Stephen Weatherford, 2021-02-01 In *Evidence, Politics, and Education Policy*, political scientists Lorraine M. McDonnell and M. Stephen Weatherford provide an original analysis of evidence use in education policymaking to help scholars and advocates shape policy more effectively. The book shows how multiple types of evidence are combined as elected officials and their staffs work with researchers, advocates, policy entrepreneurs, and intermediary organizations to develop, create, and implement education policies. *Evidence, Politics, and Education Policy* offers an in-depth understanding of the political environment in which evidence is solicited and used. Two key case studies inform the book's findings. The primary case—a major, multimethod study—examines the development and early implementation of the Common Core State Standards at the national level and in four states: California, Indiana, Massachusetts, and Tennessee. A comparative case analyzes the evidence used in Congressional hearings over the twenty-year history of the Children's Health Insurance Program. Together, the two cases illustrate the conditions under which different types of evidence are used and, in particular, how federalism, the complexity of the policy problem, and the policy's maturity shape evidence use. McDonnell and Weatherford focus on three leverage points for strengthening the use of research evidence in education policy: integrating research findings with value-based policy ideas; designing policies with incentives for research use built into their rules and organizational structures; and training policy analysts to promote the use of research in policymaking venues.

2 education circle cambridge ma: *Semiotics Education Experience* , 2010-01-01 "Semiotics Education Experience" is a collection of fifteen essays edited by Inna Semetsky that explores semiotic approaches to education: semiotics of teaching, learning, and curriculum; educational theory and philosophies of Dewey, Peirce, and Deleuze; education as political semiosis; logic and mathematics; visual signs; semiotics and complexity; semiotics and ethics of the self. This is a landmark collection of cross-disciplinary chapters by international scholars that mark out the appeal and significance of a semiotic approach to education. As Marcel Danesi reminds us in the Foreword, Vygotsky construed learning theory as the science of signs. Semetsky's collection should be widely read by students and scholars in education, philosophy, futures studies, cultural studies, and related disciplines. It deserves the widest dissemination. 2 education circle cambridge ma: Beyond the Bubble Test Linda Darling-Hammond, Frank Adamson, 2014-06-16 Performance assessment is a hot topic in school systems, and educators continue to analyze its costs, benefits, and feasibility as a replacement for high-stakes testing. Until now, researchers and policymakers have had to dig to find out what we know and what we still have to learn about performance assessment. Beyond the Bubble Test: How Performance Assessments Support 21st Century Learning synthesizes the latest findings in the field, and not a moment too soon. Statistics indicate that the United States is in danger of falling behind if it fails to adapt to our changing world. The memory and recall strategies of traditional testing are no longer adequate to equip our students with the skills they need to excel in the global economy. Instead teachers need to engage students in deeper learning, assessing their ability to use higher-order skills. Skills like synthesizing information, understanding evidence, and critical problem-solving are not achieved when we teach to multiple-choice exams. Examples in Beyond the Bubble Test paint a useful picture of how schools can begin to supplement traditional tests with something that works better. This book provides new perspectives on current performance assessment research, plus an incisive look at what's possible at the local and state levels. Linda Darling-Hammond, with a team of leading scholars, bring together lessons learned, new directions, and solid recommendations into a single, readily accessible compendium. Beyond the Bubble Test situates the current debate on performance assessment within the context of testing in the United States. This comprehensive resource also looks beyond our U.S. borders to Singapore, Hong Kong, and other places whose reform-mindedness can serve as an example to us.

2 education circle cambridge ma: Architecture and the Public Good Tom Spector, 2021-06-01 Why has explaining the value of the architecture profession proven so difficult? The architecture profession can be well-defended by demonstrating the public good which results from its protected practice. Although the book believes in this approach, this approach immediately raises

the thorny questions of just who is the public, and what is its good? To answer these questions, to explain why the profession has done a poor job explaining itself, and to propose a fresh perspective are the challenges set out in this book. The book dissects the internal weaknesses and external forces which have prevented architects from asserting their value to the public, explains how the concept of the public is itself widely misunderstood, investigates the shifting boundaries of the public and private realms, and proposes a series of measures by which we can assess and improve an architectural work's publicness. Through a renewed focus on the public good that everyday architects are capable of as a profession, the book charts an ultimately optimistic program for the architecture profession's renewal.

2 education circle cambridge ma: Literature Education in the Asia-Pacific Chin Ee Loh, Suzanne S. Choo, Catherine Beavis, 2018-03-29 The continual rise of English as a global lingua franca has meant that English literature, both as a discipline and as a tool in ESL and EFL classrooms, is being used in varied ways outside the inner circle of English. This edited collection provides an overview of English literature education in the Asia-Pacific in global times, bringing to international attention a rich understanding of the trends, issues and challenges specific to nations within the Asia-Pacific region. Comprising contributions from Australia, China, Hong Kong, India, Indonesia, Malaysia, Philippines, Singapore and Vietnam, the collection addresses the diversity of learners in different national, cultural and teaching contexts. In doing so, it provides insights into historical and current trends in literature education, foregrounds specific issues and challenges in policymaking and implementation, presents practical matters concerning text selection, use of literature in the language classroom, innovative practices in literature education, and raises pressing and important questions about the nature, purpose and importance of literature education in global times.

2 education circle cambridge ma: Navigating Precarity in Educational Contexts Karen Monkman, Ann Frkovich, Amira Proweller, 2022-08-01 This volume offers a timely collection of research-based studies that engage with contemporary conditions of precarity across an array of locations, exploring how it is understood, experienced, and acted upon by educators in schools, universities, and nonformal educational spaces. Precarity presents as layered, unpredictable, destabilizing, and rapidly shifting sociopolitical and economic dynamics, shown here in various forms, including the global pandemic, divisive populist politics, displacement of refugees and the landless, race and gender injustices, and neoliberal policies that constrain educational and social possibilities. Grouped around reflection, educational practice, and social activism, the authors show how educators engage these precarious conditions as they work toward a more interconnected, humane, and just society. This text will benefit researchers, academics, and educators with an interest in social foundations of education, multicultural and social justice education, educational policy, and international and comparative education, sociology and anthropology of education, and cultural studies within education, among other fields.

2 education circle cambridge ma: Reading Circles, Novels and Adult Reading Development Sam Duncan, 2012-02-23 Adult literacy teachers are constantly searching for effective, engaging and distinctly 'adult' ways to develop adult emergent reading and, for at least the past two hundred years, adults have formed themselves into reading circles to read and discuss novels on a weekly or monthly basis. Why then are reading circles rarely used, or studied, in formal adult literacy provision? This book explores adult reading development, novel reading and reading circles in the context of a wider examination of reading pedagogies and practices in the English-speaking world. It discusses reading as both an individual and a communal act and investigates the relationship between literature and literacy development, practice and pedagogy (including a reassessment of the controversial approaches of reading aloud and phonics for adults). Sam Duncan reviews a case study of an adult reading circle in a large London further education college and identifies the wider

implications for the teaching and learning of adult emergent reading, for the use and understanding of reading circles and for how we understand the novel reading experience more broadly.

2 education circle cambridge ma: *Romantic Outlaws* Charlotte Gordon, 2016-02-02 NATIONAL BOOK CRITICS CIRCLE AWARD WINNER • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE SEATTLE TIMES This groundbreaking dual biography brings to life a pioneering English feminist and the daughter she never knew. Mary Wollstonecraft and Mary Shelley have each been the subject of numerous biographies, yet no one has ever examined their lives in one book—until now. In *Romantic Outlaws*, Charlotte Gordon reunites the trailblazing author who wrote *A Vindication of the Rights of Woman* and the Romantic visionary who gave the world *Frankenstein*—two courageous women who should have shared their lives, but instead shared a powerful literary and feminist legacy. In 1797, less than two weeks after giving birth to her second daughter, Mary Wollstonecraft died, and a remarkable life spent pushing against the boundaries of society's expectations for women came to an end. But another was just beginning. Wollstonecraft's daughter Mary was to follow a similarly audacious path. Both women had passionate relationships with several men, bore children out of wedlock, and chose to live in exile outside their native country. Each in her own time fought against the injustices women faced and wrote books that

changed literary history. The private lives of both Marys were nothing less than the stuff of great Romantic drama, providing fabulous material for Charlotte Gordon, an accomplished historian and a gifted storyteller. Taking readers on a vivid journey across revolutionary France and Victorian England, she seamlessly interweaves the lives of her two protagonists in alternating chapters, creating a book that reads like a richly textured historical novel. Gordon also paints unforgettable portraits of the men in their lives, including the mercurial genius Percy Shelley, the unbridled libertine Lord Byron, and the brilliant radical William Godwin. "Brave, passionate, and visionary, they broke almost every rule there was to break," Gordon writes of Wollstonecraft and Shelley. A truly revelatory biography, *Romantic Outlaws* reveals the defiant, creative lives of this daring mother-daughter pair who refused to be confined by the rigid conventions of their era. Praise for *Romantic Outlaws* "[An] impassioned dual biography . . . Gordon, alternating between the two chapter by chapter, binds their lives into a fascinating whole. She shows, in vivid detail, how mother influenced daughter, and how the daughter's struggles mirrored the mother's."—The Boston Globe
