Introduction:

The rhythmic thump-thump-thump of tiny paws on the floorboards, the soft purr rumbling against my leg – these are the sounds of unconditional love, a love I found through the Almost Home Humane Society of North Central Iowa adoption program. My experience is just one of thousands of heartwarming stories that have unfolded within the walls of this incredible organization. Almost Home Humane Society of North Central Iowa adoption isn't just about finding a pet a home; it's about forging a bond that enriches lives on both sides. This article delves into the journey of rescuing and rehoming animals, exploring the process, the rewards, and the responsibilities involved in welcoming a furry friend into your family through almost home humane society of north central iowa adoption.

Understanding the Almost Home Humane Society of North Central Iowa Adoption Process

The Almost Home Humane Society of North Central Iowa adoption process is designed to ensure the perfect match between pets and prospective owners. It begins with a visit to the shelter, where you can browse the available animals. The staff are incredibly knowledgeable and passionate, patiently answering questions and guiding you towards pets that might be a good fit based on your lifestyle, experience, and living situation.

The application process is thorough but straightforward. It involves providing information about your household, including other pets, children, and living arrangements. This ensures responsible placement and minimizes the risk of future relinquishments. After the application is reviewed, a meet-and-greet with the chosen animal is scheduled. This crucial step allows you to interact with the pet in a controlled environment, observing their temperament and personality to confirm compatibility.

Finally, after a successful meet-and-greet, the adoption is finalized. The staff provides comprehensive post-adoption support, offering guidance on training, nutrition, and veterinary care. This commitment to responsible pet ownership is a hallmark of almost home humane society of north central iowa adoption.

Case Study: Pepper the Playful Pup

Pepper, a spirited terrier mix, arrived at the Almost Home Humane Society of North Central Iowa adoption center as a stray, timid and underweight. He was initially hesitant, flinching at sudden movements. However, with the shelter's dedicated staff's patient care and socialization, Pepper blossomed. His playful personality emerged, and his tail wagged with increasing enthusiasm.

The Johnson family, experienced pet owners, were looking for a companion for their older dog. They connected with Pepper immediately during their almost home humane society of north central iowa adoption meet-and-greet. They understood his need for gentle handling and provided a loving, stable environment. Today, Pepper is a happy, healthy member of the Johnson family, a testament to the transformative power of almost home humane society of north central iowa adoption.

Case Study: Mittens the Mysterious Cat

Mittens, a sleek black cat, arrived at the shelter with a noticeable limp. Veterinary examination revealed a previous injury, requiring ongoing care. Despite this, Mittens possessed an endearingly independent spirit. She found a loving home with the Williams family, who were prepared for the commitment of caring for a pet with special needs. The Williams family understood that almost home humane society of north central iowa adoption means accepting a pet as they are, imperfections and all. Mittens now thrives in her forever home, a shining example of successful almost home humane society of north central iowa adoption.

My Personal Almost Home Humane Society of North Central Iowa Adoption Experience

My own journey with almost home humane society of north central iowa adoption began with a simple search online. I was looking for a companion, a furry friend to share my life with. Browsing the Almost Home Humane Society of North Central Iowa website, I was immediately drawn to a photo of a scruffy, brown-eyed dog named Charlie. His description mentioned a playful nature and a love for cuddles – a perfect match for my lifestyle.

The adoption process was smooth and efficient. The staff were welcoming and provided all the information I needed. Meeting Charlie was magical; his tail wagged furiously, and he leaned into my hand, accepting a gentle scratch behind the ears. Bringing Charlie home was one of the best decisions I ever made. He's filled my life with joy, laughter, and a profound sense of companionship. My almost home humane society of north central iowa adoption story is a testament to the wonderful

work this organization does.

almost home humane society of north central iowa adoption: The Other End of the Leash Patricia McConnell, Ph.D., 2009-02-19 Learn to communicate with your dog—using their language “Good reading for dog lovers and an immensely useful manual for dog owners.”—The Washington Post An Applied Animal Behaviorist and dog trainer with more than twenty years’ experience, Dr. Patricia McConnell reveals a revolutionary new perspective on our relationship with dogs—sharing insights on how “man’s best friend” might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover: • How you can get your dog to come when called by acting less like a primate and more like a dog • Why the advice to “get dominance” over your dog can cause problems • Why “rough and tumble primate play” can lead to trouble—and how to play with your dog in ways that are fun and keep him out of mischief • How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than “alpha wanna-bes!” Fascinating, insightful, and compelling, *The Other End of the Leash* is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.

almost home humane society of north central iowa adoption: Susie's Senior Dogs Erin Stanton, 2016-10-25 The viral Facebook sensation *Susie's Senior Dogs* has amassed over 500,000 fans as it advocates for the adoption of elderly dogs. Now Erin Stanton (*Susie's* owner) has written a

heartwarming, compelling collection of happy ending adoption stories for our oldest and dearest canine pals. In this collection of success stories culled from the nearly 500 matches SSD has facilitated, Erin Stanton—and Susie—talk to dozens of adopters who've learned what a perfect companion a senior dog can be. From Rudy, the 12-year-old Puggle who's a calm and sturdy first dog for two young boys, to Rocky, the shy German Shepherd who now escorts his owner on daily walks around their ranch, Susie's Senior Dogs celebrates dogs from all walks of life. And of course, we'll hear Susie's own story woven throughout! Featuring both internet dog stars like Chloe Kardoggian and Wolfgang, as well as brand-new, never-told stories of senior dogs getting a new lease on life, Susie's Senior Dogs will keep readers smiling and tails wagging! This beautiful, upbeat book includes sidebars, Q&As, Susie's Top Tips and more, making it the perfect keepsake for animal lovers of all ages.

almost home humane society of north central iowa adoption: Animal Modernity: Jumbo the Elephant and the Human Dilemma Susan Nance, 2015-10-08 The concept of 'modernity' is central to many disciplines, but what is modernity to animals? Susan Nance answers this question through a radical reinterpretation of the life of Jumbo the elephant. In the 1880s, consumers, the media, zoos, circuses and taxidermists, and (unknowingly) Jumbo himself, transformed the elephant from an orphan of the global ivory trade and zoo captive into a distracting international celebrity. Citizens on two continents imaged Jumbo as a sentient individual and pet, but were aghast when he died in an industrial accident and his remains were absorbed by the taxidermic and animal rendering industries reserved for anonymous animals. The case of Jumbo exposed the 'human dilemma' of modern living, wherein people celebrated individual animals to cope or distract themselves from the wholesale slaughter of animals required by modern consumerism.

almost home humane society of north central iowa adoption: Albion's Seed David Hackett Fischer, 1991-03-14 This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are Albion's Seed, no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

almost home humane society of north central iowa adoption: Strengthening Forensic Science in the United States National Research Council, Division on Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Policy and Global Affairs, Committee on Science, Technology, and Law, Committee on Identifying the Needs of the Forensic Sciences Community, 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a

detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

almost home humane society of north central iowa adoption: Scientific and Humane Issues in the Use of Random Source Dogs and Cats in Research National Research Council, Division on Earth and Life Studies, Institute for Laboratory Animal Research, Committee on Scientific and Humane Issues in the Use of Random Source Dogs and Cats in Research, 2009-11-30 Scientific and Humane Issues in the Use of Random-Source Dogs and Cats in Research examines the value of random-source animals in biomedical research and the role of Class B dealers who acquire and resell live dogs and cats to research institutions. Findings include that, while some random-source dogs and cats may be necessary and desirable for National Institutes of Health (NIH)-funded research, there is no clear need to obtain those animals from Class B dealers. Several options for random-source animal acquisition already exist and additional options are recommended, which would further ensure the welfare of these animals and foster a positive public image for NIH. While the scientific community has recognized and responded to concerns for humane treatment of animals in research, government oversight has thus far been unable to fully enforce the Animal Welfare Act in regard to Class B dealers of live animals. Although the animals acquired by Class B dealers are destined for research-and NIH research in particular-the standard of care while in the possession of some Class B dealers requires an inordinate amount of government enforcement and is not commensurate with the policies of most NIH-funded research laboratories. This dichotomy of standards reflects poorly on public perceptions of NIH and jeopardizes animal welfare. This book will be crucial for NIH and other groups using random-source animals in research, including veterinary schools and research facilities. Animal welfare advocates, policy makers, and concerned pet owners will also find this a vital and informative work for reconciling the needs of research with the welfare of animals.

almost home humane society of north central iowa adoption: Joan Garry's Guide to Nonprofit Leadership Joan Garry, 2017-03-06 Nonprofit leadership is messy Nonprofits leaders are optimistic by nature. They believe with time, energy, smarts, strategy and sheer will, they can change the world. But as staff or board leader, you know nonprofits present unique challenges. Too many cooks, not enough money, an abundance of passion. It's enough to make you feel overwhelmed and alone. The people you help need you to be successful. But there are so many obstacles: a micromanaging board that doesn't understand its true role; insufficient fundraising and donors who make unreasonable demands; unclear and inconsistent messaging and marketing; a leader who's a star in her sector but a difficult boss... And yet, many nonprofits do thrive. Joan Garry's Guide to Nonprofit Leadership will show you how to do just that. Funny, honest, intensely actionable, and based on her decades of experience, this is the book Joan Garry wishes she had when she led GLAAD out of a financial crisis in 1997. Joan will teach you how to: Build a powerhouse board Create an impressive and sustainable fundraising program Become seen as a 'workplace of choice' Be a compelling public face of your nonprofit This book will renew your passion for your mission and organization, and help you make a bigger difference in the world.

almost home humane society of north central iowa adoption: The North American Model of Wildlife Conservation Shane P. Mahoney, Valerius Geist, 2019-09-10 The foremost experts on the North American Model of Wildlife Conservation come together to discuss its role in the rescue, recovery, and future of our wildlife resources. At the end of the nineteenth century, North America

suffered a catastrophic loss of wildlife driven by unbridled resource extraction, market hunting, and unrelenting subsistence killing. This crisis led powerful political forces in the United States and Canada to collaborate in the hopes of reversing the process, not merely halting the extinctions but returning wildlife to abundance. While there was great understanding of how to manage wildlife in Europe, where wildlife management was an old, mature profession, Continental methods depended on social values often unacceptable to North Americans. Even Canada, a loyal colony of England, abandoned wildlife management as practiced in the mother country and joined forces with like-minded Americans to develop a revolutionary system of wildlife conservation. In time, and surviving the close scrutiny and hard ongoing debate of open, democratic societies, this series of conservation practices became known as the North American Model of Wildlife Conservation. In this book, editors Shane P. Mahoney and Valerius Geist, both leading authorities on the North American Model, bring together their expert colleagues to provide a comprehensive overview of the origins, achievements, and shortcomings of this highly successful conservation approach. This volume • reviews the emergence of conservation in late nineteenth-early twentieth century North America • provides detailed explorations of the Model's institutions, principles, laws, and policies • places the Model within ecological, cultural, and socioeconomic contexts • describes the many economic, social, and cultural benefits of wildlife restoration and management • addresses the Model's challenges and limitations while pointing to emerging opportunities for increasing inclusivity and optimizing implementation Studying the North American experience offers insight into how institutionalizing policies and laws while incentivizing citizen engagement can result in a resilient framework for conservation. Written for wildlife professionals, researchers, and students, this book explores the factors that helped fashion an enduring conservation system, one that has not only rescued, recovered, and sustainably utilized wildlife for over a century, but that has also advanced a significant economic driver and a greater scientific understanding of wildlife ecology. almost home humane society of north central iowa adoption: Your Robot Dog Will Die Arin Greenwood, 2018-04-17 Fusing the heart of Julie of the Wolves with the imagination of Little Brother and Ship Breaker, this speculative YA is a must-read for any dog lover. When a global genetic experiment goes awry and canines stop wagging their tails, mass hysteria ensues and the species is systematically euthanized. But soon, Mechanical Tail comes to the rescue. The company creates replacements for “man’s best friend” and studies them on Dog Island, where 17-year-old Nano Miller was born and raised. Nano’s life has become a cycle of annual heartbreak. Every spring,

she is given the latest robot dog model to test, only to have it torn from her arms a year later. But one day she makes a discovery that upends everything she's taken for granted: a living puppy that miraculously wags its tail. And there is no way she's letting this dog go.

almost home humane society of north central iowa adoption: The Historical Animal
Susan Nance, 2015-09-22 The conventional history of animals could be more accurately described as the history of human ideas about animals. Only in the last few decades have scholars from a wide variety of disciplines attempted to document the lives of historical animals in ways that recognize their agency as sentient beings with complex intelligence. This collection advances the field further, inviting us to examine our recorded history through an animal-centric lens to discover how animals have altered the course of our collective past. The seventeen scholars gathered here present case studies from the Pacific Ocean, Africa, Europe, and the Americas, involving species ranging from gorillas and horses to salamanders and orcas. Together they seek out new methodologies, questions, and stories that challenge accepted historical assumptions and structures. Drawing upon environmental, social, and political history, the contributors employ research from such wide-ranging fields as philosophy and veterinary medicine, embracing a radical interdisciplinarity that is crucial to understanding our nonhuman past. Grounded in the knowledge that there has never been a purely human time in world history, this collection asks and answers an incredibly urgent question for historians and others interested in the nonhuman past: in an age of mass extinctions, mass animal captivity, and climate change, when we know much of what animals have done in the past, which of our activities will we want to change in the future?

almost home humane society of north central iowa adoption: The Circle Dave Eggers, 2013-10-08 INTERNATIONAL BESTSELLER • A bestselling dystopian novel that tackles surveillance, privacy and the frightening intrusions of technology in our lives—a “compulsively readable parable for the 21st century” (Vanity Fair). When Mae Holland is hired to work for the Circle, the world's most powerful internet company, she feels she's been given the opportunity of a lifetime. The Circle, run out of a sprawling California campus, links users' personal emails, social media, banking, and purchasing with their universal operating system, resulting in one online identity and a new age of civility and transparency. As Mae tours the open-plan office spaces, the towering glass dining facilities, the cozy dorms for those who spend nights at work, she is thrilled with the company's modernity and activity. There are parties that last through the night, there are famous musicians playing on the lawn, there are athletic activities and clubs and brunches, and even an aquarium of rare fish retrieved from the Marianas Trench by the CEO. Mae can't believe her luck, her great fortune to work for the most influential company in the world—even as life beyond the campus grows distant, even as a strange encounter with a colleague leaves her shaken, even as her role at the Circle becomes increasingly public. What begins as the captivating story of one woman's ambition and idealism soon becomes a heart-racing novel of suspense, raising questions about memory, history, privacy, democracy, and the limits of human knowledge.

almost home humane society of north central iowa adoption: Good Economics for Hard Times Abhijit V. Banerjee, Esther Duflo, 2019-11-12 The winners of the Nobel Prize show how

economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

It offers flexible guidelines for the care of these animals, and guidance on adapting these guidelines to various situations without hindering the research process. *Guidelines for the Care and Use of Mammals in Neuroscience and Behavioral Research* offers a more in-depth treatment of concerns specific to these disciplines than any previous guide on animal care and use. It treats on such important subjects as: The important role that the researcher and veterinarian play in developing animal protocols. Methods for assessing and ensuring an animal's well-being. General animal-care elements as they apply to neuroscience and behavioral research, and common animal welfare challenges this research can pose. The use of professional judgment and careful interpretation of regulations and guidelines to develop performance standards ensuring animal well-being and high-quality research. *Guidelines for the Care and Use of Mammals in Neuroscience and Behavioral Research* treats the development and evaluation of animal-use protocols as a decision-making process, not just a decision. To this end, it presents the most current, in-depth information about the best practices for animal care and use, as they pertain to the intricacies of neuroscience and behavioral research.

Our world teeters on a knife-edge between a peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years, in the 2030 decade, six powerful 'drivers' will converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic consequences. In the face of both doomsaying and denial over the state of our world, Colin Mason cuts through the rhetoric and reams of conflicting data to muster the evidence to illustrate a broad picture of the world as it is, and our possible futures. Ultimately his message is clear; we must act decisively, collectively and immediately to alter the trajectory of

humanity away from catastrophe. Offering over 100 priorities for immediate action, *The 2030 Spike* serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and prosperous future in which all humans have the opportunity to thrive and build a better civilization. This book is powerful and essential reading for all people concerned with the future of humanity and planet earth.

almost home humane society of north central iowa adoption: *Emergency Medical Services for Children* Institute of Medicine, Committee on Pediatric Emergency Medical Services, 1993-02-01 How can we meet the special needs of children for emergency medical services (EMS) when today's EMS systems are often unprepared for the challenge? This comprehensive overview of EMS for children (EMS-C) provides an answer by presenting a vision for tomorrow's EMS-C system and practical recommendations for attaining it. Drawing on many studies and examples, the volume explores why emergency care for children—from infants through adolescents—must differ from that for adults and describes what seriously ill or injured children generally experience in today's EMS systems. The book points the way to integrating EMS-C into current emergency programs and into broader aspects of health care for children. It gives recommendations for ensuring access to emergency care through the 9-1-1 system; training health professionals, from paramedics to physicians; educating the public; providing proper equipment, protocols, and referral systems; improving communications among EMS-C providers; enhancing data resources and expanding research efforts; and stimulating and supporting leadership in EMS-C at the federal and state levels. For those already deeply involved in EMS efforts, this volume is a convenient, up-to-date, and comprehensive source of information and ideas. More importantly, for anyone interested in improving the emergency services available to children—emergency care professionals from emergency medical technicians to nurses to physicians, hospital and EMS administrators, public officials, health educators, children's advocacy groups, concerned parents and other responsible adults—this timely volume provides a realistic plan for action to link EMS-C system components into a workable structure that will better serve all of the nation's children.

President's Commission on Law Enforcement and Administration of Justice, 1967 This report of the President's Commission on Law Enforcement and Administration of Justice -- established by President Lyndon Johnson on July 23, 1965 -- addresses the causes of crime and delinquency and recommends how to prevent crime and delinquency and improve law enforcement and the administration of criminal justice. In developing its findings and recommendations, the Commission held three national conferences, conducted five national surveys, held hundreds of meetings, and interviewed tens of thousands of individuals. Separate chapters of this report discuss crime in America, juvenile delinquency, the police, the courts, corrections, organized crime, narcotics and drug abuse, drunkenness offenses, gun control, science and technology, and research as an instrument for reform. Significant data were generated by the Commission's National Survey of Criminal Victims, the first of its kind conducted on such a scope. The survey found that not only do Americans experience far more crime than they report to the police, but they talk about crime and the reports of crime engender such fear among citizens that the basic quality of life of many Americans has eroded. The core conclusion of the Commission, however, is that a significant reduction in crime can be achieved if the Commission's recommendations (some 200) are implemented. The recommendations call for a cooperative attack on crime by the Federal Government, the States, the counties, the cities, civic organizations, religious institutions, business groups, and individual citizens. They propose basic changes in the operations of police, schools, prosecutors, employment agencies, defenders, social workers, prisons, housing authorities, and probation and parole officers.

During the frontier days

when Americans battled with and exiled native peoples from the East, Indiana was on the leading edge of America's westward expansion. As waves of immigrants swept across the Appalachians and eastern waterways, Indiana became established as both a crossroads and as a vital part of Middle America. Indiana's stories illuminate the history of American agriculture, wars, industrialization, ethnic conflicts, technological improvements, political battles, transportation networks, economic shifts, social welfare initiatives, and more. In so doing, they elucidate large national issues so that students can relate personally to the ideas and events that comprise American history. At the same time, the stories shed light on what it means to be a Hoosier, today and in the past.

almost home humane society of north central iowa adoption: *The Last Utopia* Samuel Moyn, 2012-03-05 Human rights offer a vision of international justice that today's idealistic millions hold dear. Yet the very concept on which the movement is based became familiar only a few decades ago when it profoundly reshaped our hopes for an improved humanity. In this pioneering book, Samuel Moyn elevates that extraordinary transformation to center stage and asks what it reveals about the ideal's troubled present and uncertain future. For some, human rights stretch back to the dawn of Western civilization, the age of the American and French Revolutions, or the post-World War II moment when the Universal Declaration of Human Rights was framed. Revisiting these episodes in a dramatic tour of humanity's moral history, *The Last Utopia* shows that it was in the decade after 1968 that human rights began to make sense to broad communities of people as the proper cause of justice. Across eastern and western Europe, as well as throughout the United States and Latin America, human rights crystallized in a few short years as social activism and political rhetoric moved it from the hallways of the United Nations to the global forefront. It was on the ruins of earlier political utopias, Moyn argues, that human rights achieved contemporary prominence. The morality of individual rights substituted for the soiled political dreams of revolutionary communism and nationalism as international law became an alternative to popular struggle and bloody violence. But as the ideal of human rights enters into rival political agendas, it requires more vigilance and scrutiny than when it became the watchword of our hopes.

almost home humane society of north central iowa adoption: *Rodeo* Susan Nance, 2020-04-23 What would rodeo look like if we took it as a record, not of human triumph and resilience, but of human imperfection and stubbornness?" asks animal historian Susan Nance. Against the backdrop of the larger histories of ranching, cattle, horses, and the environment in the West, this book explores how the evolution of rodeo has reflected rural western beliefs and assumptions about the natural world that have led to environmental crises and served the beef empire. By unearthing behind-the-scenes stories of rodeo animals as diverse individuals, this book lays bare contradictions within rodeo and the rural West. For almost 150 years, westerners have used rodeo to symbolically reenact their struggles with animals and the land as uniformly progressive and triumphant. Nance upends that view with accounts of individual animals that reveal how diligently rodeo people have worked to make livestock into surrogates for the trials of rural life in the West and the violence in its history. Western horses and cattle were more than just props. Rodeo reclaims their lived history through compelling stories of anonymous roping steers and calves who inspired reform of the sport, such as the famed but abused buckner Steamboat, and the many broncs and bulls, famous or not, who unknowingly built an industry. Rodeo is a dangerous sport that reveals many westerners as people proudly tolerant of risk and violence, and ready to impose these values on livestock. In *Rodeo: An Animal History*, Nance pushes past standard histories and the sport's publicity to show how rodeo was shot through with stubbornness and human failing as much as fortitude and community spirit.

almost home humane society of north central iowa adoption: A Patriot's History of the United States Larry Schweikart, Michael Patrick Allen, 2004-12-29 For the past three decades, many history professors have allowed their biases to distort the way America's past is taught. These intellectuals have searched for instances of racism, sexism, and bigotry in our history while downplaying the greatness of America's patriots and the achievements of "dead white men." As a result, more emphasis is placed on Harriet Tubman than on George Washington; more about the internment of Japanese Americans during World War II than about D-Day or Iwo Jima; more on the dangers we faced from Joseph McCarthy than those we faced from Josef Stalin. A Patriot's History of the United States corrects those doctrinaire biases. In this groundbreaking book, America's discovery, founding, and development are reexamined with an appreciation for the elements of public virtue, personal liberty, and private property that make this nation uniquely successful. This book offers a long-overdue acknowledgment of America's true and proud history.

almost home humane society of north central iowa adoption: Compassion Fatigue in the Animal-care Community Charles R. Figley, Robert G. Roop, 2006

almost home humane society of north central iowa adoption: In the Realm of Hungry Ghosts Gabor Maté, MD, 2011-06-28 A "thought-provoking and powerful" study that reframes everything you've been taught about addiction and recovery—from the New York Times–bestselling author of *The Myth of Normal* (Bruce Perry, author of *The Boy Who Was Raised as a Dog*). A world-renowned trauma expert combines real-life stories with cutting-edge research to offer a holistic approach to understanding addiction—its origins, its place in society, and the importance of self-compassion in recovery. Based on Gabor Maté's two decades of experience as a medical doctor and his groundbreaking work with people with addiction on Vancouver's skid row, this #1 international bestseller radically re-envisioning a much misunderstood condition by taking a compassionate approach to substance abuse and addiction recovery. In the same vein as Bessel van der Kolk's *The Body Keeps the Score*, *In the Realm of Hungry Ghosts* traces the root causes of addiction to childhood trauma and examines the pervasiveness of addiction in society. Dr. Maté presents addiction not as a discrete phenomenon confined to an unfortunate or weak-willed few, but as a continuum that runs throughout—and perhaps underpins—our society. It is not a medical "condition" distinct from the lives it affects but rather the result of a complex interplay among personal history, emotional and neurological development, brain chemistry, and the drugs and behaviors of addiction. Simplifying a wide array of brain and addiction research findings from around the globe, the book avoids glib self-help remedies, instead promoting a thorough and compassionate self-understanding as the first key to healing and wellness. Dr. Maté argues persuasively against contemporary health, social, and criminal justice policies toward addiction and how they perpetuate the War on Drugs. The mix of personal stories—including the author's candid discussion of his own "high-status" addictive tendencies—and science with positive solutions makes the book equally useful for lay readers and professionals.

almost home humane society of north central iowa adoption: The Children's Bureau Legacy Administration on Children, Youth and Families, The Children's Bureau, Administration for Children and Families, U.S. Department of Health and Human Services, 2013-04-01 Comprehensive history of the Children's Bureau from 1912-2012 in eBook form that shares the legacy of this landmark agency that established the first Federal Government programs, research and social reform initiatives aimed to improve the safety, permanency and well-being of children, youth and families. In addition to bios of agency heads and review of legislation and publications, this important book provides a critical look at the evolution of the Nation and its treatment of children as it covers often inspiring and sometimes heart-wrenching topics such as: child labor; the Orphan Trains, adoption and foster care; infant and maternal mortality and childhood diseases; parenting, infant and child care education; the role of women's clubs and reformers; child welfare standards; Aid to Dependent Children; Depression relief; children of migrants and minorities (African

Americans, Hispanics, Native Americans), including Indian Boarding Schools and Indian Adoption Program; disabled children care; children in wartime including support of military families and World War II refugee children; Juvenile delinquency; early childhood education Head Start; family planning; child abuse and neglect; natural disaster recovery; and much more. Child welfare and related professionals, legislators, educators, researchers and advocates, university school of social work faculty and staff, libraries, and others interested in social work related to children, youth and families, particularly topics such as preventing child abuse and neglect, foster care, and adoption will be interested in this comprehensive history of the Children's Bureau that has been funded by the U.S. Federal Government since 1912.

almost home humane society of north central iowa adoption: Animalkind Ingrid Newkirk, Gene Stone, 2021-01-19 The founder and president of PETA, Ingrid Newkirk, and bestselling author Gene Stone explore the wonders of animal life with “admiration and empathy” (The New York Times Book Review) and offer tools for living more kindly toward them. In the last few decades, a wealth of new information has emerged about who animals are: astounding beings with intelligence, emotions, intricate communications networks, and myriad abilities. In *Animalkind*, Ingrid Newkirk and Gene Stone present these findings in a concise and awe-inspiring way, detailing a range of surprising discoveries, like that geese fall in love and stay with a partner for life, that fish “sing” underwater, and that elephants use their trunks to send subsonic signals, alerting other herds to danger miles away. Newkirk and Stone pair their tour through the astounding lives of animals with a guide to the exciting new tools that allow humans to avoid using or abusing animals as we once did. Whether it’s medicine, product testing, entertainment, clothing, or food, there are now better options to all the uses animals once served in human life. We can substitute warmer, lighter faux fleece for wool, choose vegan versions of everything from shrimp to marshmallows, reap the benefits of animal-free medical research, and scrap captive orca exhibits and elephant rides for virtual reality and animatronics. *Animalkind* provides a fascinating look at why our fellow living beings deserve our respect, and lays out the steps everyone can take to put this new understanding into action.

almost home humane society of north central iowa adoption: Introductory Statistics 2e Barbara Illowsky, Susan Dean, 2023-12-13 *Introductory Statistics 2e* provides an engaging, practical, and thorough overview of the core concepts and skills taught in most one-semester statistics courses. Cortes, Eva Hartmann, 2023-05-16 Black & white print. *Principles of Management* is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the *Principles of Management* course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.

almost home humane society of north central iowa adoption: Cats and Conservationists

Dara M. Wald, Anna L. Peterson, 2020-03-15 *Cats and Conservationists* is the first multidisciplinary analysis of the heated debate about free-roaming cats. The debate pits conservationists against cat lovers, who disagree both on the ecological damage caused by the cats and the best way to manage them. An impassioned and spirited conflict, it also sheds light on larger questions about how we interpret science, incorporate diverse perspectives, and balance competing values in order to encourage constructive dialogue on contentious social and environmental issues. On one side of the cat debate stand many environmentalists, especially birders and conservation organizations, who believe that outdoor cats seriously threaten native wildlife. On the other side are many animal welfare advocates, who believe that outdoor cats generally do not pose a major ecological threat and that it is possible for cats and wildlife to coexist. They believe that it is possible, mainly through trap-neuter-return projects (TNR), to keep free-roaming cat populations in check without killing large numbers of cats. Careful analysis suggests that there remain important questions about the science on both cat predation and TNR effectiveness. Yet both sides of the conflict insist that the evidence is clear-cut. This false certainty contributes to conflict between conservationists and cat lovers, and obscures common goals that could generate constructive discussions and collaborative efforts among scientists, policymakers, conservationists, and animal welfare advocates. *Cats and Conservationists* aims to facilitate such collaboration in order to manage outdoor cats and minimize the damage they cause. It also offers models for constructive debates about the public role of science in other polarized public conflicts over science and environmental topics.

almost home humane society of north central iowa adoption: *Sport, Animals, and Society* James Gillett, Michelle Gilbert, 2013-12-17 This book advances current literature on the role and place of animals in sport and society. It explores different forms of sporting spaces, examines how figures of animals have been used to racialize the human athlete, and encourages the reader to think critically about animal ethics, animals in space, time and place, and the human-animal relationship. The chapters highlight persistent dichotomies in the use of and collaboration with animals for sport, and present strategies for moving forward in the study of interspecies relations.
