1997 events in history: Vocative Constructions in the Language of Shakespeare Beatrix Busse, 2006-11-08 This study investigates the functions, meanings, and varieties of forms of address in Shakespeare's dramatic work. New categories of Shakespearean vocatives are developed and the grammar of vocatives is investigated in, above, and below the clause, following morpho-syntactic, semantic, lexicographical, pragmatic, social and contextual criteria. Going beyond the conventional paradigm of power and solidarity and with recourse to Shakespearean drama as both text and performance, the study sees vocatives as foregrounded experiential, interpersonal and textual markers. Shakespeare's vocatives construe, both quantitatively and qualitatively, habitus and identity. They illustrate relationships or messages. They reflect Early Modern, Shakespearean, and intra- or inter-textual contexts. Theoretically and methodologically, the study is interdisciplinary. It draws on approaches from (historical) pragmatics, stylistics, Hallidayean grammar, corpus linguistics, cognitive linguistics, socio-historical linguistics, sociology, and theatre semiotics. This study contributes, thus, not only to Shakespeare studies, but also to literary linguistics and literary criticism.

1997 events in history: The Great Ordovician Biodiversification Event B. D. Webby, 2004 Two of the greatest evolutionary events in the history of life on Earth occurred during Early Paleozoic time. Andor, 1999-02-28 An area in the midst of deep change, Southern Africa was in turmoil a short decade ago, its politics framed by white versus black, colonialism versus decolonialism, majority rule versus minority rights. With new political discourses beginning in the early 1990s, the mood today is one of interdependencies between the SADC member countries. To enhance one's understanding of the area, this book provides a comprehensive guide to the history of Southern Africa since the demise of colonialism. 1997 events in history: Rebirth of a Culture Hillary Hope Herzog, Todd Herzog, Benjamin Lapp, 2008-08-01 After 1945, Jewish writing in German was almost unimaginable—and then only in reference to the Shoah. Only in the 1980s, after a period of mourning, silence, and processing of the trauma, did a new Jewish literature evolve in Germany and Austria. This volume focuses on the re-emergence of a lively Jewish cultural scene in the German-speaking countries and the various cultural forms of expression that have developed around it. Topics include current debates such as the emergence of a post-Waldheim Jewish discourse in Austria and Jewish responses to German unification and the Gulf wars. Other significant themes addressed are the memorialization of the Holocaust in Berlin and Vienna, the uses of Kafka in contemporary German literature, and the German and American-Jewish dialogue as representative of both the history of exile and the globalization of postmodern civilization. The volume is enhanced by contributions from some of the most significant representatives of German-Jewish writing today such as Esther Dischereit, Barbara Honigmann, Jeanette Lander, and Doron Rabinovici. The result is a lively dialogue between European and North American scholars and writers that captures the complexity and dynamism of Jewish culture in Germany and Austria at the turn of the twenty-first century.

1997 events in history: Signs of a Colonial Era , 2009-01-01 In the street names of Hong Kong, a rich history of the city can be found. The authors, in this illustrated book, explore that history as they explain the origins and meanings of those names. Through their exhaustive research, *Signs from a Colonial Era* provides the stories behind the well-known streets and those that are obscure and puzzling. But a few have resisted their efforts, so there is a chapter of mysteries to intrigue and challenge the reader. This is a book to be read in two ways. From the front you can find all the streets named after royalty, or governors, or other groups such as taipans, and see the naming of streets as a narrative of Hong Kong's development and society. In the other direction, starting from the index, it can be used as a reference book to find the answers to those names that have long puzzled you. The bilingual author team gives the Chinese street names, exploring those that were just chosen to sound like the English name and sometimes changed to avoid unfortunate Cantonese meanings, and those others for which the Chinese name has no connection with the English one. This is a book for everyone who has ever puzzled over a street name as they explore Hong Kong.

1997 events in history: Generations and Collective Memory Amy Corning, Howard Schuman, 2015-08-31 When discussing large social trends or experiences, we tend to group people into generations. But what does it mean to be part of a generation, and what gives that group meaning and coherence? It's collective memory, say Amy Corning and Howard Schuman, and in *Generations and Collective Memory*, they draw on an impressive range of research to show how generations share memories of formative experiences, and how understanding the way those memories form and change can help us understand society and history. Their key finding—built on historical research and interviews in the United States and seven other countries (including China, Japan, Germany, Lithuania, Russia, Israel, and Ukraine)—is that our most powerful generational memories are of shared experiences in adolescence and early adulthood, like the 1963 Kennedy assassination for those born in the 1950s or the fall of the Berlin Wall for young people in 1989. But there are exceptions to that rule, and they're significant: Corning and Schuman find that epochal events in a country, like revolutions, override the expected effects of age, affecting citizens of all ages with a similar power and lasting intensity. The picture Corning and Schuman paint of collective memory and its formation is fascinating on its face, but it also offers intriguing new ways to think about the rise and fall of historical reputations and attitudes toward political issues.

1997 events in history: The Great Inflation Michael D. Bordo, Athanasios Orphanides, 2013-06-28 Controlling inflation is among the most important objectives of economic policy. By maintaining price stability, policy makers are able to reduce uncertainty, improve price-monitoring mechanisms, and facilitate more efficient planning and allocation of resources, thereby raising productivity. This volume focuses on understanding the causes of the Great Inflation of the 1970s and '80s, which saw rising inflation in many nations, and which propelled interest rates across the

developing world into the double digits. In the decades since, the immediate cause of the period's rise in inflation has been the subject of considerable debate. Among the areas of contention are the role of monetary policy in driving inflation and the implications this had both for policy design and for evaluating the performance of those who set the policy. Here, contributors map monetary policy from the 1960s to the present, shedding light on the ways in which the lessons of the Great Inflation were absorbed and applied to today's global and increasingly complex economic environment.

1997 events in history: *White Love and Other Events in Filipino History* Vicente L. Rafael, 2014-06-18 In this wide-ranging cultural and political history of Filipinos and the Philippines, Vicente L. Rafael examines the period from the onset of U.S. colonialism in 1898 to the emergence of a Filipino diaspora in the 1990s. Self-consciously adopting the essay form as a method with which to disrupt epic conceptions of Filipino history, Rafael treats in a condensed and concise manner clusters of historical detail and reflections that do not easily fit into a larger whole. *White Love and Other Events in Filipino History* is thus a view of nationalism as an unstable production, as Rafael reveals how, under what circumstances, and with what effects the concept of the nation has been produced and deployed in the Philippines. With a focus on the contradictions and ironies that suffuse Filipino history, Rafael delineates the multiple ways that colonialism has both inhabited and enabled the nationalist discourse of the present. His topics range from the colonial census of 1903-1905, in which a racialized imperial order imposed by the United States came into contact with an emergent revolutionary nationalism, to the pleasures and anxieties of nationalist identification as evinced in the rise of the Marcos regime. Other essays examine aspects of colonial domesticity through the writings of white women during the first decade of U.S. rule; the uses of photography in ethnology, war, and portraiture; the circulation of rumor during the Japanese occupation of Manila; the reproduction of a hierarchy of languages in popular culture; and the spectral presence of diasporic Filipino communities within the nation-state. A critique of both U.S. imperialism and Filipino nationalism, *White Love and Other Events in Filipino History* creates a sense of epistemological vertigo in the face of former attempts to comprehend and master Filipino identity. This volume should become a valuable work for those interested in Southeast Asian studies, Asian-American studies, postcolonial studies, and cultural studies.

1997 events in history: *Memory and Methodology* Susannah Radstone, 2020-06-03 The increasing centrality of memory to work being done across a wide range of disciplines has brought along with it vexed questions and far-reaching changes in the way knowledge is pursued. This timely collection provides a forum for demonstrating how various disciplines are addressing these concerns. Is an historian's approach to memory similar to that of theorists in media or cultural studies, or are their understandings in fact contradictory? Which methods of analysis are most appropriate in which contexts? What are the relations between individual and social memory? Why should we study memory and how can it enrich other research? What does its study bring to our understanding of subjectivity, identity and power? In addressing these knotty questions, *Memory*

and Methodology showcases a rich and diverse range of research on memory. Leading scholars in anthropology, history, film and cultural studies address topics including places of memory; trauma, film and popular memory; memory texts; collaborative memory work and technologies of memory. This timely and interdisciplinary study represents a major contribution to our understanding of how memory is shaping contemporary academic research and of how people shape and are shaped by memory.

1997 events in history: Fossil Legends of the First Americans Adrienne Mayor, 2023-04-11

The burnt-red badlands of Montana's Hell Creek are a vast graveyard of the Cretaceous dinosaurs that lived 68 million years ago. Those hills were, much later, also home to the Sioux, the Crows, and the Blackfeet, the first people to encounter the dinosaur fossils exposed by the elements. What did Native Americans make of these stone skeletons, and how did they explain the teeth and claws of gargantuan animals no one had seen alive? Did they speculate about their deaths? Did they collect fossils? Beginning in the East, with its Ice Age monsters, and ending in the West, where dinosaurs lived and died, this richly illustrated and elegantly written book examines the discoveries of enormous bones and uses of fossils for medicine, hunting magic, and spells. Well before Columbus, Native Americans observed the mysterious petrified remains of extinct creatures and sought to understand their transformation to stone. In perceptive creation stories, they visualized the remains of extinct mammoths, dinosaurs, pterosaurs, and marine creatures as Monster Bears, Giant Lizards, Thunder Birds, and Water Monsters. Their insights, some so sophisticated that they anticipate modern scientific theories, were passed down in oral histories over many centuries. Drawing on historical sources, archaeology, traditional accounts, and extensive personal interviews, Adrienne Mayor takes us from Aztec and Inca fossil tales to the traditions of the Iroquois, Navajos, Apaches, Cheyennes, and Pawnees. *Fossil Legends of the First Americans* represents a major step forward in our understanding of how humans made sense of fossils before evolutionary theory developed.

1997 events in history: The Event of Postcolonial Shame Timothy Bewes, 2010-11-22

In a postcolonial world, where structures of power, hierarchy, and domination operate on a global scale, writers face an ethical and aesthetic dilemma: How to write without contributing to the inscription of inequality? How to process the colonial past without reverting to a pathology of self-disgust? Can literature ever be free of the shame of the postcolonial epoch--ever be truly postcolonial? As disparities of power seem only to be increasing, such questions are more urgent than ever. In this book, Timothy Bewes argues that shame is a dominant temperament in twentieth-century literature, and the key to understanding the ethics and aesthetics of the contemporary world. Drawing on thinkers such as Jean-Paul Sartre, Frantz Fanon, Theodor Adorno, and Gilles Deleuze, Bewes argues that in literature there is an event of shame that brings together these ethical and aesthetic tensions. Reading works by J. M. Coetzee, Joseph Conrad, Nadine Gordimer, V. S. Naipaul, Caryl Phillips, Ngugi wa Thiong'o, and Zoë Wicomb, Bewes presents a startling theory: the practices of postcolonial literature depend upon and repeat the same structures of thought and perception that made colonialism possible in the first place. As long as those structures remain in place, literature and critical thinking will remain steeped in shame. Offering a new mode of postcolonial reading, *The Event of Postcolonial Shame* demands a literature and a criticism that acknowledge their own ethical deficiency without seeking absolution from it.

1997 events in history: Maigret, Simenon and France Bill Alder, 2012-12-01

Georges Simenon (1903-1989) was a phenomenally successful author of crime fiction. His 75 Maigret novels and 28 Maigret short stories were published between 1931 and 1972 to great international acclaim (he is the only non-anglophone crime writer to have achieved such renown). His Maigret stories are regarded by many as having established a new direction in crime fiction, emphasizing social and psychological portraiture rather than focussing on a puzzle to be solved or on action. This book examines the importance of social class and social change in the Maigret stories, giving a particular emphasis to the early formative novels and the development of plot, characterization and setting. The author seeks to establish the extent to which Simenon's portrait of French society is historically

accurate and the nature of the influence of the author's own class position and ideology on his fiction.

1997 events in history: *The Social Psychology of Experience* David Middleton, 2005-05-20 As their argument unfolds, the authors reveal that memories do not solely reside in a linear passage of time, linking past, present and future, nor do they solely rest within the individual's consciousness, but that memory sits at the very heart of 'lived experience'; whether collective or individual, the vehicle for how we remember or forget is linked to social interaction, object interaction and the different durations of living that we all have. It is very much connected to the social psychology of experience.

1997 events in history: *Making Use of History in New South African Fiction* Sten Pultz Moslund, 2003 A study of the use of history as political ammunition and literature as historical counter-discourse in Mongane Serote's *Gods of Our Time*, Mike Nicol's *The Ibis Tapestry*, and Zakes Mda's *Ways of Dying*. Moslund shows how literary engagement with the past seeks to rupture the continuity of a strongly dichotomised epistemology and through that dissolve the inherited polarisation of society. Falsification of history is exposed as constructed discourse and past simplifications of reality as sharply demarcated into homogenous self-justifying, categorisations of, Us against Them, are challenged with paradox, doubt and introspection.

1997 events in history: *Shakespeare and Tyranny* Keith Gregor, 2014-09-26 This book brings together a selection of essays on the reception and dissemination of Shakespeare's plays in England and beyond from the 17th century to the present. Written from the perspective of a nation or cluster of nations in which Shakespeare has been used either to reflect, legitimize or challenge different versions of authoritarian rule, each of the chapters offers a picture of Shakespeare as unwitting commentator on some of the most significant and unsettling political events in Europe and elsewhere. Illustrating and analyzing changing attitudes to Shakespeare and his work in various tyrannical and post-tyrannical contexts in both Western and Eastern Europe, North Africa and South America, the volume provides insights into issues like the role of censorship and self-censorship in the revision and production of Shakespearean material; institutional controls on the dissemination and publication of Shakespeare's work; assumptions and techniques in the staging of his plays; state intervention in the elaboration of a Shakespeare "canon"; the role of Shakespeare in the construction of identity under tyranny; and the pertinence or otherwise of the subversion/containment paradigm following events such as the collapse of communism and the so-called "Arab Spring".

1997 events in history: Historical Discourse Caroline Coffin, 2009-01-01 Historical Discourse analyses the importance of the language of time, cause and evaluation in both texts which students at secondary school are required to read, and their own writing for assessment. In contrast to studies which have denied that history has a specialised language, Caroline Coffin demonstrates through a detailed study of historical texts, that writing about the past requires different genres, lexical and grammatical structures. In this analysis, language emerges as a powerful tool for making meaning in historical writing. Presupposing no prior knowledge of systemic functional linguistics, this insightful book will be of interest to researchers in applied linguistics and discourse analysis, as well as history educators.

1997 events in history: *Preparing for the Psychological Consequences of Terrorism* Institute of Medicine, Board on Neuroscience and Behavioral Health, Committee on Responding to the Psychological Consequences of Terrorism, 2003-08-26 The Oklahoma City bombing, intentional crashing of airliners on September 11, 2001, and anthrax attacks in the fall of 2001 have made Americans acutely aware of the impacts of terrorism. These events and continued threats of terrorism have raised questions about the impact on the psychological health of the nation and how well the public health infrastructure is able to meet the psychological needs that will likely result. *Preparing for the Psychological Consequences of Terrorism* highlights some of the critical issues in responding to the psychological needs that result from terrorism and provides possible options for intervention. The committee offers an example for a public health strategy that may serve as a base from which plans to prevent and respond to the psychological consequences of a variety of terrorism events can be formulated. The report includes recommendations for the training and education of service providers, ensuring appropriate guidelines for the protection of service providers, and developing public health surveillance for preevent, event, and postevent factors related to psychological consequences.

1997 events in history: Stories in Stone: Memorialization, the Creation of History and the Role of Preservation Emily Williams, 2020-10-06 In 1866, Alexander Dunlop, a free black living in Williamsburg Virginia, did three unusual things. He had an audience with the President of the United States, testified in front of the Joint Congressional Committee on Reconstruction, and he purchased a tombstone for his wife, Lucy Ann Dunlop. Purchases of this sort were rarities among Virginia's free black community—and this particular gravestone is made more significant by Dunlop's choice of words, his political advocacy, and the racialized rhetoric of the period. Carved by a pair of Richmond-based carvers, who like many other Southern monument makers, contributed to celebrating and mythologizing the "Lost Cause" in the wake of the Civil War, Lucy Ann's tombstone is a powerful statement of Dunlop's belief in the worth of all men and his hopes for the future. Buried in 1925 by the white members of a church congregation, and again in the 1960s by the Colonial Williamsburg Foundation, the tombstone was excavated in 2003. Analysis, conservation, and long-term interpretation were undertaken by the Foundation in partnership with the community of the First Baptist Church, a historically black church within which Alexander Dunlop was a leader. "Stories in Stone: Memorialization, the Creation of History and the Role of Preservation" examines the story of the tombstone through a blend of object biography and micro-historical approaches and contrasts it with other memory projects, like the remembrance of the Civil War dead. Data from a regional survey of nineteenth-century cemeteries, historical accounts, literary sources, and the visual arts are woven together to explore the agentive relationships between monuments, their commissioners, their creators and their viewers and the ways in which memory is created and contested and how this impacts the history we learn and preserve.
