1993 ford mustang lx 50 l v8 manual sedan: *Go Like Hell* A J Baime, 2011-08-31 Coming to cinemas in November 2019, under the title *LE MANS '66* In the 1960s Enzo Ferrari emerged as the dominant force in sports cars in the world, creating speed machines that were unbeatable on the race track. In America, the Ford Motor Company was quickly losing ground as the pre-eminent brand. Henry Ford II saw a solution. He decided to declare war on Ferrari, to build a faster car than anything Ferrari had brought to the track, and to beat him at the world's biggest race, Le Mans. Ferrari was just as determined to see off this challenge from across the Atlantic. With practically no safety regulations in place in the European Grand Prix races, horrific accidents were routine, with both drivers and spectators killed in many races. The stakes were incredibly high, money and men were thrown at the competition, neither Ford or Ferrari would accept anything but victory. The battle to become the fastest in the world truly became a race to the death.

Wade Browne, 1868 Although accounts of overlanding expeditions had been published previously, Browne points out in his Preface that a specific guide was still lacking: The object of this book is to give a true and graphic account of the trade of S2OverlandingS3 as carried out in the Australian colonies. The author has tried to set before the reader a fair sketch of the S2OverlanderS3 himself, his occupation, his difficulties, and the people he employs however small its merits, it may at any rate obtain some credit for novelty, as he believes it to be a subject as yet never touched upon. S3 Brownes book, a practical guide to herding cattle and sheep through rough terrain in Australia, is filled with valuable advice for adverse local conditions. Overlanding in Australia covers all aspects of the trade, from dingo attacks to the laws of branding and ownership of stock. The author discusses the use of dogs in controlling stock on the move, pastures in Australia, surviving drought and special problems posed by crossing rivers and losing sheep in the bush. Of special interest is a discussion of (sometimes tense) relations between squatters and stockmen moving cattle across the landscape.
