Solotaroff, Rohini Prabha Pande, 2014-09-04 This report documents the dynamics of violence against women in South Asia across the life cycle, from early childhood to old age. For each stage and type of violence, the report critically reviews existing research from Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, and Sri Lanka, supplemented by original analysis and select literature from outside the region. Finally, the report identifies critical gaps in research, program evaluations, and interventions in order to provide strategic recommendations for policy makers, civil society, and other stakeholders working to mitigate violence against women in South Asia.

While the postcolonial Indian state dispossessed land mostly for public-sector industry and infrastructure, since the 1990s state governments have become land brokers for private real estate capital. Using the case of a village in Rajasthan that was dispossessed for a private Special Economic Zone, the book ethnographically illustrates the exclusionary trajectory of capitalism driving dispossession in contemporary India. Taking us into the lives of diverse villagers in Rajpura, the book meticulously documents the destruction of agricultural livelihoods, the marginalization of rural labor, the spatial unevenness of infrastructure provision, and the dramatic consequences of real estate speculation for social inequality and village politics. Illuminating the structural underpinnings of land struggles in contemporary India, this book will resonate in any place where land grabs have fueled conflict in recent years.

alok ahuja political party: No Shadow of a Doubt Daniel Kennefick, 2021-03-09 On their 100th anniversary, the story of the extraordinary scientific expeditions that ushered in the era of relativity. In 1919, British scientists led extraordinary expeditions to Brazil and Africa to test Albert Einstein's revolutionary new theory of general relativity in what became the century's most celebrated scientific experiment. The result ushered in a new era and made Einstein a global celebrity by confirming his dramatic prediction that the path of light rays would be bent by gravity. Today, Einstein's theory is scientific fact. Yet the effort to weigh light by measuring the gravitational deflection of starlight during the May 29, 1919, solar eclipse has become clouded by myth and skepticism. Could Arthur Eddington and Frank Dyson have gotten the results they claimed? Did the pacifist Eddington falsify evidence to foster peace after a horrific war by validating the theory of a German antiwar campaigner? In No Shadow of a Doubt, Daniel Kennefick provides definitive answers by offering the most comprehensive and authoritative account of how expedition scientists overcame war, bad weather, and equipment problems to make the experiment a triumphant success. The reader follows Eddington on his voyage to Africa through his letters home, and delves with Dyson into how the complex experiment was accomplished, through his notes. Other characters include Howard Grubb, the brilliant Irishman who made the instruments; William Campbell, the American astronomer who confirmed the result; and Erwin Findlay-Freundlich, the German whose attempts to perform the test in Crimea were foiled by clouds and his arrest. By chronicling the expeditions and their enormous impact in greater detail than ever before, No Shadow of a Doubt reveals a story that is even richer and more exciting than previously known.

Unfortunately too often elections around the globe are deeply flawed or even fail. Why does this matter? It is widely suspected that such contests will undermine confidence in elected authorities, damage voting turnout, trigger protests, exacerbate conflict, and occasionally lead to regime change. Well-run elections, by themselves, are insufficient for successful transitions to democracy. But flawed, or even failed, contests are thought to wreck fragile progress. Is there good evidence for these claims? Under what circumstances do failed elections undermine legitimacy? With a global perspective, using new sources of data for mass and elite evidence, this book provides fresh insights into these major issues.

This third edition is devoted to modern risk analysis based on quantitative methods and textual analytics to meet the current challenges in banking and finance. It includes 14 new contributions and presents a comprehensive, state-of-the-art treatment of cutting-edge methods and topics, such as collateralized debt obligations, the high-frequency analysis of market liquidity, and realized volatility. The book is divided into three parts: Part 1 revisits important market risk issues, while Part 2 introduces novel concepts in credit risk and its management along with updated quantitative methods. The third part discusses the dynamics of risk management and includes risk analysis of energy markets and for cryptocurrencies. The unique synthesis of theory and practice supported by computational tools is reflected not only in the selection of topics, but also in the fine balance of scientific contributions on practical implementation and theoretical concepts. This link between theory and practice offers theoreticians insights into considerations of applicability and, vice versa, provides practitioners convenient access to new techniques in quantitative finance. Hence the book will appeal both to researchers, including master and PhD students, and practitioners, such as financial engineers. It sheds light on schools that make the learning process fun for the teacher as well as the taught, in contrast to the whirl of examination-oriented learning in mainstream schools. The researched data on alternative schools in the country offer the reader an array of institutions all over the country, where efforts are being made to move away from traditional and mainstream learning. It includes exclusive articles by leading practitioners in the field, who offer an insight into the ground reality when a certain philosophy is applied to a school, and also experiential accounts of how such alternative practices mould the learner, teacher and impact the parent as well. The book also consists of a directory of alternative schools in India, including many schools that are tucked away in remote corners of the country. Interestingly, the common thread binding these ‘alternative schools’ is concern for the welfare of the child by teachers who see their work as much more than a job.

alok ahuja political party: What Ails the IAS and Why It Fails to Deliver Naresh Chandra Saxena, 2019-11-14 An unorthodox and maverick administrator, the author worked in top policy positions, but the system rejected the reforms that he advocated. In his career he followed the economic philosophy of 'socialism for the poor and free market for the rich'. However, the political and administrative system in India seemed to believe in 'indifference to the poor and control over the rich to facilitate rent seeking'. The book is full of anecdotes ranging from how the author resisted political corruption that led to the Prime Minister's annoyance to a situation when the author himself 'bribed' the Chief Minister to scrap oppressive laws against tribal women. As Joint Secretary, Minorities Commission, the author exposed the communal bias of the district administration in handling riots in Meerut; he was punished for bringing to light the killing of innocent Muslim women and children by the police. When Bihar became a 'failed state' during the Lalu Prasad Yadav era of 1990-2005, the author did not hesitate in rebuking the Chief Secretary who was his senior in service, and accused IAS officials in Bihar of behaving like English-speaking politicians. Despite their high integrity, hard work and competence, IAS officials do not exercise sufficient control over the field staff who collude with the junior staff in reporting false figures on hunger deaths, malnutrition and usage of toilets, leading to erosion of accountability. Not only do many welfare programmes such as NREGA, ICDS and PDS have design flaws, governance in India at the state and district levels is also quite weak, manifesting itself in poor service delivery, uncaring administration, corruption, and uncoordinated and wasteful public expenditure. Analysing the present Indian situation, the book suggests policy changes in all cross-cutting systemic issues such as the role of politicians, tenure, size and nature of Indian bureaucracy, accountability, monitoring of programmes and civil service reforms, which will transform individual competencies of IAS officers into better collective outcomes.
