

almost real a speculative biology zine volume 1 abby howard

A Deep Dive into "Almost Real: A Speculative Biology Zine, Volume 1" by Abby Howard

By Dr. Evelyn Reed, PhD in Evolutionary Biology & Science Communication

Keywords: almost real a speculative biology zine volume 1 abby howard, speculative biology, zine, Abby Howard, evolutionary biology, art and science, creative nonfiction, bio-art, scientific illustration.

Abby Howard's *Almost Real: A Speculative Biology Zine, Volume 1* is not just a collection of drawings; it's a vibrant exploration of the creative potential at the intersection of art and science. This zine, a testament to Howard's talent as a scientific illustrator and her imaginative grasp of evolutionary biology, presents a unique challenge and opportunity for understanding the dissemination of scientific ideas through unconventional media. This review will examine both the strengths and limitations of this approach, considering its impact on the broader field of speculative biology and scientific communication.

The Allure of Speculative Biology in "Almost Real"

Howard's *almost real a speculative biology zine volume 1 abby howard* excels in its presentation of speculative biology. Each creature, meticulously rendered with a blend of scientific accuracy and fantastical flair, invites the reader to consider the evolutionary pressures that might have shaped its form. This isn't mere fantasy; it's an exercise in applying established biological principles to hypothetical scenarios. The zine demonstrates a deep understanding of evolutionary concepts like adaptation, convergence, and divergence, making the fantastical believable through careful design choices. The descriptions accompanying each creature are concise yet informative, hinting at their ecological niche and evolutionary history. This blend of visual storytelling and scientific grounding is a significant strength, effectively engaging both scientific and non-scientific audiences.

Challenges in Communicating Science Through a Zine Format

While the artistic approach of *almost real a speculative biology zine volume 1 abby howard* is undeniably captivating, the zine format presents inherent challenges. The limited space necessitates brevity, potentially sacrificing depth of explanation for visual impact. Complex evolutionary concepts are simplified, which could be misinterpreted by readers lacking a solid background in biology. Furthermore, the lack of formal citations or references limits

the potential for rigorous scientific critique. This is not necessarily a fault, as the zine's primary goal is artistic exploration, but it does circumscribe the work's role within the broader scientific community.

Opportunities for Engaging Wider Audiences

Despite the challenges, *almost real a speculative biology zine volume 1* by Abby Howard presents a significant opportunity for engaging wider audiences with scientific concepts. The zine's accessibility and visually-driven nature bypass the often-intimidating language of academic papers. By presenting complex ideas through visually appealing and easily digestible content, Howard successfully bridges the gap between scientific expertise and public understanding. This is particularly important in an era where scientific literacy is crucial for informed decision-making. The zine's success in this regard highlights the untapped potential of unconventional media for science communication.

The Publisher and Editor's Role

While self-published, the success of *almost real a speculative biology zine volume 1* by Abby Howard highlights the increasing viability of independent publishing in disseminating creative scientific work. Abby Howard, acting as both author and publisher, maintains complete control over the artistic and scientific vision of the zine. This level of creative freedom allows for a more personal and direct connection between the artist and her audience. There is no formal editor listed; however, the high quality of the illustrations and descriptions suggests a rigorous self-editing process.

Conclusion

Almost Real: A Speculative Biology Zine, Volume 1 by Abby Howard is a captivating work that successfully blends art and science. While its brevity and unconventional format present certain limitations, its accessibility and engaging visual style provide a valuable opportunity for communicating scientific concepts to a broader audience. The zine serves as a compelling example of the potential for creative and unconventional approaches to science communication, highlighting the power of visual storytelling in making scientific ideas more engaging and understandable. It successfully bridges the gap between scientific accuracy and artistic expression, demonstrating the potential for art to stimulate scientific curiosity and understanding. Its success speaks to the growing need for innovative and engaging methods of scientific communication, particularly in the rapidly evolving field of speculative biology.

FAQs

1. What makes this zine unique? Its unique blend of scientific accuracy and imaginative speculative biology, presented through beautiful and detailed illustrations.

1. Who is the target audience? The zine appeals to both science enthusiasts and art lovers, particularly those interested in evolutionary biology and speculative design.
1. Where can I purchase the zine? Information on purchasing can likely be found on Abby Howard's website or through online zine retailers.
1. Are there plans for future volumes? This is not explicitly stated in the zine itself, but given its popularity, future volumes are a strong possibility.
1. What level of scientific knowledge is required to understand the zine? While a background in biology helps, the accessible language and visual nature of the zine makes it enjoyable and largely understandable for a general audience.
1. How does the zine contribute to the field of speculative biology? It expands the creative and visual representation of speculative biology, offering new and engaging ways to imagine and explore hypothetical evolutionary paths.
1. What are the limitations of using a zine format for scientific communication? The primary limitation is the brevity and lack of space for detailed explanations and citations, potentially sacrificing depth for accessibility.
1. How does Abby Howard's artistic style contribute to the zine's success? Her detailed and scientifically informed illustrations are crucial in making the speculative creatures believable and engaging, effectively communicating the scientific concepts behind them.
1. Is the zine suitable for educational purposes? It could be used as a supplementary material in educational settings, particularly those focusing on evolutionary biology, creative thinking, and science communication.

almost real a speculative biology zine volume 1 abby howard: Almost Real

Mia Mardikian, Jay Eaton, 2018-04 Almost Real: A Speculative Biology Zine amalgamates 12 different visions together into an anthology magazine that not only inspires the imagination, but is grounded in the anatomical and plausible science of spec bio and evolution. The first volume covers a wide swathe of genres from alien life to hypothetical earth timelines, brought to you by over a dozen incredible creators.

almost real a speculative biology zine volume 1 abby howard: Book of Shadows

Nero O'Reilly, Hye Mardikian, Iris Jay, 2020-01-29 A luxurious art book of queer demon erotica from over 40 talented creators.

almost real a speculative biology zine volume 1 abby howard: *Freedom of Expression*

Kembrew McLeod, 2007 In 1998 the author, a professional prankster, trademarked the phrase freedom of expression to show how the expression of ideas was being restricted. Now he uses intellectual property law as the focal point to show how economic concerns are seriously eroding creativity and free speech.

almost real a speculative biology zine volume 1 abby howard: *Father Ed*

Glenn F. Chesnut, 2015-07-17 The story of Father Ed Dowling, S.J., the Jesuit priest who served for twenty years as sponsor and spiritual guide to Bill Wilson, the co-founder of Alcoholics Anonymous. An icy evening in December 1940 saw the first meeting of two extraordinary spiritual leaders. Father Ed said that the graces he received from meeting Bill Wilson were as great as those he had received from his ordination as a priest, and Bill in turn described encountering the Jesuit as being like a second conversion experience, where he could feel the transcendent presence of God filling the entire room with grace. The good priest taught Wilson about St. Ignatius Loyolas Spiritual Exercises, about the eternal battle between good and evil which the Spanish saint described in that book, and explained the Jesuit understanding of the way we can use our deepest emotions to receive guidance from God while serving on that battlefield. The co-founder of the twelve step movement in turn supplied Father Ed with some of the most valuable tools he possessed for carrying out small group therapy on a wide range of different kinds of troubled people. Together the two men discussed Poulains Graces of Interior Prayer and Bills attempts to make spiritual contact with both spooks and saints, and explored the world of LSD experiences and the teachings of the Catholic, Hindu, and Buddhist mystics in Aldous Huxleys Perennial Philosophy. And we will see how Father Ed, with his deep social conscience, helped Bill W. turn his book on the Twelve Traditions into a Bill of Rights for the twelve step movement, and how he laid out his own spiritual vision of Alcoholics Anonymous at the A.A. International in St. Louis in 1955.

almost real a speculative biology zine volume 1 abby howard: *I Hate You--Don't Leave Me: Third Edition*

Jerold J. Kreisman, Hal Straus, 2021-09-07 The revised and expanded third edition of the bestselling guide to understanding borderline personality disorder—with advice for communicating with and helping the borderline individuals in your life. After more than three decades as the essential guide to borderline personality disorder (BPD), the third edition of I Hate You—Don't Leave Me now reflects the most up-to-date research that has opened doors to the

neurobiological, genetic, and developmental roots of the disorder, as well as connections between BPD and substance abuse, sexual abuse, post-traumatic stress syndrome, ADHD, and eating disorders. Both pharmacological and psychotherapeutic advancements point to real hope for success in the treatment and understanding of BPD. This expanded and revised edition is an invaluable resource for those diagnosed with BPD and their family, friends, and colleagues, as well as professionals and students in the field, and the practical tools and advice are easy to understand and use in your day-to-day interactions with the borderline individuals in your life.

almost real a speculative biology zine volume 1 abby howard: The Audible Past Jonathan Sterne, 2003-03-13 Table of contents

almost real a speculative biology zine volume 1 abby howard: A Cognitive Psychology of Mass Communication Richard Jackson Harris, Fred W. Sanborn, 2009-05-19 In this fifth edition of *A Cognitive Psychology of Mass Communication*, author Richard Jackson Harris continues his examination of how our experiences with media affect the way we acquire knowledge about the world, and how this knowledge influences our attitudes and behavior. Presenting theories from psychology and communication along with reviews of the corresponding research, this text covers a wide variety of media and media issues, ranging from the commonly discussed topics – sex, violence, advertising – to lesser-studied topics, such as values, sports, and entertainment education. The fifth and fully updated edition offers: highly accessible and engaging writing contemporary references to all types of media familiar to students substantial discussion of theories and research, including interpretations of original research studies a balanced approach to covering the breadth and depth of the subject discussion of work from both psychology and media disciplines. The text is appropriate for Media Effects, Media & Society, and Psychology of Mass Media coursework, as it examines the effects of mass media on human cognitions, attitudes, and behaviors through empirical social science research; teaches students how to examine and evaluate mediated messages; and includes mass communication research, theory and analysis.

almost real a speculative biology zine volume 1 abby howard: She Said What? Maria Braden, 2021-11-21 No longer relegated to reporting on society happenings or household hints, women columnists have over the past twenty years surged across the boundary separating the women's or lifestyle sections and into the formerly male bastions of the editorial, financial, medical, and op-ed pages. Where men previously controlled the nation's new organizations, were the chief opinion givers, and defined what is newsworthy, many women newspaper columnists are now nationally syndicated and tackle the same subjects as their male counterparts, bringing with them distinctive styles and viewpoints. Through these frank and lively interviews, Maria Braden explores the lives and work of columnists Erma Bombeck, Jane Brody, Mona Charen, Merlene Davis, Georgie Anne Geyer, Dorothy Gilliam, Ellen Goodman, Molly Ivins, Mary McGrory, Judith (Miss Manners) Martin, Joyce Maynard, Anna Quindlen, and Jane Bryant Quinn. Profiles describe how these writers got started, where they get the nerve to tell the world what they think, how they generate ideas for columns, and what it's like to create under the pressure of deadlines. Representative columns illustrate their distinctive voices, and an introductory essay provides a historical overview of women in journalism, including pioneering women columnists Fanny Fern, Dorothy Thompson, and Sylvia Porter. Braden finds that today's women columnists frequently raise issues or use examples unique to their gender. Because they are likely to have a direct personal connection to current social issues such as abortion, child care, or sexual harassment, they are able to provide fresh perspectives on these provocative topics. In doing so, they are helping to define what is worthy of attention in the '90s and to shape public response. A unique addition to the literature on women in journalism, this book will interest general readers as well as students of journalism, literature, American studies, and women's studies. Aspiring writers will find here role models and practical guidance.

almost real a speculative biology zine volume 1 abby howard: Dada Leah Dickerman, Brigid Doherty, Centre Georges Pompidou, National Gallery of Art (U.S.), Museum of Modern Art (New York, N.Y.), 2005 Edited by Leah Dickerman. Essays by Brigid Doherty, Sabine T. Kriebel, Dorothea Dietrich, Michael R. Taylor, Janine Mileaf and Matthew S. Witkovsky. Foreword by Earl A.

Powell III.

almost real a speculative biology zine volume 1 abby howard: In the Flesh V. Pitts, 2003-05-15 Through an interview-based study, Victoria Pitts has researched the subcultural milieu of contemporary body modification, focusing on the ways sexuality, gender and ethnicity are being reconfigured through new body technologies - not only tattooing, but piercing, cyberpunk and such 'neotribal' practices as scarification. She interprets the stories of sixteen body modifiers (as well as some subcultural magazines and films) using the tools of feminist and queer theory. Pitts not only covers a hot topic but also situates it in a theoretical context.

almost real a speculative biology zine volume 1 abby howard: Genetic Nature/Culture Alan H. Goodman, Deborah Heath, M. Susan Lindee, 2003-11-06 Individual essays address issues raised by the science, politics, and history of race, evolution, and identity; genetically modified organisms and genetic diseases; gene work and ethics; and the boundary between humans and animals. The result is an entree to the complicated nexus of questions prompted by the power and importance of genetics and genetic thinking, and the dynamic connections linking culture, biology, nature, and technoscience. The volume offers critical perspectives on science and culture, with contributions that span disciplinary divisions and arguments grounded in both biological perspectives and cultural analysis.

almost real a speculative biology zine volume 1 abby howard: Black Cultural Traffic Harry Justin Elam, Kennell A. Jackson, 2005-12-02 Fresh takes on key questions in black performance and black popular culture, by leading artists, academics, and critics

almost real a speculative biology zine volume 1 abby howard: Fandom as Methodology Catherine Grant, Kate Random Love, 2019-12-03 An illustrated exploration of fandom that combines academic essays with artist pages and experimental texts. Fandom as Methodology examines fandom as a set of practices for approaching and writing about art. The collection includes experimental texts, autobiography, fiction, and new academic perspectives on fandom in and as art. Key to the idea of "fandom as methodology" is a focus on the potential for fandom in art to create oppositional spaces, communities, and practices, particularly from queer perspectives, but also through transnational, feminist and artist-of-color fandoms. The book provides a range of examples of artists and writers working in this vein, as well as academic essays that explore the ways in which fandom can be theorized as a methodology for art practice and art history. Fandom as Methodology proposes that many artists and art writers already draw on affective strategies found in fandom. With the current focus in many areas of art history, art writing, and performance studies around affective engagement with artworks and imaginative potentials, fandom is a key methodology that has yet to be explored. Interwoven into the academic essays are lavishly designed artist pages in which artists offer an introduction to their use of fandom as methodology. Contributors Taylor J. Acosta, Catherine Grant, Dominic Johnson, Kate Random Love, Maud Lavin, Owen G. Parry, Alice Butler, Soojin Lee, Jenny Lin, Judy Batalion, Ika Willis. Artists featured in the artist pages Jeremy Deller, Ego Ahaïwe Sowinski, Anna Bunting-Branch, Maria Fusco, Cathy Lomax, Kamau Amu Patton, Holly Pester, Dawn Mellor, Michelle Williams Gamaker, The Women of Colour Index Reading Group, Liv Wynter, Zhiyuan Yang

almost real a speculative biology zine volume 1 abby howard: Encyclopedia of Twentieth-Century Photography, 3-Volume Set Lynne Warren, 2005-11-15 The Encyclopedia of Twentieth-Century Photography explores the vast international scope of twentieth-century photography and explains that history with a wide-ranging, interdisciplinary manner. This unique approach covers the aesthetic history of photography as an evolving art and documentary form, while also recognizing it as a developing technology and cultural force. This Encyclopedia presents the important developments, movements, photographers, photographic institutions, and theoretical aspects of the field along with information about equipment, techniques, and practical applications of photography. To bring this history alive for the reader, the set is illustrated in black and white throughout, and each volume contains a color plate section. A useful glossary of terms is also included.

almost real a speculative biology zine volume 1 abby howard: Post-Digital Cultures of the Far Right Maik Fielitz, Nick Thurston, 2018-12-31 How have digital tools and networks transformed the far right's strategies and transnational prospects? This volume presents a unique critical survey of the online and offline tactics, symbols and platforms that are strategically remixed by contemporary far-right groups in Europe and the US. It features thirteen accessible essays by an international range of expert scholars, policy advisors and activists who offer informed answers to a number of urgent practical and theoretical questions: How and why has the internet emboldened extreme nationalisms? What counter-cultural approaches should civil societies develop in response?

almost real a speculative biology zine volume 1 abby howard: Colorblindness, Post-racality, and Whiteness in the United States Sherrow O. Pinder, 2015-12-27 This book problematizes the ways in which the discourses of colorblindness and post-racality are articulated in the age of Obama. Pinder debunks the myth that race does not matter and reconsiders the presumptive hegemony of whiteness through the dialectics of visibility and invisibility of race.

almost real a speculative biology zine volume 1 abby howard: Social Writing/social Media Douglas M. Walls, Stephanie Vie, 2017 Examines the impact of social media on three writing-related themes: publics and audiences, presentation of self and groups, and pedagogy at various levels of higher education.

almost real a speculative biology zine volume 1 abby howard: Human Nutrition Research Gary R. Beecher, 1981

almost real a speculative biology zine volume 1 abby howard: Mammographies Mary K. DeShazer, 2018-05-09 While breast cancer continues to affect the lives of millions, contemporary writers and artists have responded to the ravages of the disease in creative expression. Mary K. DeShazer's book looks specifically at breast cancer memoirs and photographic narratives, a category she refers to as mammographies, signifying both the imaging technology by which most Western women discover they have this disease and the documentary imperatives that drive their written and visual accounts of it. Mammographies argues that breast cancer narratives of the past ten years differ from their predecessors in their bold address of previously neglected topics such as the link between cancer and environmental carcinogens, the ethics and efficacy of genetic testing and prophylactic mastectomy, and the shifting politics of prosthesis and reconstruction. Mammographies is distinctive among studies of contemporary illness narratives in its exclusive focus on breast cancer, its analysis of both memoirs and photographic texts, its attention to hybrid and collaborative narratives, and its emphasis on ecological, genetic, transnational, queer, and anti-pink discourses. DeShazer's methodology—best characterized as literary critical, feminist, and interdisciplinary—includes detailed interpretation of the narrative strategies, thematic contours, and visual imagery of a wide range of contemporary breast cancer memoirs and photographic anthologies. The author explores the ways in which the narratives constitute a distinctive testimonial and memorial tradition, a claim supported by close readings and theoretical analysis that demonstrates how these narratives question hegemonic cultural discourses, empower reader-viewers as empathic witnesses, and provide communal sites for mourning, resisting, and remembering.

almost real a speculative biology zine volume 1 abby howard: The Cornell Widow, 1899

almost real a speculative biology zine volume 1 abby howard: The Transgender-Industrial Complex Scott Howard, 2020-12-07 In his debut book, Nebraskan author Scott Howard exposes the actors financing the institutionalization of transgenderism. Behind the medical research into gender transitioning of children, ubiquitous pride parades, and Drag Queen Story Hours is a lot of money. Sex education, the homosexual and feminist precursor projects, and the global propaganda are all pushed and paid for by very wealthy and well-connected people with motive and will. Howard demonstrates that the transgender phenomenon is far from the grass-roots movement some of its advocates would have the public believe. Impeccably sourced and researched, The Transgender-Industrial Complex pulls the mask off the complex network of influential groups responsible for this inhuman project. Howard takes a deep dive into the murky depths of the Big

Money behind Big Gay, exposing how the concept gained such recognition as well as the goals of the people behind it. At once wide-ranging and specific, advanced and accessible, *The Transgender-Industrial Complex* is essential reading for anyone who wants to understand why every institution with power, and a great many without, are uniform in their inversion of reality, their religion of lies, and their commitment to all that is ugly, broken, and foul. Antelope Hill is proud to present its first original work: Scott Howard's *The Transgender-Industrial Complex*.

almost real a speculative biology zine volume 1 abby howard: *Information, Place, and Cyberspace* Donald G. Janelle, David C. Hodge, 2013-06-29 This book explores how new communication and information technologies combine with transportation to modify human spatial and temporal relationships in everyday life. It targets the need to differentiate accessibility levels among a broad range of social groupings, the need to study disparities in electronic accessibility, and the need to investigate new measures and means of representing the geography of opportunity in the information age. It explores how models based on physical notions of distance and connectivity are insufficient for understanding the new structures and behaviors that characterize current regional realities, with examples drawn from Europe, New Zealand, and North America. While traditional notions of accessibility and spatial interaction remain important, information technologies are dramatically modifying and expanding the scope of these core geographical concepts.

almost real a speculative biology zine volume 1 abby howard: *An Introduction to Christian Economics* Gary North, 1973

almost real a speculative biology zine volume 1 abby howard: *Culture Against Man* Jules Henry, 1965

almost real a speculative biology zine volume 1 abby howard: *Prohibition the Era of Excess* Andrew Sinclair, 2023-07-18 Prohibition: The Era of Excess is a comprehensive examination of the cultural and political factors that led to the passage of the 18th amendment and the rise of the temperance movement in the United States. Sinclair covers the major events and personalities of the era, including Al Capone and the St. Valentine's Day Massacre, and explores the impact of Prohibition on American society. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

almost real a speculative biology zine volume 1 abby howard: *Modern Women: Women Artists at The Museum of Modern Art* Alexandra Schwartz, 2010 This text examines the collection of feminist art in the Museum of Modern Art. It features essays presenting a range of generational and cultural perspectives.

almost real a speculative biology zine volume 1 abby howard: *Zones of Control* Pat Harrigan, Matthew G. Kirschenbaum, 2016-04-15 A look at wargaming's past, present, and future—from digital games to tabletop games—and its use in entertainment, education, and military planning. With examples from *Call of Duty: Modern Warfare*, *Harpoon*, *Warhammer 40,000*, and more! Games with military themes date back to antiquity, and yet they are curiously neglected in much of the academic and trade literature on games and game history. This volume fills that gap, providing a diverse set of perspectives on wargaming's past, present, and future. In *Zones of Control*, contributors consider wargames played for entertainment, education, and military planning, in terms of design, critical analysis, and historical contexts. They consider both digital and especially tabletop games, most of which cover specific historical conflicts or are grounded in recognizable real-world geopolitics. Game designers and players will find the historical and critical contexts often missing from design and hobby literature; military analysts will find connections to game design and

the humanities; and academics will find documentation and critique of a sophisticated body of cultural work in which the complexity of military conflict is represented in ludic systems and procedures. Each section begins with a long anchoring chapter by an established authority, which is followed by a variety of shorter pieces both analytic and anecdotal. Topics include the history of playing at war; operations research and systems design; wargaming and military history; wargaming's ethics and politics; gaming irregular and non-kinetic warfare; and wargames as artistic practice.

almost real a speculative biology zine volume 1 abby howard: *Degenerate Art* , 1991

almost real a speculative biology zine volume 1 abby howard: **Embedded Librarians** Cassandra Kvenild, Kaijsa Calkins, 2014-05-14 Showcases strategies for successfully embedding librarians and library services across higher education. Chapters feature case studies and reports on projects from a wide variety of colleges and universities. --from publisher description.

almost real a speculative biology zine volume 1 abby howard: *The Cambridge History of Science Fiction* Gerry Canavan, Eric Carl Link, 2018-12-31 The first science fiction course in the American academy was held in the early 1950s. In the sixty years since, science fiction has become a recognized and established literary genre with a significant and growing body of scholarship. The Cambridge History of Science Fiction is a landmark volume as the first authoritative history of the genre. Over forty contributors with diverse and complementary specialties present a history of science fiction across national and genre boundaries, and trace its intellectual and creative roots in the philosophical and fantastic narratives of the ancient past. Science fiction as a literary genre is the central focus of the volume, but fundamental to its story is its non-literary cultural manifestations and influence. Coverage thus includes transmedia manifestations as an integral part of the genre's history, including not only short stories and novels, but also film, art, architecture, music, comics, and interactive media.

almost real a speculative biology zine volume 1 abby howard: **Tabula Idem** Iris Jay, Mia Mardikian, Muura, 2017-06-15 An anthology of 22 queer-centric stories by celebrated cartoonists based on the Tarot's major arcana!

almost real a speculative biology zine volume 1 abby howard: **Organization Theory** Kevin A. Carson, 2008 This book applies the economic principles of individualist anarchism, as developed in *Studies in Mutualist Political Economy*, to the study of the large organization. It integrates the insights of mainstream organization theory into that framework, along with those of more radical thinkers like Ivan Illich, Paul Goodman, and R.A. Wilson. Part One examines the ways in which state intervention in the market, including subsidies to the inefficiency costs of large size and regulatory protection against the competitive consequences of inefficiency, skews the size of the predominant business artificially upward to an extent that simply could not prevail in a free market. Part Two examines the effects of such large organizational size on the character of the system as a whole. Part Three examines the internal pathologies and contradictions of organizations larger than a free market could support. And Part Four surveys the potential building blocks of an alternative, decentralized and libertarian economic order.

almost real a speculative biology zine volume 1 abby howard: **The Rise of American Research Universities** Hugh Davis Graham, Nancy Diamond, 2004-09-27 In this important and timely work, Graham and Diamond reassess the success of American universities as research institutions and the role of public funding in their development from the expansionist golden years of the 1950s and '60s, through the austerity measures of the 1970s and the entrepreneurial ethos of the 1980s, to the budget crises universities face in the 1990s.

almost real a speculative biology zine volume 1 abby howard: **Right Research** Geoffrey Rockwell, Oliver Rossier, Chelsea Miya, 2021-04-29 The book is current and interdisciplinary, engaging with recent developments around this topic and including perspectives from sciences, arts, and humanities. It will be a welcome contribution to studies of the Anthropocene as well as studies of research methods and practices. —Sam Mickey, University of S. Francisco Educational institutions play an instrumental role in social and political change, and are responsible for the

environmental and social ethics of their institutional practices. The essays in this volume critically examine scholarly research practices in the age of the Anthropocene, and ask what accountability educators and researchers have in 'righting' their relationship to the environment. The volume further calls attention to the geographical, financial, legal and political barriers that might limit scholarly dialogue by excluding researchers from participating in traditional modes of scholarly conversation. As such, *Right Research* is a bold invitation to the academic community to rigorous self-reflection on what their research looks like, how it is conducted, and how it might be developed so as to increase accessibility and sustainability, and decrease carbon footprint. The volume follows a three-part structure that bridges conceptual and practical concerns: the first section challenges our assumptions about how sustainability is defined, measured and practiced; the second section showcases artist-researchers whose work engages with the impact of humans on our environment; while the third section investigates how academic spaces can model eco-conscious behaviour. This timely volume responds to an increased demand for environmentally sustainable research, and is outstanding not only in its interdisciplinarity, but its embrace of non-traditional formats, spanning academic articles, creative acts, personal reflections and dialogues. *Right Research* will be a valuable resource for educators and researchers interested in developing and hybridizing their scholarly communication formats in the face of the current climate crisis.

almost real a speculative biology zine volume 1 abby howard: *Samuel Gridley Howe, Social Reformer, 1801-1876* Harold Schwartz, 1956 This readable book is the first authoritative biography of Samuel Gridley Howe, the remarkable Bostonian who actively participated in most of the major reform movements of the nineteenth century. He founded the Perkins School for the Blind which quickly became the foremost institution of its type in the world. There he developed techniques for teaching the deaf-blind, the first man in history to succeed in this field. He supported Horace Mann in reforming the public school system and Dorothea Dix in protecting the interests of the insane. After 1845, he spent most of his energies, political and literary, in abolitionist activities. Yet he found time to give his medical services in the Greek war of independence 1825-1830, and in our Civil War; and he worked on the presidential commission sent to Santo Domingo in 1871. Schwartz traces Howe's public career, but he also describes Howe's childhood, his choice of a medical career, his membership--together with Longfellow, Cornelius Felton, Charles Sumner, and George Hillard--in the social circle called the Five of Clubs, and his marriage to Julia Ward. This book carries the full flavor of mid-nineteenth-century Boston. Howe's own activities, the reform movements he supported, and the striking individuals with whom he was associated are merged into one integrated story. The spotlight often shifts from Howe to Horace Mann, John Brown, Theodore Parker, Laura Bridgman, and--most of all--Charles Sumner; and in the background we can see the slow development of the slavery issue, which eventually overrode all other reform movements. Here too is the story of a marriage: Julia Ward Howe led but half a life with a husband whose ideas about a woman's place did not stretch to include her talents. Schwartz bases his admirable biography on extensive research in primary, and largely untouched, sources: these include the Howe papers--which contain many letters to Mann, Parker, and Sumner, and never used by their biographers--the Sumner and Laura Bridgman papers, and contemporary newspapers as well as Howe's own books, pamphlets, and

articles. Schwartz is thus able to cast new light on the personalities of the Bostonian reformers: harsh, sanctimonious, or unfair as they might appear to their opponents, they were, Schwartz reminds us, basically earnest men who, by acting on their faith in progress and their sense of duty to the helpless did, in fact, improve the lot of humanity.
