1900 meadowville technology parkway: The Backcountry Towns of Colonial Virginia Christopher E. Hendricks, 2006 Hendricks writes on how towns in backcountry Virginia came about from the designs and ambitions of entrepreneurial individuals. They did not just spring up randomly in some pleasing meadow or on some riverbank happened upon by a frontiersman, for example, or a group which had struck out into the wilderness. The people who put these plans [for towns] into action were motivated by a variety of economic, social, or philanthropic factors and sometimes purely by circumstance and opportunity. These entrepreneurial-like individuals were not a part of any organized movement. But their activities in toto played a large part in opening up the western parts of Virginia and setting a pattern for westward expansion. Among the towns Hendricks studies in larger topological areas such as the Piedmont and the Great Valley (Shenandoah) are Winchester, Marysville, Leesburg, Woodstock, Charlottesville, and Brent Town. Early maps of many of the towns especially demonstrate the ideas and purposes of their founders. Along with the maps, the authors specifics on the conception, establishment, and early period of the many towns makes each oe stand out distinctively. The enterprises and goals of the town were as varied as the individuals who conceived them.

Following the war he settled in the Piedmont, but by 1785 his yearning to return westward led him to take his family to Kentucky, where they settled for a few years in the upper Green River country. He recorded his narrative in 1827, in the town of Columbia, of which he was a founder. A keen observer of people and events, Trabue captures experiences of everyday life in both the Piedmont and frontier Kentucky. His notes on the settling of Kentucky touch on many important moments in the opening of the Bluegrass region.

1900 meadowville technology parkway: The Protestant International and the Huguenot Migration to Virginia David E. Lambert, 2010 In 1700, King William III assigned Charles de Saily to accompany Huguenot refugees to Manakin Town on the Virginia frontier. The existing explanation for why this migration was necessary is overly simplistic and seriously conflated. Based largely on English-language sources with an English Atlantic focus, it contends that King William III, grateful to the French Protestant refugees who helped him invade England during the Glorious Revolution (1688) and win victory in Ireland (1691), rewarded these refugees by granting them 10,000 acres in Virginia on which to settle. Using French-language sources and a wider, more European focus than existing interpretations, this book offers an alternative explanation. It delineates a Huguenot refugee resettlement network within a «Protestant International», highlighting the patronage of both King William himself and his valued Huguenot associate, Henri de Ruvigny (Lord Galway). By 1700, King William was politically battered by the interwoven pressures of an English reaction against his high-profile foreign favorites (Galway among them) and the Irish land grants he had awarded to close colleagues (to Galway and others). This book asserts that King William and Lord Galway sponsored the Manakin Town migration to provide an alternate location for Huguenot military refugees in the worst-case scenario that they might lose their Irish refuge.

1900 meadowville technology parkway: Ploughshares Into Swords James Sidbury, 1997-10-13 During the summer of 1800, slaves in and around Richmond conspired to overthrow their masters and abolish slavery. This book uses Gabriel's Conspiracy, and the evidence produced during the repression of the revolt, to expose the processes through which Virginians of African descent built an oppositional culture. Sidbury portrays the rich cultures of eighteenth-century black Virginians, and the multiple, and sometimes conflicting, senses of identity that emerged among enslaved and free people living in and around the rapidly growing state capital. The book also examines the conspirators' vision of themselves as God's chosen people, and the complicated African and European roots of their culture. In so doing, it offers an alternative interpretation of the meaning of the Virginia that was home to so many of the Founding Fathers. This narrative focuses on the history and perspectives of black and enslaved people, in order to develop 'Gabriel's Virginia' as a counterpoint to more common discussions of 'Jeffersonian Virginia'.

1900 meadowville technology parkway: Hidden History of Richmond Walter S. Griggs Jr., 2012-08-28 The lesser-known tales of the personalities who shaped the capital's past are unearthed from the archives by Richmond Guide writer Walter S. Griggs Jr. The course of Richmond's history as it emerged from the Civil War as a bustling economic powerhouse is well recorded. Yet there are some stories that have all but vanished from recollection. From the hushed whispers of an entire congregation as Robert E. Lee prayed with a slave at communion to the donation of over two hundred pigeons by fellow Richmonders to serve the war effort, these are lost vignettes of Richmond. Travel with Griggs to the bygone days of the twentieth century to test-drive the first successful automobile manufactured in Richmond, the Kline Kar, or witness the first airplane to fly over Richmond, the Gold Bug soaring over the Diamond. Hidden History of Richmond is a fascinating collection that reveals the city's forgotten but most remarkable histories.

this history, Helen C. Roundtree traces events that shaped the lives of the Powhatan Indians of Virginia, from their first encounter with English colonists, in 1607, to their present-day way of life and relationship to the state of Virginia and the federal government. Roundtree's examination of those four hundred years misses not a beat in the pulse of Powhatan life. Combining meticulous scholarship and sensitivity, the author explores the diversity always found among Powhatan people, and those people's relationships with the English, the government of the fledgling United States, the Union and the Confederacy, the U.S. Census Bureau, white supremacists, the U.S. Selective Service, and the civil rights movement.

1900 meadowville technology parkway: *Design After Decline* Brent D. Ryan, 2012-05-22
Almost fifty years ago, America's industrial cities—Detroit, Philadelphia, Cleveland, Baltimore, and others—began shedding people and jobs. Today they are littered with tens of thousands of abandoned houses, shuttered factories, and vacant lots. With population and housing losses continuing in the wake of the 2007 financial crisis, the future of neighborhoods in these places is precarious. How we will rebuild shrinking cities and what urban design vision will guide their future remain contentious and unknown. In *Design After Decline*, Brent D. Ryan reveals the fraught and intermittently successful efforts of architects, planners, and city officials to rebuild shrinking cities following mid-century urban renewal. With modern architecture in disrepute, federal funds scarce, and architects and planners disengaged, politicians and developers were left to pick up the pieces. In twin narratives, Ryan describes how America's two largest shrinking cities, Detroit and Philadelphia, faced the challenge of design after decline in dramatically different ways. While Detroit allowed developers to carve up the cityscape into suburban enclaves, Philadelphia brought back 1960s-style land condemnation for benevolent social purposes. Both Detroit and Philadelphia succeeded in rebuilding but at the cost of innovative urban design and planning. Ryan proposes that the unprecedented crisis facing these cities today requires a revival of the visionary thinking found in the best modernist urban design, tempered with the lessons gained from post-1960s community planning. Depicting the ideal shrinking city as a shifting patchwork of open and settled areas, Ryan concludes that accepting the inevitable decline and abandonment of some neighborhoods, while rebuilding others as new neighborhoods with innovative design and planning, can reignite modernism's spirit of optimism and shape a brighter future for shrinking cities and their residents.

1900 meadowville technology parkway: *Thomas Jefferson and Sally Hemings* Annette Gordon-Reed, 1998-03-29
When Annette Gordon-Reed's groundbreaking study was first published, rumors of Thomas Jefferson's sexual involvement with his slave Sally Hemings had circulated for two centuries. Among all aspects of Jefferson's renowned life, it was perhaps the most hotly contested topic. The publication of *Thomas Jefferson and Sally Hemings* intensified this debate by identifying glaring inconsistencies in many noted scholars' evaluations of the existing evidence. In this study, Gordon-Reed assembles a fascinating and convincing argument: not that the alleged thirty-eight-year liaison necessarily took place but rather that the evidence for its taking place has been denied a fair hearing. Friends of Jefferson sought to debunk the Hemings story as early as 1800, and most subsequent historians and biographers followed suit, finding the affair unthinkable based upon their view of Jefferson's life, character, and beliefs. Gordon-Reed responds to these critics by pointing out numerous errors and prejudices in their writings, ranging from inaccurate citations, to impossible time lines, to virtual exclusions of evidence—especially evidence concerning the Hemings family. She demonstrates how these scholars may have been misguided by their own biases and may even have tailored evidence to serve and preserve their opinions of Jefferson. This updated edition of the book also includes an afterword in which the author comments on the DNA study that provided further evidence of a Jefferson and Hemings liaison. Possessing both a layperson's unfettered curiosity and a lawyer's logical mind, Annette Gordon-Reed writes with a style and compassion that are irresistible. Each chapter revolves around a key figure in the Hemings drama, and the resulting portraits are engrossing and very personal. Gordon-Reed also brings a keen intuitive sense of the psychological complexities of human relationships—relationships that, in the real world, often develop regardless of status or race. The most compelling element of all, however,

is her extensive and careful research, which often allows the evidence to speak for itself. Thomas Jefferson and Sally Hemings: An American Controversy is the definitive look at a centuries-old question that should fascinate general readers and historians alike.

1900 meadowville technology parkway: Black Coal Miners in America Ronald L. Lewis, 1987-01-01 From the early day of mining in colonial Virginia and Maryland up to the time of World War II, blacks were an important part of the labor force in the coal industry. Yet in this, as in other enterprises, their role has heretofore been largely ignored. Now Roland L. Lewis redresses the balance in this comprehensive history of black coal miners in America. The experience of blacks in the industry has varied widely over time and by region, and the approach of this study is therefore more comparative than chronological. Its aim is to define the patterns of race relations that prevailed among the m.

1900 meadowville technology parkway: The Sound of Freedom Raymond Arsenault, 2009-07-01 Few moments in Civil Rights history are as important as the morning of Sunday April 9, 1939 when Marian Anderson sang before a throng of thousands lined up along the Mall by the Lincoln Memorial. She had been banned from the Daughters of the American Revolution's Constitution Hall because she was black. When Eleanor Roosevelt, who resigned from the DAR over the incident, took up Anderson's cause, however, it became a national issue. The controversy showed Americans that discrimination was not simply a regional problem. As Arsenault shows, Anderson's dignity and courage enabled her, like a female Jackie Robinson - but several years before him - to strike a vital blow for civil rights. Today the moment still resonates. Postcards and CDs of Anderson are sold at the Memorial and Anderson is still considered one of the greats of 20th century American music. In a short but richly textured narrative, Raymond Arsenault captures the struggle for racial equality in pre-WWII America and a moment that inspired blacks and whites alike. In rising to the occasion, he writes, Marion Anderson consecrated the Lincoln Memorial as a shrine of freedom. In the 1963 March on Washington Martin Luther King would follow, literally, in her footsteps.
