In practice, it has become the distinguishing big-business engine of our time...[A] first-rate history." —New Yorker VC tells the riveting story of how the venture capital industry arose from America's longstanding identification with entrepreneurship and risk-taking. Whether the venture is a whaling voyage setting sail from New Bedford or the latest Silicon Valley startup, VC is a state of mind as much as a way of doing business, exemplified by an appetite for seeking extreme financial rewards, a tolerance for failure and experimentation, and a faith in the promise of innovation to generate new wealth. Tom Nicholas's authoritative history takes us on a roller coaster of entrepreneurial successes and setbacks. It describes how iconic firms like Kleiner Perkins and Sequoia invested in Genentech and Apple even as it tells the larger story of VC's birth and evolution, revealing along the way why venture capital is such a quintessentially American

institution—one that has proven difficult to recreate elsewhere.

1st franklin financial bessemer al: Making Of An Economic Superpower, The: Unlocking China's Secret Of Rapid Industrialization Yi Wen, 2016-05-13 The rise of China is no doubt one of the most important events in world economic history since the Industrial Revolution. Mainstream economics, especially the institutional theory of economic development based on a dichotomy of extractive vs. inclusive political institutions, is highly inadequate in explaining China's rise. This book argues that only a radical reinterpretation of the history of the Industrial Revolution and the rise of the West (as incorrectly portrayed by the institutional theory) can fully explain China's growth miracle and why the determined rise of China is unstoppable despite its current 'backward' financial system and political institutions. Conversely, China's spectacular and rapid transformation from an impoverished agrarian society to a formidable industrial superpower sheds considerable light on the fundamental shortcomings of the institutional theory and mainstream 'blackboard' economic models, and provides more-accurate reevaluations of historical episodes such as Africa's enduring poverty trap despite radical political and economic reforms, Latin America's lost decades and frequent debt crises, 19th century Europe's great escape from the Malthusian trap, and the Industrial Revolution itself.

1st franklin financial bessemer al: Adam Smith in Beijing Giovanni Arrighi, 2009-01-05 In the late eighteenth century, the political economist Adam Smith predicted an eventual equalization of power between the West and the territories it had conquered. In this magisterial new work, Giovanni Arrighi shows how China's extraordinary rise invites us to reassess radically the conventional reading of The Wealth of Nations. He examines how recent US attempts to create the first truly global empire were conceived to counter China's spectacular economic success Now America's disastrous failure in Iraq has made the People's Republic of China the true winner in the US War on Terror. China may soon become again the kind of noncapitalist market economy that Smith described, an event that will reconfigure world trade and the global balance of power.
