alterations in various aspects of society over time: Applied Sociology Ms. Pamela Shalini Joseph, Prof. Bhuvaneshwari, Ms. Ruby Singh, Dr. Sudhir Kumar Khuntia, Mrs. Neelofur Ibran Ali, 2023-08-10 Sociology is the study of groups and group interactions, societies and social interactions. A group is any collection of at least two people who interact with some frequency and who share some sense of aligned identity. A group of people who live in a defined geographic area, who interact with one another, and who share a common culture is what sociologists call a society. The term Sociology was coined by Auguste Comte, a French philosopher, in 1839. The teaching of sociology as a separate discipline started in 1876 in the United States, in 1889 in France, in 1907 in Great Britain, after World War I in Poland and India, in 1925 in Egypt and Mexico, and in 1947 in Sweden. Sociology is the youngest of all the Social Sciences. The word Sociology is derived from the Latin word 'societies' meaning 'society' and the Greek word 'logos' are meaning 'study or science'. The etymological meaning of 'sociology' is thus the 'science of society'. In other words, Sociology is the study of man's behaviour in groups or the inter-action among human beings, social relationships and the processes by which human group activity takes place.

alterations in various aspects of society over time: Indigenous and Minority Populations Sylvanus Barnabas, 2023-06-21 The sections and chapters contained in this book deal with issues and challenges facing indigenous and minority populations located in several geographical areas of the world. The papers are written by writers and scholars from various parts of the world and, like any piece of literature on indigenous and minority populations, the topics are diverse. The perspectives are both interdisciplinary and multi-disciplinary. The issues examined in the various chapters cover areas pertaining to their human rights, preservation of their culture and identity, traditional knowledge, and their challenges, but also scholarly and epistemological approaches to understanding and articulating such topics in academic contexts. Indeed, the issues around indigenous and minority populations across the world transcend their human rights concerns in relation to dominant groups and institutions within the territorial boundaries of the modern states where they currently live. These issues are cultural, anthropological, sociological, philosophical and epistemological, as well as historical. Any scholarly piece of work on indigenous and minority populations is therefore inevitably inter-disciplinary, multi-disciplinary or both. The various topics examined by the authors epitomize this diversity of issues around such populations. The book is a significant source of information for students, academics, practitioners, policymakers, government officials and non-governmental organisations working on issues that pertain to such populations at national, regional and global levels.
