alex o loughlin interview: *Unassisted Childbirth* Laura Kaplan Shanley, 2012-02-22 This book reveals how giving birth is an inherently safe, relatively painless process that is best performed without the assistance of doctors or midwives, and how confidence and a positive attitude reduces fear—and therefore the pain—of labor. According to Laura Kaplan Shanley, a renowned leader in the natural-birth movement, human birth is inherently safe and relatively painless—provided we refrain from physical or psychological interference. The problems often associated with birth can be traced to three main factors: poverty, unnecessary medical intervention, and fear. When these causes are eliminated, most women can give birth either alone or with the help of a partner, friends, or family. This second edition of *Unassisted Childbirth* leads with a history of childbirth and then describes how most deliveries occur today, detailing why these processes don't serve mothers or babies. The information in this unique book gives women yet another legitimate choice in childbirth that doesn't rely on doctors and technology, and allows parents, birth professionals, and general readers to reexamine their most basic ideas about birth and learn to think in new ways.

alex o loughlin interview: Dreams in American Television Narratives Cynthia Burkhead, 2013-05-23 *Dreams in Television Narratives* is the first comprehensive analysis of one of American television's most frequently utilized tropes, the dream. From its beginning, television has been a storytelling medium. Whether delivered to a live audience or played out on a sound stage, narratives and those who write them have always been the crux of the television program. While film can claim a long history of scholarly inquiry into the connection between film and dreams, no comprehensive research exists on the subject of television dreams. Locating its primary function as narrative, the author uses examples from American sitcoms and dramatic programs, analyzing the narrative functions of dreams using, as its frame, Carl Jung's narrative stages of the dream: exposition, development, culmination, and conclusion. While television dreams are analyzed throughout, case studies of the television programs *The Sopranos* and *Buffy the Vampire Slayer* are included to show in detail how dreams function throughout a television series. Includes a compendium of over 1000 television episodes that include dreams, a valuable tool for any television scholar or enthusiast.

alex o loughlin interview: The Believer Ralph Blumenthal, 2021 The Believer is the weird and chilling true story of Dr. John Mack. This eminent Harvard psychiatrist and Pulitzer Prize-winning biographer risked his career to investigate the phenomenon of human encounters with aliens and to give credibility to the stupefying tales shared by people who were utterly convinced they had happened. Nothing in Mack's four decades of psychiatry had prepared him for the otherworldly accounts of a cross section of humanity including young children who reported being taken against their wills by alien beings. Over the course of his career his interest in alien abduction grew from curiosity to wonder, ultimately developing into a limitless, unwavering passion. Based on exclusive access to Mack's archives, journals, and psychiatric notes and interviews with his family and closest associates, The Believer reveals the life and work of a man who explored the deepest of scientific conundrums and further leads us to the hidden dimensions and alternate realities that captivated Mack until the end of his life.

alex o loughlin interview: Functional Assessment for Adults with Disabilities National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, Committee on Functional Assessment for Adults with Disabilities, 2019-08-31 The U.S. Social Security Administration (SSA) provides disability benefits through the Social Security Disability Insurance (SSDI) and Supplemental Security Income (SSI) programs. To receive SSDI or SSI disability benefits, an individual must meet the statutory definition of disability, which is the inability to engage in any substantial gainful activity [SGA] by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. SSA uses a five-step sequential process to determine whether an adult applicant meets this definition. Functional Assessment for Adults with Disabilities examines ways to collect information about an individual's physical and mental (cognitive and noncognitive) functional abilities relevant to work requirements. This report discusses the types of information that support findings of limitations in functional abilities relevant to work requirements, and provides findings and conclusions regarding the collection of information and assessment of functional abilities relevant to work requirements.

alex o loughlin interview: War and Media Andrew Hoskins, Ben O'Loughlin, 2013-04-23 The trinity of government, military and publics has been drawn together into immediate and unpredictable relationships in a new media ecology that has ushered in new asymmetries in the waging of war and terror. To help us understand these new relationships, Andrew Hoskins and Ben O'Loughlin here provide a timely, comprehensive and highly readable survey of the field of war and media. War is diffused through a complex mesh of our everyday media. Paradoxically, this both facilitates and contains the presence and power of enemies near and far. The conventions of so-called traditional warfare have been splintered by the availability and connectivity of the principal locus of war today: the electronic and digital media. Hoskins and O'Loughlin identify and illuminate the conditions of what they term diffused war and the new challenges it raises for the actors who wage and counter warfare, for their agents and mechanisms of the new media and for mass publics. This book offers an invaluable review of the key literature and presents a fresh approach to the understanding of the dynamic relationships between war and media. It will be welcomed by a broad range of students taking courses on war and media and related modules, especially in media, communication and cultural studies, politics and international relations, sociology, journalism, and security studies.
