, he rejected a scholarship in advanced mathematics in order to study theology at the Moscow Theological Academy. He was also an expert linguist, scientist and art historian. A victim of the Soviet government's animosity towards religion, he was condemned to a Siberian labor camp in 1933 where he continued his work under increasingly difficult circumstances. He was executed in 1937.

alek thomas spring training: The Shock Doctrine Naomi Klein, 2010-04-01 The bestselling author of No Logo shows how the global free market has exploited crises and shock for three decades, from Chile to Iraq In her groundbreaking reporting, Naomi Klein introduced the term disaster capitalism. Whether covering Baghdad after the U.S. occupation, Sri Lanka in the wake of the tsunami, or New Orleans post-Katrina, she witnessed something remarkably similar. People still reeling from catastrophe were being hit again, this time with economic shock treatment, losing their land and homes to rapid-fire corporate makeovers. The Shock Doctrine retells the story of the most dominant ideology of our time, Milton Friedman's free market economic revolution. In contrast to the popular myth of this movement's peaceful global victory, Klein shows how it has exploited moments of shock and extreme violence in order to implement its economic policies in so many parts of the world from Latin America and Eastern Europe to South Africa, Russia, and Iraq. At the core of disaster capitalism is the use of cataclysmic events to advance radical privatization combined with the privatization of the disaster response itself. Klein argues that by capitalizing on crises, created by nature or war, the disaster capitalism complex now exists as a booming new economy, and is the violent culmination of a radical economic project that has been incubating for fifty years.

alek thomas spring training: Better Use of Skills in the Workplace Collectif, 2017-11-02 This joint OECD-ILO report provides a comparative analysis of case studies focusing on improving skills use in the workplace across eight countries. The examples provide insights into the practical ways in which employers interact with government services and policies at the local level. They highlight the need to build policy coherence across employment, skills, economic development and innovation policies, and underline the importance of ensuring that skills utilisation is built into policy development thinking and implementation. Skills utilisation concerns the extent to which skills are effectively applied in the workplace to maximise workplace and individual performance. It involves a mix of policies including work organisation, job design, technology adaptation, innovation, employee-employer relations, human resource development practices and business-product market strategies. It is often at the local level that the interface of these factors can best be addressed.

Larry Millson, 2016-09-30 Ken Carson's career as rink rat, athletic trainer and executive has spanned sixty years from junior hockey to the NHL and from major-league baseball to the minors. Carson has sharpened skates with Bobby Orr as his helper; been frightened out of a wrestling ring by Yukon Eric; lived at the arena in Rochester, N.Y.; stitched up players for the Pittsburgh Penguins; celebrated the Blue Jays' first AL East championship on the turf of Exhibition Stadium as the team trainer who doubled as director of team travel. He was the first trainer for two expansion teams in two sports, the Penguins and the Blue Jays, participating in the 1976 NHL All-Star Game and the 1980 MLB All-Star Game. In 1987, Carson became the Blue Jays' director of Florida operations, which included the role of general manager of the Class A team at Dunedin. As a respected minor-league executive, he became president of the Class A Florida State League in 2015. Carson's story, as told to Toronto sports writer Larry Millson, offers a unique perspective of sports over the generations.

alek thomas spring training: The Image of Librarians in Cinema, 1917-1999 Ray Tevis, Brenda Tevis, 2015-03-26 From its earliest days to the present, the onscreen image of the librarian has remained largely the same. A silent 1921 film set the precedent for two female librarian characters: a dowdy spinster wears glasses and a bun hairstyle, and an attractive young woman is overworked and underpaid. Silent films, however, employed a variety of characteristics for librarians, showed them at work on many different tasks, and featured them in a range of dramatic, romantic, and comedic situations. The sound era (during which librarians appeared in more than 200 films) frequently exaggerated these characteristics and situations, strongly influencing the general image of librarians. This chronologically arranged work analyzes the stereotypical image of librarians, male and female, in primarily American and British motion pictures from the silent era to the 21st century. The work briefly describes each film, offering some critical commentary, and then examines its librarian, considering every aspect of the total character from socio-economic conditions and motivations for leaving or not leaving the library, to personal attributes (such as clothing, hair, and age) and entanglements with the opposite sex, to commonly used props, plot situations and lines (Shush!). The work comments on whether librarians and library work are depicted accurately and analyzes the development of the public's image of a librarian. The accompanying filmography lists librarian characters and notes stereotypes such as buns and eyeglasses. With bibliography and index.

alek thomas spring training: The Central Intelligence Agency and Overhead Reconnaissance Gregory Pedlow, Donald Welzenbach, 2016-03-15 The CIA's 2013 release of its book *The Central Intelligence Agency and Overhead Reconnaissance 1954-1974* is a fascinating and important historical document. It contains a significant amount of newly declassified material with respect to

the U-2 and Oxcart programs, including names of pilots; codenames and cryptonyms; locations, funding, and cover arrangements; electronic countermeasures equipment; cooperation with foreign governments; and overflights of the Soviet Union, Cuba, China, and other countries. Originally published with a Secret/No Foreign Dissemination classification, this detailed study describes not only the program's technological and bureaucratic aspects, but also its political and international context, including the difficult choices faced by President Eisenhower in authorizing overflights of the Soviet Union and the controversy surrounding the shoot down there of U-2 pilot Francis Gary Powers in 1960. The authors discuss the origins of the U-2, its top-secret testing, its specially designed high-altitude cameras and complex life-support systems, and even the possible use of poison capsules by its pilots, if captured. They call attention to the crucial importance of the U-2 in the gathering of strategic and tactical intelligence, as well as the controversies that the program unleashed. Finally, they discuss the CIA's development of a successor to the U-2, the Oxcart, which became the world's most technologically advanced aircraft. For the first time, the more complete 2013 release of this historical text is available in a professionally typeset format, supplemented with higher quality photographs that will bring alive these incredible aircraft and the story of their development and use by the CIA. This edition also includes a new preface by author Gregory W. Pedlow and a foreword by Chris Pocock. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. alek thomas spring training: Layers of Blackness Deborah Gabriel, 2007 This is the first book by an author in the UK to take an in-depth look at colourism - the process of discrimination based on skin tone among members of the same ethnic group, whereby lighter skin is more valued than darker complexions. The African Diaspora in Britain is examined as part of a global black community with shared experiences of slavery, colonization and neo-colonialism. The author traces the evolution of colourism within African descendant communities in the USA, Jamaica, Latin America and the UK from a historical and political perspective and examines its present impact on the global African Diaspora. This book is essential reading for educators and students and will appeal to anyone with an interest in the subject of race and identity who wants to understand why colourism - a psychological legacy of slavery still impacts people of African descent in the Diaspora today.

alek thomas spring training: *The Yankee Years* Joe Torre, Tom Verducci, 2010-03-09 The definitive story of one of the greatest dynasties in baseball history, Joe Torre's New York Yankees. When Joe Torre took over as manager of the Yankees in 1996, they had not won a World Series title in eighteen years. In that time seventeen others had tried to take the helm of America's most famous baseball team. Each one was fired by George Steinbrenner. After twelve triumphant seasons—with twelve straight playoff appearances, six pennants, and four World Series titles—Torre left the Yankees as the most beloved manager in baseball. But dealing with players like Jason Giambi, A-Rod, Derek Jeter, Mariano Rivera, Roger Clemens, and Randy Johnson is what managing is all about. Here, for the first time, Joe Torre and Tom Verducci take readers inside the dugout, the clubhouse, and the front office, showing what it took to keep the Yankees on top of the baseball world.

alek thomas spring training: *The Next Arms Race* Henry D. Sokolski, 2015-01-31 With most of the world's advanced economies now stuck in recession; Western support for defense cuts and nuclear disarmament increasing; and a major emerging Asian power at odds with its neighbors and the United States; it is tempting to think our times are about to rhyme with a decade of similar woes—the disorderly 1930s. Might we again be drifting toward some new form of mortal national combat? Or, will our future more likely ape the near-half-century that defined the Cold War—a period in which tensions between competing states ebbed and flowed but peace mostly prevailed by dint of nuclear mutual fear and loathing? The short answer is, nobody knows. This much, however, is clear: The strategic military competitions of the next 2 decades will be unlike any the world has yet seen. Assuming U.S., Chinese, Russian, Israeli, Indian, French, British, and Pakistani strategic forces continue to be modernized and America and Russia continue to reduce their strategic nuclear deployments, the next arms race will be run by a much larger number of contestants—with highly destructive strategic capabilities far more closely matched and capable of being quickly enlarged than in any other previous period in history.

The area's rugged, steep terrain and thick forests made it a natural hiding spot for local insurgents and international terrorists alike, and it came to represent both the valor and futility of America's two-decade-long Afghan war. Drawing on reporting trips, hundreds of interviews, and documentary research, Wesley Morgan reveals the history of the war in this iconic region, captures the culture and reality of the conflict through both American and Afghan eyes, and reports on the snowballing missteps—some kept secret from even the troops fighting there—that doomed the American mission. *The Hardest Place* is the story of one of the twenty-first century's most unforgiving battlefields and a portrait of the American military that fought there.

alek thomas spring training: Thucydides' Other "Traps" Alan Greeley Misenheimer, 2019-06-06 The notion of a Thucydides Trap that will ensnare China and the United States in a 21st century conflict-much as the rising power of Athens alarmed Sparta and made war inevitable between the Aegean superpowers of the 5th century BCE-has received global attention since entering the international relations lexicon 6 years ago. Scholars, journalists, bloggers, and politicians in many countries, notably China, have embraced this beguiling metaphor, coined by Harvard political science professor Graham Allison, as a framework for examining the likelihood of a Sino-American war. This case study examines the Thucydides Trap metaphor and the response it has elicited. Hewing closely to what the historian of the Peloponnesian War actually says about the causes and inevitability of war, it argues that, while Thucydides' text does not support Allison's normative assertion about the inevitable result of an encounter between rising and ruling powers, the History of the Peloponnesian War (hereafter, History) does identify elements of leadership and political dynamic that bear directly on whether a clash of interests between two states is resolved through peaceful means or escalates to war. It is precisely because war typically begins with a considered decision by a national command authority to reject other options and mobilize for conflict (and thus always entails an element of choice) that insight from Thucydides' History remains relevant and beneficial for the contemporary strategist, or citizen, concerned in such decisions. Accordingly, this case study concludes that the Thucydides Trap, as conceived and presented by Graham Allison, draws welcome attention both to Thucydides and to the pitfalls of great power competition, but fails as a heuristic device or predictive tool in the analysis of contemporary events. Allison's metaphor offers, at best, a potentially misleading over-simplification of Thucydides' nuanced and problematic account of the origins of the epochal conflict that defined his age. Moreover, it overlooks actual insights from the History that can help political decisionmakers-including, but not limited to, those of the United States and China-either avoid war or, if ignored, pose genuine policy traps that can make an avoidable war more likely, and a necessary war more costly.

alek thomas spring training: A Promise to Ourselves Alec Baldwin, 2008-09-23 I have been through some of the worst of contentious divorce litigation, Alec Baldwin declares in A Promise to Ourselves. Using a very personal approach, he offers practical guidance to help others avoid the anguish he has endured. An Academy and Tony Award nominee and a 2007 recipient of Golden Globe, SAG, and Television Critics Association Awards for best actor in a comedy, Alec Baldwin is

one of the best-known, most successful actors in the world. His relationship with Kim Basinger, the Academy Award-winning actress, lasted nearly a decade. They have a daughter named Ireland, and for a time, theirs seemed to be the model of a successful Hollywood marriage. But in 2000 they separated and in 2002 divorced. Their split---specifically the custody battle surrounding Ireland---would be the subject of media attention for years to come. In his own life and others', Baldwin has seen the heavy toll that divorce can take---psychologically, emotionally, and financially. He has been extensively involved in divorce litigation, and he has witnessed the way that noncustodial parents, especially fathers, are often forced to abandon hopes of equitable rights when it comes to their children. He makes a powerful case for reexamining and changing the way divorce and child custody is decided in this country and levels a scathing attack at what he calls the family law industry. When it comes to his experiences with judges, court-appointed therapists, and lawyers, Baldwin pulls no punches. He casts a light on his own divorce and the way the current family law system affected him, his ex-wife, and his daughter, as well as many other families. This is an important, informative, and deeply felt book on a contentious subject that offers hope of finding a better way.

alek thomas spring training: *The Sword of Summer* Rick Riordan, 2017-04-04 Magnus Chase has seen his share of trouble. Ever since that terrible night two years ago when his mother told him to run, he has lived alone on the streets of Boston, surviving by his wits, staying one step ahead of the police and truant officers. On

alek thomas spring training: *My Brother's Road* Markar Melkonian, 2008-05-07 What do 'Abu Sindi', 'Timothy Sean McCormack', 'Saro', and 'Commander Avo' all have in common? They were all aliases for Monte Melkonian. But who was Monte Melkonian? In his native California he was once a kid in cut-off jeans, playing baseball and eating snow cones. Europe denounced him as an international terrorist. His adopted homeland of Armenia decorated him as a national hero who led a force of 4000 men to victory in the Armenian enclave of Mountainous Karabagh in Azerbaijan. Why Armenia? Why adopt the cause of a remote corner of the Caucasus whose peoples had scattered throughout the world after the early twentieth century Ottoman genocides? Markar Melkonian spent seven years unravelling the mystery of his brother's road: a journey which began in his ancestors' town in Turkey and leading to a blood-splattered square in Tehran, the Kurdish mountains, the bomb-pocked streets of Beirut, and finally, to the windswept heights of Mountainous Karabagh. Monte's life embodied the agony and the follies bedevelling the end of the Cold War and the unravelling of the Soviet Union. Yet, who really was this man? A terrorist or a hero? *My Brother's Road* is not just the story of a long journey and a short life, it is an attempt to understand what happens when one man decides that terrible actions speak louder than words.

alek thomas spring training: *Consciousness* Susan Blackmore, Emily T. Troscianko, 2018-04-27 Is there a theory that explains the essence of consciousness? Or is consciousness itself an illusion? Am I conscious now? Now considered the 'last great mystery of science', consciousness was once viewed with extreme scepticism and rejected by mainstream scientists. It is now a significant area of research, albeit a contentious one, as well as a rapidly expanding area of study for students of psychology, philosophy, and neuroscience. This edition of *Consciousness*, revised by author team Susan Blackmore and Emily Troscianko, explores the key theories and evidence in consciousness studies ranging from neuroscience and psychology to quantum theories and philosophy. It examines why the term 'consciousness' has no recognised definition and provides an opportunity to delve into personal intuitions about the self, mind, and consciousness. Featuring comprehensive coverage of all core topics in the field, this edition includes: Why the problem of consciousness is so hard Neuroscience and the neural correlates of consciousness Why we might be mistaken about our own minds The apparent difference between conscious and unconscious Theories of attention, free will, and self and other The evolution of consciousness in animals and machines Altered states from meditation to drugs and dreaming Complete with key concept boxes, profiles of well-known thinkers, and questions and activities suitable for both independent study and group work, *Consciousness* provides a complete introduction to this fascinating field. alek thomas spring training: The Beautiful Warriors Cornelia Sollfrank, 2019-12-05 The Beautiful Warriors: Technofeminist Practice in the 21st Century brings together seven current technofeminist positions from the fields of art and activism. In very different ways, they expand the theories and practices of 1990's cyberfeminism and thus react to new forms of discrimination and exploitation. Gender politics are negotiated with reference to technology, and questions of technology are combined with questions of ecology and economy. The different positions around this new techno-eco-feminism understand their practice as an invitation to take up their social and aesthetic interventions, to join in, to continue, and never give up. Contributions from Christina Grammatikopoulou, Isabel de Sena, Femke Snelting, Cornelia Sollfrank, Spideralex, Sophie Toupin, hvale vale, Yvonne Volkart.

alek thomas spring training: *Fast-Pitch Love* Clayton Cormany, 2016-04-28 For most people, softball is a way to have fun, get exercise, make friends, and develop teamwork. But for 17-year-old Jace Waldron, softball is something more - a pathway to maturity. It is through that game that Jace learns what is important in romance and why physical beauty alone is not enough to make it work. Join Jace and his team, the Valkyries, as they come to the plate to take on all challengers, while gaining valuable lessons about life along the way.

alek thomas spring training: *The Cancer Revolution* Leigh Erin Connealy, 2018-07-17 Integrative health pioneer offers her groundbreaking approach to treating (and preventing) cancer, based on 6 Revolutionary Findings, with a practical program and strategies. When it comes to cancer, conventional doctors are trained to treat their patients exclusively with surgery, radiation, and chemotherapy. These methods are grueling on the whole body--and they don't treat beyond the tumor or the cancer itself. The focus is on the disease, not the whole person--and because of this, the outcomes in conventional medicine can be bleak. But it doesn't have to be this way. Dr. Leigh Erin Connealy has developed a whole-person approach to treating cancer--and these treatments have helped thousands of patients through her Cancer Center for Healing. In *The Cancer Revolution*, Dr. Connealy shows you how to get to the root causes of cancer and the practical steps you can take to get back on the path to healing--from balancing your body's chemistry with nutritional supplements, following a healthy food plan, detoxifying your body and home, exercising regularly, getting deep restful sleep every night, practicing stress reduction techniques, and putting together a supportive healing team. Chemotherapy and radiation have their place in treatment, but in many cases, they are simply not enough, because cancer isn't caused by one thing, but by many different factors. All of these causes must be addressed, not just the tumor. *The Cancer Revolution* will equip you to make impactful, achievable lifestyle choices that fight the root of the disease, and that offer hope for recovery and a cancer-free life.
